assumptions that occlude our understanding the depths of manual therapy Embodied Being promises to illuminate the full scope of body mind healing from the point of view of both the practitioner and the person receiving the work Embodied Being states the principles of intervention and shows practitioners how to use them to answer three fundamental questions common to all forms of therapy What do I do first What do I do next and When am I finished Perplexed that most practitioners are unable to answer these questions and simply rely on their intuition Maitland sets out to define what makes a truly life altering bodywork session drawing on his understanding of Goethe Merleau Ponty and other great thinkers Maitland proposes that the holistic approach in bodywork is capable of creating new possibilities for the future by erasing the patterns that bind us to a dysfunctional past Such sessions can so profoundly reshape the body that there is no longer any room for emotional torment thus manual therapy can free bodies of physical pain releasing the innate joy within the core of all human beings Ultimately giving and receiving manual therapy teaches both practitioners and clients how to move with grace open their hearts and touch the numinous
