Magical Ancient Beads:

Magical Ancient Beads Jamey D. Allen, Sumarah Adhyatman, 1998-01-01 This book explores the fascinating world of beads. Beads represent the oldest form of art and were probably the first durable ornaments of mankind desired not only for their beauty but for the religious or superstitious beliefs associated with those times. Made of materials such as shell, bone, seed, wood, metal, and glass, beads' durability, portability, and universal attractiveness have made them units of currency in many parts of the world. Filled with rich photographs of a vast collection of beautiful beads. *Magic Charms from A to Z*. Witches' Almanac, 1999 A dictionary of amulets, talismans, and charms compiled by the staff of The Witches Almanac is a richly illustrated reference guide highlighting all the jewels, herbs, and devices that have acquired special significance from earliest time to the present. Magic for Everyone Mario Berardelli, 2013-12-05 Every trick selected had to be practical and no manipulative move was required. A means of eliminating the difficult move had to be created to present you with a variety of tricks using only common articles that are easily obtainable. Any special apparatus required must be simple enough to be made by the average person or child. Also, any material thereof must be easily obtainable. For example, in the kitchen, garage, around the house, and in a hobby shop. Just to name a few. These tricks are also created for every conceivable situation wherever you find yourself anytime and everywhere. Although no manipulative skill is involved, please study these tricks carefully before presenting them and never do a trick twice. Cargoes in Motion Burkhard Schnepel, Julia Verne, 2022-02-08 An innovative collection of essays that foregrounds specific cargoes as a means to understand connectivity and mobility across the Indian Ocean world. Scholars have long appreciated the centrality of trade and commerce in understanding the connectivity and mobility that underpin human experience in the Indian Ocean region. But studies of merchant and commercial activities have paid little attention to the role that cargoes have played in connecting the disparate parts of this vast oceanic world. Drawing from the work of anthropologists, geographers, and historians, *Cargoes in Motion* tells the story of how material objects have informed and continue to shape processes of exchange across the Indian Ocean. By following selected cargoes through both space and time, this book makes an important and innovative contribution to Indian Ocean studies. The multidisciplinary approach deepens our understanding of the nature and dynamics of the Indian Ocean world by showing how transoceanic connectivity has been driven not only by economic, social, cultural, and political factors but also by the materiality of the objects themselves. Essays by Edward A. Alpers, Fahad Ahmad, Bishara Eva, Maria Knoll, Karl Heinz Kohl, Lisa Jenny Krieg, Pedro Machado, Rupert Neuhfer, Mareike Pampus, Hannah Pilgrim, Burkhard Schnepel, Hanne Sch nigg, Tansen Sen, Steven Serels, Julia Verne, Kunbing Xiao.
