Main Street To Miracle Mile American Roadside Architecture:

Main Street to Miracle Mile Chester Liebs, 1995-08 Traces the transformation of commercial development as it has moved from centralized main streets out along the street car lines to form the miracle miles and shopping malls of today Also explores the evolution of roadside buildings Back cover *Main Street to Miracle Mile* Chester H. Liebs, 1985-01-01 First published in 1985 Chester Liebs *Main Street to Miracle Mile* established the twentieth century roadside landscape as a subject for serious study Liebs traces the transformation of commercial development as it has moved from centralized main streets out along the street car lines to form the miracle miles and shopping malls of today He also explores the evolution of roadside buildings from supermarkets and motels to automobile showrooms and drive in theaters Both an historical survey and invaluable guide for reading highway landscapes this classic work which has inspired numerous studies museum exhibits and preservation efforts is now back in print with new commentary by the author **Modernizing Main Street** Gabrielle

Esperdy, 2010-07-15 An important part of the New Deal the Modernization Credit Plan helped transform urban business districts and small town commercial strips across 1930s America but it has since been almost completely forgotten In *Modernizing Main Street* Gabrielle Esperdy uncovers the cultural history of the hundreds of thousands of modernized storefronts that resulted from the little known federal provision that made billions of dollars available to shop owners who wanted to update their facades Esperdy argues that these updated storefronts served a range of complex purposes such as stimulating public consumption extending the New Deal's influence reviving a stagnant construction industry and introducing European modernist design to the everyday landscape She goes on to show that these diverse roles are inseparable woven together not only by the crisis of the Depression but also by the pressures of burgeoning consumerism As the decade's two major cultural forces Esperdy concludes consumerism and the Depression transformed the storefront from a seemingly insignificant element of the built environment into a potent site for the physical and rhetorical staging of recovery and progress

The Early Public Garages of San Francisco Mark D. Kessler, 2013-05-06 In the quarter century from San Francisco's devastating fire of 1906 to the beginning of the Great Depression as automobiles exploded in popularity new buildings had to be conceived and constructed to provide parking space and repair facilities This book studies a number of the resulting public garages that featured facade designs based on historical architectural styles Considering the garages function the facades exhibit a surprising grace and nobility Through an analysis complemented by photographs including sixty by noted architectural photographer Sharon Risedorph and drawings the author dissects the architectural and cultural factors that lie at the heart of this unexpected merit Addressing the discrepancy between the buildings beauty and the assumption that old garages are unsightly and disposable the book examines them as cultural artifacts of the dawn of the Motor Age The garage is presented as a new form of transportation depot employing architectural symbolism to celebrate the ascendancy of the automobile over the train Today the surviving buildings are vulnerable to real estate development in part

because their quality is misunderstood The book a fresh perspective on the value of older utilitarian buildings concludes with a call to preserve these structures and adapt them to compatible new uses *Urban Transformations in the U.S.A.* Julia Sattler, 2016-01-15 How did American cities change throughout the 20th and early 21st century This timely publication integrates research from American Literary and Cultural Studies Urban Studies and History The essays range from negotiations of the ethnic city in US literature and media to studies of recent urban phenomena and their representations gentrification re appropriation and conversion of urban spaces in the USA These interdisciplinary and intercultural perspectives on American cities provide unique points of access for studying the complex narratives of urban transformation

Motoring John A. Jakle, Keith A. Sculle, 2008-01-01 Motoring unmasks the forces that shape the American driving experience commercial aesthetic cultural mechanical as it takes a timely look back at our historically unconditional love of motor travel Focusing on recreational travel between 1900 and 1960 John A Jakle and Keith A Sculle cover dozens of topics related to drivers cars and highways and explain how they all converge to uphold that illusory notion of release and rejuvenation we call the open road Jakle and Sculle have collaborated on five previous books on the history culture and landscape of the American road Here with an emphasis on the driver s perspective they discuss garages and gas stations roadside tourist attractions freeways and toll roads truck stops bus travel the rise of the convenience store and much more All the while the authors make us think about aspects of driving that are often taken for granted how for instance the many lodging and food options along our highways reinforce the connection between driving and freedom and how by enabling greater speeds highway engineers helped to stoke motorists blessed fantasy of flight Although driving originally celebrated freedom and touted a common experience it has increasingly become a highly regulated isolated activity The motive behind America s first embrace of the automobile individual prerogative still substantially obscures this reality Americans did not have the automobile imposed on them say the authors Jakle and Sculle ask why some of the early prophetic warnings about our car culture went unheeded and why the arguments of its promoters resonated so persuasively Today the automobile is implicated in any number of environmental even social problems As the wisdom of our dependence on automobile travel has come into serious question reassessment of how we first became that way is more important than ever **Hip to the Trip**

Peter B. Dedek, 2007-05-01 Before and since its official closure in 1985 historic U S 66 became associated with the deserts Indians and cowboys of the Southwest the Okies of the Great Depression and the millions of vacationers who took to the highway in their streamlined automobiles and found adventure on the open road from the late 1940s to the 1970s Route 66 has such name recognition that in the past twenty years it has been used to advertise products ranging from blue jeans to root beer to automobiles The highway enjoyed only about thirty years of dominance as a primary auto and truck route from 1926 to around 1956 Gradually replaced by interstates into the 1980s Route 66 became forever fixed in the history and lore of the Southwest and the United States Route 66 provides a unique vantage point from which to better understand American

popular culture from the 1920s to the present The purpose of this book is not to simply recount the history of Route 66 but to create a comprehensive portrait of the cultural meaning of the highway What was Route 66 at its pinnacle what is it today and what might it become in the future

Gropius and the Spirit of TAC Arnold Koerte, 2025-02-21 This study describes how Walter Gropius of former Bauhaus fame transformed himself from the image of the omnipotent Master Builder to the humble Grope of later years Having come as an emigre from his native Germany to the US he had to cope with quite a different office culture based on teamwork Not the single genius but a collective approach to problem solving was the order of the day coupled with a conciliatory manner of debate among equals With that his legendary firm The Architects Collaborative called TAC for short in Boston was to become the star of the profession in the USA over the course of some 50 years Thanks to the combined talent and vigorous input of seven younger partners the firm succeeded in gaining large commissions at home and internationally The well designed school and campus buildings in New England found their equivalent in large university projects such as in Baghdad and Tunisia Internally the special aura at TAC was personified by a strong collective spirit of individuals in their own right In turn the office attracted a highly motivated staff of apprentices from all around the world Grope's personal charm his humor and encouragement of young people got him life long affection Not the least his pledge for the role of women in the profession left its mark on a whole new generation of architects offices to follow The author was a member of this team from 1962 to 1964 and kept in touch with Grope until his death in 1969 An eye witness account setting straight TAC's merits to Mid Century Modernism
