Comforting the Bereaved Through Listening and Positive Responding Dr. Dee Stern L.C.P.C. PsyD, 2022-01-27 We don t seem to handle grief very well whether it s our own or someone close to us Part of the problem is that we live in a death denying society where many people feel awkward using terms like death dying or dead We rarely say that someone has died and instead use metaphors to soften the blow This book helps families friends colleagues and professionals to understand what someone who has lost a loved one is feeling Topics include the death of a child teen adult older adult spouse sibling mentally challenged individuals death of a pet and pets grieve too The author answers questions such as Why are there fewer rituals surrounding death today What do you say to someone who has lost a loved one How long do the bereaved continue to grieve What does it mean to be going through complicated grief Grief is the great equalizer and no matter who or what we are or how rich or poor grief can bring us to our knees But you can navigate it in a healthier way with the lessons in **Comforting the Bereaved through Listening and Positive Responding**

Embracing Life Again After the Death of a Spouse Dr Anniekie Ravhudzulo, 2011-01-12 When someone we love dies our whole world is knocked off balance One of the most common and yet difficult feelings you experience is isolation It seems no one understands what you are going through And many of us are so busy you don t take the time to fully grieve and therefore heal from your losses It is very true that people who are grieving often feel extremely tired because the process of grieving usually requires physical and emotional energy The grief you are feeling is not just for the person who died but also for the unfulfilled wishes and plans for the relationship with the person Death often reminds most of the people of past losses or separations Remember there are a number of conditions that can make it harder for you as a person to successfully make it through the grief process For example sudden losses are harder to deal with than ones that have been anticipated With anticipated losses the knowledge that a loss will occur allows people to prepare both by feeling grief before the fact of the loss and also by planning

ways to minimize the negative impact of the loss when it does occur The loss of a spouse lover child parent or best friend is usually more deeply felt than the loss of more distant relations and friends This is because such central relationships have long and deeply felt histories and an intensity of attachment that does not occur with more distant relationships Central relationships are more deeply and significantly knitted into the grieving persons sense of self and thus leave a bigger hole in the grieving persons sense of self when they are lost I discovered that when things are going badly whether in the family or work environment most of us strive mightily to improve our situations But what if the way to overcome a series of losses and failures is just to sink into them We all go through trials and tribulations Everyone has difficult situations in their life It is the way we look at them and the way we handle those situations I believe it is the struggle we must endure to gain the strength needed to break through the barriers With every victory comes the strength we need to overcome the obstacles and move forward Most people today give up easily because of what you may call emotional downturn This book in your hand has been written and carefully thought out with you in mind It has been written to bring you out of your sociological pit and emotional defeat I therefore gladly recommend this book to your reading that you may be built in His grace I believe that God will never give you more than you can handle You often wonder how some people cope with their situations in life I often hear people saying IdontthinkIcoulddealwiththat but we dont know what strength lies within us until the time comes to face the challenge The harder the struggle the sweeter the victory No test no rewards
