The Chemical Gazette, Or, Journal of Practical Chemistry, in All Its Applications to Pharmacy, Arts, and Manufactures, 1842 Progress In Analysis And Its Applications - Proceedings Of The 7th International Isaac Congress Michael

Ruzhansky, Jens Wirth, 2010-07-29 The International Society for Analysis its Applications and Computation ISAAC has held its international congresses biennially since 1997 This proceedings volume reports on the progress in analysis applications and computation in recent years as covered and discussed at the 7th ISAAC Congress This volume includes papers on partial differential equations function spaces operator theory integral transforms and equations potential theory complex analysis and generalizations stochastic analysis inverse problems homogenization continuum mechanics mathematical biology and medicine With over 500 participants from almost 60 countries attending the congress the book comprises a broad selection of contributions in different topics Multifractal Detrended Analysis Method and Its Application in Financial Markets

Guangxi Cao, Ling-Yun He, Jie Cao, 2018-02-18 This book collects high quality papers on the latest fundamental advances in the state of Econophysics and Management Science providing insights that address problems concerning the international economy social development and economic security This book applies the multi fractal detrended class method and improves the method with different filters The authors apply those methods to a variety of areas financial markets energy markets gold market and so on This book is arguably a systematic research and summary of various kinds of multi fractal detrended methods Furthermore it puts forward some investment suggestions on a healthy development of financial markets

Progress in Pattern Recognition, Image Analysis, Computer Vision, and Applications Luis Alvarez, Marta Mejail, Luis Gomez, Julio Jacobo, 2012-08-11 This book constitutes the refereed proceedings of the 17th Iberoamerican Congress on Pattern Recognition CIARP 2012 held in Buenos Aires Argentina in September 2012 The 109 papers presented among them two tutorials and four keynotes were carefully reviewed and selected from various submissions The papers are organized in topical sections on face and iris detection and recognition clustering fuzzy methods human actions and gestures graphs image processing and analysis shape and texture learning mining and neural networks medical images robotics stereo vision and real time remote sensing signal processing speech and handwriting analysis statistical pattern recognition theoretical pattern recognition and video analysis Complex Analysis and Its Applications C.C. Yang, Guo-Chun Wen, K Y Li, Y M

Chiang, 1994-04-05 This volume presents a collection of contributions to an international conference on complex analysis and its applications held at the newly founded Hong Kong University of Science and Technology in January 1993 The aim of the conference was to advance the theoretical aspects of complex analysis and to explore the application of its techniques to physical and engineering problems Three main areas were emphasised Value distribution theory Complex dynamical system and geometric function theory and the Application of complex analysis to differential equations and physical engineering problems Mathematical Methods for Signal and Image Analysis and Representation Luc Florack, Remco Duits, Geurt

Jongbloed, Marie Colette van Lieshout, Laurie Davies, 2012-01-13 *Mathematical Methods for Signal and Image Analysis and Representation* presents the mathematical methodology for generic image analysis tasks In the context of this book an image may be any m dimensional empirical signal living on an n dimensional smooth manifold typically but not necessarily a subset of spacetime The existing literature on image methodology is rather scattered and often limited to either a deterministic or a statistical point of view In contrast this book brings together these seemingly different points of view in order to stress their conceptual relations and formal analogies Furthermore it does not focus on specific applications although some are detailed for the sake of illustration but on the methodological frameworks on which such applications are built making it an ideal companion for those seeking a rigorous methodological basis for specific algorithms as well as for those interested in the fundamental methodology per se Covering many topics at the forefront of current research including anisotropic diffusion filtering of tensor fields this book will be of particular interest to graduate and postgraduate students and researchers in the fields of computer vision medical imaging and visual perception
