Human Rights in Bangladesh ,2002 The Weaknesses in the International Protection of Minority Rights Javaid Rehman, 2021-10-05 The issue of minority rights continues to occupy a sensitive position in international law Historical as well as contemporary events show that the subject is also capable of engulfing the international community as a whole The contention of the present study is that international law is in itself a difficult medium for providing adequate rights for minorities and for effectively safeguarding those rights This volume analyses the weaknesses in the international protection of minority rights through a detailed examination of the practices and policies of Pakistan Thought provoking and original in its approach this volume will prove to be of enormous value to international human rights lawyers and to scholars engaged in the study of minority rights in South Asia and Pakistan **Country Reports on Human Rights Practices** ,1981

came to be regarded as perennial enemies of empires and nations **State, Foreign Operations, and Related Programs Appropriations for 2015** United States. Congress. House. Committee on Appropriations. Subcommittee on State, Foreign Operations, and Related Programs,2014 , *Ethiopia: A New Start?* KJETIL TRONVOLL,2000-04-03 Despite having been equated with the ancient Abyssinian cultures of Amhara and Tigray for centuries there are at least 80 different ethnic groups within Ethiopia Until recently there has been little understanding of their cultures and traditions Ethiopia has traditionally been governed from the centre one of the reasons for the growth of Eritrean nationalist movements which led to the eventual independence of Eritrea This centralization and oppression of different ethnic groups led to the Ethiopian People s Revolutionary Democratic Front EPRDF coming to power in 1991 and promising that Ethiopia s peoples would no longer live under a centralized system which oppressed the majority of the population The new government went on to restructure the State forming an ethnic federation with regional ethnically based states and creating a most radical and progressive Constitution The Constitution guarantees ethnic groups a wide range of rights including secession from the ethnic federation Yet the government is beset by claims from opposition parties and national and international human rights organizations that it is guilty of widespread violations of human rights Furthermore many ordinary Ethiopians are sceptical of the government s agenda questioning its commitment to promoting the rights of all ethnic groups MRG s Report Ethiopia A New Start analyzes the Constitution which the government has fashioned in order to create confidence among ethnic groups and minorities in Ethiopia The Report discusses the Constitution s key points and focuses on implementation within the federation assessing the claims of the government s detractors The report s author Kjetil Tronvoll gives a balanced historical background to these issues and covers some of the principal areas for Ethiopia s social economic and political development The Report concludes with a series of recommendations aimed at the Ethiopian government and the international community Please note that the terminology in the fields of minority rights and indigenous peoples rights has changed over time MRG strives to reflect these changes as well as respect the right to self identification on the part of minorities and indigenous peoples At the same time after over 50 years work we know that our archive is of considerable interest to activists and researchers Therefore we make available as much of our back catalogue as possible while being aware that the language used may not reflect current thinking on these issues **The Batwa Pygmies of the Great Lakes Region** Jerome Lewis,2000-06-01 The conflicts in the Great Lakes sub region of Africa in particular the terrible genocide in Rwanda in 1994 have been reported on at length However little is known or written about one of the poorest and most vulnerable communities in the region the Batwa Pygmies Pygmies live in a considerable number of Central African countries They are believed to be the original inhabitants of the equatorial forests of Central Africa But the Batwa have been displaced and marginalized first by incoming agriculturalists and pastoralists in the nineteenth century subsequently during the colonial period by the advent of large scale logging and most recently by the establishment of game parks The severe inter and intra state conflicts of the past

decade have undermined their livelihoods and culture even further The Report focuses on the Batwa living in Burundi eastern Democratic Republic of Congo Rwanda and Uganda It provides an historical account of the Batwa of the region and shows how they have sought to accommodate themselves to changing circumstances describing their contemporary ways of life as potters and labourers and their talents as performing artists Most urgently it examines the multiple ways in which their rights are violated and documents the ways in which Batwa are now mobilizing to defend and promote their rights Please note that the terminology in the fields of minority rights and indigenous peoples rights has changed over time MRG strives to reflect these changes as well as respect the right to self identification on the part of minorities and indigenous peoples At the same time after over 50 years work we know that our archive is of considerable interest to activists and researchers Therefore we make available as much of our back catalogue as possible while being aware that the language used may not reflect current thinking on these issues

The Human Rights Covenants at 50 Daniel Moeckli, Helen Keller, Corina Heri, 2018-06-06 Half a century ago on 16 December 1966 the UN General Assembly adopted the International Covenant on Civil and Political Rights ICCPR and the International Covenant on Economic Social and Cultural Rights ICESCR While the adoption of the two UN human rights covenants was celebrated all over the world their 50th anniversary has received very little attention from the international community The present book marks this anniversary by taking stock of the first half century of the existence of what are probably the world s two most important human rights treaties It does so by reflecting on what the covenants have achieved or failed to achieve in the years that have passed by determining and comparing their current influence in the various regions of the world and by assessing their potential roles in the future The book contains papers that were presented during a symposium held in Zurich in 2016 which brought together experts and stakeholders from a range of disciplines and world regions Some fundamental issues that are addressed by the contributors are as old as the two covenants themselves They concern for example the division of human rights into first and second generation rights and the question of whether there should be one central monitoring body possibly a world court or more than just one However the contributors go beyond such questions that have been explored before they develop new answers to old questions and point to new challenges
