Americans Across Generations Jessica Vasquez-Tokos, 2011-04-18 Outstanding Academic Title from 2011 by Choice Magazine

While newly arrived immigrants are often the focus of public concern and debate many Mexican immigrants and Mexican Americans have resided in the United States for generations Latinos are the largest and fastest growing ethnic group in the United States and their racial identities change with each generation While the attainment of education and middle class occupations signals a decline in cultural attachment for some socioeconomic mobility is not a cultural death knell as others are highly ethnically identified There are a variety of ways that middle class Mexican Americans relate to their ethnic heritage and racialization despite assimilation among a segment of the second and third generations reveals the continuing role of race even among the U S born Mexican Americans Across Generations investigates racial identity and assimilation in three generation Mexican American families living in California Through rich interviews with three generations of middle class Mexican American families Vasquez focuses on the family as a key site for racial and gender identity formation knowledge transmission and incorporation processes exploring how the racial identities of Mexican Americans both change and persist generationally in families She illustrates how gender physical appearance parental teaching historical era and discrimination influence Mexican Americans racial identity and incorporation patterns ultimately arguing that neither racial identity nor assimilation are straightforward progressions but instead develop unevenly and are influenced by family society and historical social movements

Inquiries Into Literacy Learning and Cultural Competencies in a World of Borders Tonya Huber, Philip S. Roberson, 2018-04-01 The vision of this book has been to represent the work of educators and scholars invested in moving education beyond insular models of language study and cultural awareness to more globally representative and inclusive interactions that range from the studied word to the lived experience and from reading the word to read the world Freire Macedo 1987 A fundamental aspect of this vision is to recognize the living nature of language and its intricate role in culture Culture is mediated through language Hauerwas Skawinski Ryan 2017 p 202 and the linguistic experience of difference is essential for developing cultural competence beyond surface culture considerations The editors of this volume are committed to a closer bond between literacy learning and cultural competencies particularly when literacy practices and education are often characterized by quantifiable standards and accountability restraints Readers of this volume will find meaningful and practical approaches to engage with learners from their earliest encounter with language s through adolescence and adulthood and across ever changing local and global communities

Cultural Education - Cultural Sustainability Zvi Bekerman, Ezra Kopelowitz, 2008-02-06 This volume is a path breaking contribution to the study of efforts of diaspora indigenous and minority groups broadly defined to use education formal and informal to sustain cultural continuity while grappling with the influences and demands of wider globalizing nationalizing or other homogenizing and assimilatory forces Particular attention is given to groups that use educational elements other than second language teaching alone in programs to sustain their particular cultural traditions The focus of the book on cultural sustainability changes the nature of questions posed in multicultural education from those that address the opening of boundaries to issues of

preserving boundaries in an open yet sustainable way As forced and elective immigration trends are changing the composition of societies and the educational systems within them bringing a rich diversity of cultural experience to the teaching learning process diaspora indigenous and minority groups are looking more and more for ways to sustain their cultures in the context of wider socio political influences This volume is a first opportunity to consider critically multicultural efforts in dialogue with educational options that are culturally particularistic but at the same time tolerant Academics will find this an excellent reference book Practitioners will draw inspiration in learning of others efforts to sustain cultures and will engage in critical reflection on their own work vis vis that of others Teachers will realize they do not stand alone in their educational efforts and will uncover new strategies and methodologies through which to approach their work
