Maginot Line Myth And Reality:

The Maginot Line Anthony Kemp, 1988 *The Maginot Line 1928-45* William Allcorn, 2012-07-20 The Maginot Line the massive series of fortifications built by France in the 1930s to defend its borders with Germany and Italy is perhaps the most maligned collection of fortifications ever built Despite being a technological marvel and the most sophisticated and complex set of fortifications built up to that time it failed to save France from crushing defeat in 1940 Yet there are those who argue that it accomplished exactly what it was designed to do This book provides a concise and informative treatment of the Maginot Line from North East France to the Mediterranean Packed with plans contemporary and modern images plus digital artwork it presents a detailed visual exploration of this famous fortification system *Warfare in the Western World, 1882-1975* Jeremy Black, 2014-12-18 In this companion volume to *Western Warfare 1775-1882* Jeremy Black takes his analysis of modern warfare into the twentieth century As before a distinctive feature of the author's approach is the coverage of both land and naval warfare as well as conflict within the West and between Western and non Western powers Beginning with the British conquest of Egypt in 1882 this book goes on to examine the Spanish American War of 1898 the Boer War and the Balkan conflicts leading to world war in 1914 A revisionist account of the First World War is followed by a discussion of Western expansionism in the period to 1936 Chapters on the interwar years and the Second World War lead on to a discussion of the retreat from empire and the advent of Cold War The narrative closes with the end of the Vietnam War in 1975 and a discussion of the limitations of Western military technique doctrine and technology Throughout the themes of military change and modernization are brought into sharp focus and the revolutionary characteristics of the machination of war in this period are questioned Jeremy Black offers a new and challenging interpretation of modern warfare that will be required reading not only for students of military history but for all those interested in the impact of war in the making of the modern world The European Economy Since 1914 Derek Aldcroft, Steven Morewood, 2012-12-07 The fifth edition of *The European Economy* provides a succinct and lucid account of the development and problems of the European economy since the first world war It covers the whole of Europe including Russia and Turkey The text divides into several clearly defined sub periods the impact and aftermath of the first world war and recovery and reconstruction during the 1920s the depression and the recovery of the 1930s the impact of the second world war and the new political division in Europe the post war boom of the 1950s and 1960s and then into the growth slowdown of the 1970s and the persistent problems of inflation and unemployment It then analyses the demise of the centrally planned economies of eastern Europe and the move to a more united Europe and then discusses the financial and economic problems that have emerged in the early twenty first century This new edition has been extensively revised new chapters have been added and the reading lists updated Though the volume is designed as a basic introductory text the authors elicit some of the lessons that can be learnt from a study of past development one of which is the limited power of governments to influence the course of events and to combat the operation

