L. Adair, 1872

Annals of Bee Culture for 1869-72 ,1872 The Life of the Bee Maurice Maeterlinck, 1901 In this exuberantly poetic work that is less about bees and more about life Maurice Maeterlinck expresses his philosophy of the human condition An enthusiastic and expert beekeeper Maeterlinck did not intend to write a scientific treatise even though he provides details on bee topics This fascinating study is a magnificent tribute to one of the most orderly communities in the world It is also filled with humble lessons for the human race **The Life of the Bee** Maurice Maeterlinck, 2015-12-31 1 IT is not my intention to write a treatise on apiculture or on practical bee keeping Excellent works of the kind abound in all civilised countries and it were useless to attempt another France has those of Dadant Georges de Layens and Bonnier Bertrand Hamet Weber Clement the Abbe Collin etc English speaking countries have Langstroth Bevan Cook Cheshire Cowan Root etc Germany has Dzierzon Van Berlespoch Pollmann Vogel and many others Nor is this book to be a scientific monograph on *Apis Mellifica Ligustica Fasciata Dorsata* etc or a collection of new observations and studies I shall say scarcely anything that those will not know who are somewhat familiar with bees The notes and experiments I have made during my twenty years of beekeeping I shall reserve for a more technical work for their interest is necessarily of a special and limited nature and I am anxious not to overburden this essay I wish to speak of the bees very simply as one speaks of a subject one knows and loves to those who know it not I do not intend to adorn the truth or merit the just reproach Reaumur addressed to his predecessors in the study of our honey flies whom he accused of substituting for the marvellous reality marvels that were imaginary and merely plausible The fact that the hive contains so much that is wonderful does not warrant our seeking to add to its wonders Besides I myself

have now for a long time ceased to look for anything more beautiful in this world or more interesting than the truth or at least than the effort one is able to make towards the truth I shall state nothing therefore that I have not verified myself or that is not so fully accepted in the text books as to render further verification superfluous My facts shall be as accurate as though they appeared in a practical manual or scientific monograph but I shall relate them in a somewhat livelier fashion than such works would allow shall group them more harmoniously together and blend them with freer and more mature reflections The reader of this book will not learn therefrom how to manage a hive but he will know more or less all that can with any certainty be known of the curious profound and intimate side of its inhabitants Nor will this be at the cost of what still remains to be learned I shall pass over in silence the hoary traditions that in the country and many a book still constitute the legend of the hive Whenever there be doubt disagreement hypothesis when I arrive at the unknown I shall declare it loyally you will find that we often shall halt before the unknown Beyond the appreciable facts of their life we know but little of the bees And the closer our acquaintance becomes the nearer is our ignorance brought to us of the depths of their real existence but such ignorance is better than the other kind which is unconscious and satisfied *British Bee Journal* ,1912

Wisconsin Beekeeping ,1924
