Old Violins and Their Makers James M. Fleming,1890 *The Strad* ,1895 *A Cultural History of the Violin in Nineteenth-Century London* Tom Wilder,2025-03-18 Examines the violin s evolution as not just instrument but valued objet d art through the eyes of musicians collectors makers dealers connoisseurs journalists auctioneers and traders The nineteenth century saw developments in the composition performance and reception of classical music that led to an unprecedented shift in how the violin was appreciated from humble craft object to one of art A utilitarian tool defined in 1800 by its tonal properties became by century s end an expensive objet d art classified almost exclusively in terms of physical visible properties In London s vibrant musical life Cremonese violins acquired special significance and in turn helped shape the beliefs knowledge and behaviour of the disparate actors connected to the instrument musicians collectors makers dealers connoisseurs journalists auctioneers and traders By 1880 London had supplanted Paris as the centre of the international violin trade One firm in particular W E Hill Sons emerged as a major presence in both the local musical community and the global violin market The Hills were makers restorers dealers and connoisseurs They were also writers collectors and melomaniacs deeply implicated in London s instrument auction and exhibition scene The mutually reinforcing nature of these activities which they consciously turned to account for commercial reasons bear witness to events and developments earlier in the century Their story illuminates this first study of the violin s nineteenth century journey from simple musical instrument to mystified work of art *An Encyclopedia of the Violin* Alberto Bachmann,1925 *A Catalogue of the Lyon & Healy Collection of Rare Old Violins, Violas, Violoncellos, Bows of Rare Makes* Lyon & Healy, firm, music dealers,1919

Musical Observer ,1927 **The Violin Times** ,1897 *British Violin Makers* M. Meredith Morris,2006-04-30 This adaptable instrument s origins date back centuries Celtic legends amuse us with mystical stories describing the creation of stringed music but practical history recounts that the modern birth of the violin occurred in Italy as early as the sixteenth century The skilled craft of hand production was renowned in France as well but it is the British classic type and its history that W Meredith Morris writes about in *British Violin Makers* This classic comprehensive reference to violin making reprinted in 1920 features a biographical dictionary of craftsmen along with many of their signatures and marks Twenty six photographs of selected makers and their instruments help place the contemporary reader in the style of the period Reverend Morris s second edition improves upon the first 1904 edition by adding more than 150 names to the list of makers who produced six violins or more A new foreword by music scholar Benjamin Hebbert explains the important role British

violin makers played in the development of the instrument From Morris s narrative one gets a feel for the importance of the craftsman and his materials He explains the various types of wood and varnish used and how they along with the arch and contour work together to produce a specific tone Speaking with fervor the way a wine connoisseur does when describing a certain vintage Morris compares and contrasts the quality of British instruments to that of other nations **Violin Varnish** Joseph Michelman,2011-03-23 After more than eight years of extensive research on the varnish used by the Italian Violin Makers from 1550 to 1750 A D it has not been possible to corroborate the results in the chemical laboratory This is due entirely to the unavailability of samples of the varnish for confirmatory analysis Violins made by the Italian masters of this period are so valuable and so scarce that a small sample of the varnish has not been procurable for experimental purposes Therefore synthesis must precede analysis and with no assistance from the latter This then will explain the sub title of this book as A Plausible Re creation of the Varnish Used by the Italian Makers Between the Years 1550 and 1750 A D However the results of this investigation are so logical and so deeply supported by a vast amount of convincing evidence that publication of the book is in order First possibly the findings will be confirmed or otherwise by investigators who may be more fortunate in having access to material from authentic violins made by the old masters Confirmatory chemical tests will be suggested it should be comparatively simple especially through modern micro analytical methods to determine the presence of certain constituents in the varnish The subject matter of this book will of necessity become technical especially when the theoretical aspects are considered It is realized that not everyone who will be interested in the rediscovery of the old Italian varnish will also be interested in the scientific deductions and conclusions For this reason a chapter will be included in which the preparation of the materials from which the varnish is made the formulation of the varnish and its application will be reduced to the simplest terms The old masters who lived several hundred years ago and who possessed none of the advantages of modern technology also used only the simplest technique in varnishing and finishing their violins