of market forces **Emotion in Motion** Mike Robinson, David Picard, 2016-05-06 What happens when tourists scream with fear shout with anger and frustration weep with joy and delight or even faint in the face of revealed beauty How can certain sites affect some tourists so deeply that they require hospitalisation and psychiatric treatment What are the inner contours of tourist experience and how does it relate to specific emotional cultures What are the consequences of the emotional cultures of tourists upon destinations How are differences in emotional culture mobilized and played out in the transnational contact zones of international tourism While many books have engaged with the structural frames of tourist practice and experience this is the first to deal with the emotional dimensions of tourism travel and contact and the ways in which they can transform tourists destinations and travel cultures through emotional engagements The book brings together an international array of scholars from anthropology psychiatry history cultural geography and critical tourism studies to explore how the movement to and through the realms of exotic people wild nature's subliminal art spirit worlds metropolitan cities and sexualised others variably provoke emotions peak experiences travel syndromes and inner dialogues The authors show how tourism challenges us to engage with concepts of self other time nature sex the body and death Through a set of ethnographic and historic cases they demonstrate that such engagements usually have little to do with the actual destination but rather are deeply anchored in personal memories repressed fears and desires and the collective imaginaries of our societies France in 1938 Benjamin F. Martin, 2006-09-01 When Benjamin Martin's latest report from the front of French fallibility does not read like a tragedy whose end is foreordained it reads like a melodrama sensational doings punctuated by catchy melodies like L Internationale and La Marseillaise In both cases it reads well French life in the run up to World War II was a gangrenous decomposition to be followed by still worse The country's leaders found nary a pratfall that they could avoid They chose a semblance of peace above honor and ended up with neither In spite of a masterful prologue successful synthesis elegant concision and lucid presentation or perhaps thanks to them the reader can't help sharing the nation's shames A tribute to the historian's talent Eugen Weber Phi Beta Kappa Key Reporter At the beginning of 1938 containment of Nazi Germany by a coalition of eastern and western democracies without resorting to war was still a distinct possibility By the end of 1938 however Germany was much stronger the western democracies stood alone and war was all but certain The primary cause for these developments argues Benjamin F Martin was the foreign and domestic policies adopted by the French government and embraced by the French people In a riveting account of the dark days leading up to France's defeat and occupation Martin reveals a great and civilized nation committing a kind of suicide in 1938 Using movies novels newspapers and sensational court cases Martin weaves an absorbing tale of France's collective fear and melancholy during this troubled prewar period *Going for Broke* James M. McCaffrey, 2013-04-30 When Japanese forces attacked Pearl Harbor on December 7 1941 Americans reacted with revulsion and horror In the patriotic war fever that followed thousands of volunteers including Japanese Americans rushed to military recruitment centers Except for those in the Hawaii National Guard who made up the 100th Infantry Battalion the U S

Army initially turned Japanese American prospects away. Then as a result of anti Japanese fearmongering on the West Coast more than 100 000 Americans of Japanese descent were sent to confinement in inland relocation centers. Most were natural born citizens, their only crime their ethnicity. After the army eventually decided it would admit the second generation Japanese American Nisei volunteers, it complemented the 100th Infantry Battalion by creating the 442nd Regimental Combat Team. This mostly Japanese American unit consisted of soldiers drafted before Pearl Harbor, volunteers from Hawaii, and even recruits from the relocation centers. In *Going for Broke*, historian James M. McCaffrey traces these men's experiences in World War II from training to some of the deadliest combat in Europe. Weaving together the voices of numerous soldiers, McCaffrey tells of the men's frustrations and achievements on the U.S. mainland and abroad. Training in Mississippi, the recruits from Hawaii and the mainland have their first encounter with southern style black white segregation. Once in action, they helped push the Germans out of Italy and France. The 442nd would go on to become one of the most highly decorated units in the U.S. Army. McCaffrey's account makes clear that like other American soldiers in World War II, the Nisei relied on their personal determination, social values, and training to go for broke, to bet everything, even their lives. Ultimately, their bravery and patriotism in the face of prejudice advanced racial harmony and opportunities for Japanese Americans after the war.

Verdun 1916 Malcolm Brown, 2003-11-01 1916 was a year of killing. The British remember the Somme, but earlier in the year the heart of the French army was ripped out by the Germans at Verdun. The garrison city in north eastern France was the focus of a massive German attack; the French fought back ferociously, leading to a battle that would claim hundreds of thousands of lives and permanently scar the French psyche. To this day, one can visit the site of ghost villages uninhabited since, but still cherished like shrines. Memories of Verdun would greatly influence military and political thinking for decades to come, as both sides came away with memories of bravery, futility, and horror. Malcolm Brown has produced a vivid new history of this epic clash, drawing on original illustrations and eye witness accounts; he has captured the spirit of a battle that defines the hell of warfare on the Western Front.

The Polish Underground Army, the Western Allies, and the Failure of Strategic Unity in World War II Michael Alfred Peszke, 2015-07-11 This military history covers the attempts of General Wladyslaw Sikorski and his successor General Kazimierz Sosnkowski to integrate Polish forces into Western strategy and to have their clandestine forces declared an allied combatant.
