Marking the Land William A Lovis, Robert Whallon, 2016-02-26 Marking the Land investigates how hunter gatherers use physical landscape markers and environmental management to impose meaning on the spaces they occupy The land is full of meaning for hunter gatherers Much of that meaning is inherent in natural phenomena but some of it comes from modifications to the landscape that hunter gatherers themselves make Such alterations may be intentional or unintentional temporary or permanent and they can carry multiple layers of meaning ranging from practical signs that provide guidance and information through to less direct indications of identity or abstract highly symbolic signs of sacred or ceremonial significance This volume investigates the conditions which determine the investment of time and effort in physical landscape marking by hunter gatherers and the factors which determine the extent to which these modifications are symbolically charged Considering hunter gatherer groups of varying sociocultural complexity and scale Marking the Land provides a systematic consideration of this neglected aspect of hunter gatherer adaptation and the varied environments within which they live

The Bioarchaeology of Mummies
Kenneth C. Nystrom, 2018-09-03 The modern manifestation of mummy studies began to take shape in the 1970s and has experienced significant growth during the last several decades largely due to biomedical interest in soft tissue pathology Although this points to a vibrant field there are indications that we need to take stock of where it is today and how it may develop in the future and this volume responds to those demands In many ways mummy studies and skeletal bioarchaeology are sister disciplines sharing data sources methodologies and practitioners Given these close connections this book considers whether paradigmatic shifts that influenced the development of the latter also impacted the former Whilst there are many available books discussing mummy research most recent field wide reviews adopt a biomedical perspective to explore a particular mummy or collection of mummies The Bioarchaeology of Mummies is a unique attempt at a synthetic state of the field critical analysis which considers the field from an explicitly anthropological perspective This book is written for both skeletal bioarchaeologists that may not be familiar with the scope of mummy research and mummy researchers from biomedical fields that may not be as acquainted with current research trends within bioarchaeology Arctic Mark Nuttall, Terry Callaghan, 2000-12-21 By demonstrating the importance of communication among social scientists scientists in the natural sciences and stakeholders living in the Arctic this book provides a comprehensive overview of the region's rapidly changing physical and human dimensions In response to the tremendous challenges and opportunities facing the Arctic it is an essential resource for all Arctic researchers and those developing multidisciplinary projects Representing a state of the art overview of key areas of Arctic research by renowned specialists in the field each chapter forms a detailed varied and accessible account of current knowledge Each author introduces the subject to a non specialist readership while retaining

intellectual integrity and relevance for specialists Overall the richness of the material presented in this volume reflects the ecological and cultural diversity of this vast and environmentally critical part of the globe
