Systems Effectiveness and Life Cycle Costing J. K. Skwirzynski,2012-12-06 This volume contains the complete proceedings of a NATO Advanced Study Institute on various aspects of the reliability of electronic and other systems The aim of the Institute was to bring together specialists in this subject An important outcome of this Conference as many of the delegates have pointed out to me was complementing theoretical concepts and practical applications in both software and hardware The reader will find papers on the mathematical background on reliability problems in establishments where system failure may be hazardous on reliability assessment in mechanical systems and also on life cycle cost models and spares allocation The proceedings contain the texts of all the lectures delivered and also verbatim accounts of panel discussions on subjects chosen from a wide range of important issues In this introduction I will give a short account of each contribution stressing what I feel are the most interesting topics introduced by a lecturer or a panel member To visualise better the extent and structure of the Institute I present a tree like diagram showing the subjects which my co directors and I would have wished to include in our deliberations Figures 1 and 2 The names of our lecturers appear underlined under suitable headings It can be seen that we have managed to cover most of the issues which seemed important to us **VI SYSTEM EFFECTIVENESS _ I _ Performance Safety Reliability intenance istic Lethality Hazards Support S N R JARDINE Max Vel etc**

available in the behavioral area do not give an adequate picture of this topic and this is particularly unfortunate because testing and evaluation T based on his past experience in system testing the author recognizes the difficulties that occur in testing and indicates how these may be overcome or minimized Special attention has been paid to the context in which T workload and training effectiveness testing Special attention is also paid to environmental testing e g temperature lighting noise vibration etc One chapter reviews all the relevant T E literature including government documents that may not be readily available to the general reader As part of the preparation for writing this text a survey was made of 45 distinguished T E specialists in order to determine their characteristic T E practices The book will be useful not only to the human factors professional who specializes in T E but to all students and practitioners interested in human factors and work measurement
