On Becoming A Professional Geographer:

On Becoming a Professional Geographer Martin S. Kenzer, 1989-01-01 **On Becoming a Professional Geographer** Martin S. Kenzer, 1989 Academic Writing for Geographers James A. Tyner, 2023-08-21 There are many how to books on writing for academics none of these however relate specifically to the discipline of geography In this book the author identifies the principle modes of academic writing that graduate students and early career faculty will encounter specifically focusing on those forms expected of geographers that is those modes that are reviewed by academic peers This book is readily accessible to senior undergraduate and graduate students and early career faculty who may feel intimidated by the process of writing This volume is not strictly a how to or step by step manual for writing an article or book rather through the use of real concrete examples from published and unpublished works the author demystifies the process of different types of scholarly pieces geographers have to write with the specific needs and challenges of the discipline in mind Although chapters are thematic based e g stand alone chapters on book reviews articles and books the manuscript is structured around the concept of story telling for it is the author's contention that all writing whether a scientific study or more humanist essay is a form of story telling Applied Geography: Issues, Questions, and Concerns M.S. Kenzer, 2013-11-11 The completion of this collection took many months and for a variety of reasons required the assistance and indulgence of a number of individuals First and foremost I would like to thank Tim Hudson for his useful input and support at the outset of the project Likewise I would like to thank Jesse O McKee for providing a hospitable environment during my affiliation with the University of Southern Mississippi At Louisiana State University I am grateful to Sam Hilliard and Carville Earle for their invaluable understanding The book became part of the GeoJournal Library as a result of Wolf Tietze's confidence in the topic and because of Henri G van Dorssen's and Kluwer Academic Publishers' good nature despite numerous problems Curtis C Roseman and the remainder of the Geography Department at the University of Southern California where I completed many last minute details for the volume are to be thanked for the cordial and warm environment I received while a visitor in Los Angeles Finally no multi authored collection reaches completion without the help of many patient contributors This particular book suffered many setbacks along the way so I am particularly grateful to the authors herein They demonstrated their compassion and exceptional professionalism throughout by never second guessing my decisions and by allowing me to remedy the setbacks in my own way They were a pleasure to work with and they should take pride in their achievements The Work in the World Michael R. Curry, 1996 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible to scholars students researchers and general readers Rich with historical and cultural value these works are published unaltered from the original University of Minnesota Press editions The books offered through Minnesota Archive Editions are produced in limited quantities according to customer demand and are available through select distribution partners *Leadership in American Academic Geography* Michael S.

DeVivo, 2014-11-14 *Leadership in American Academic Geography The Twentieth Century* examines the practice of leadership in the most influential geography departments in the United States Throughout the twentieth century transformational leaders often emerged as inspirational department chairs shaping the content and nature of the discipline and establishing models of leadership often fueling the success of programs and sparking shifts in paradigms Yet on occasion departmental chairmanships fell to individuals marked by laissez faire attributes lapses in integrity or autocratic behaviors which at times led to disaster Effective leaders within key academic departments played imperative roles in the discipline's prosperity and in contrast mediocrity in leadership contributed to periods of austerity Michael S DeVivo aims to offer not only a historical perspective on the geographic discipline but also insight to leaders in geography today and in the future so that they might be able to avoid failure and instead develop strategies for success by recognizing effective leadership behaviors that foster high levels of achievement

Research Design and Proposal Writing in Spatial Science Jay D. Gatrell, Gregory D.

Bierly, Ryan R. Jensen, 2011-11-25 The complex interactions between human and physical systems confronting social scientists and policymakers pose unique conceptual methodological and practical complications when doing research Graduate students in a broad range of related fields need to learn how to tackle the discipline specific issues of space place and scale as they propose and perform research in the spatial sciences This practical textbook and overview blends plenty of concrete examples of spatial research and case studies to familiarize readers with the research process as it demystifies and exemplifies how to really do it The appendix contains both completed and in progress proposals for MA and PhD theses and dissertations Emphasizing research as a learning and experiential process while providing students with the encouragement and skills needed for success in proposal writing *Research Design and Proposal Writing in Spatial Science* can serve as a textbook for graduate level research design courses as well as for undergraduate level project based spatial science courses

unconscious and subliminal text of maps Shared by all these map makers are themes of social justice and making maps work for the betterment of humanity

Approaches to Human Geography Stuart C. Aitken, Gill Valentine, 2014-12-01 The book covers some of the traditionally most obtuse and difficult to grasp philosophical ideas that have influenced geographers geography The fact that these are presented in an inclusive and accessible manner is a key strength Many students have commented that the chapters they have read have encouraged them to read more in this field which is fantastic from a lecturer's perspective Richard White Sheffield Hallam University A new edition of the classic Approaches text for students organised in three sections which overviews and explains the history and philosophy of Human Geographies in all its applications by those who practise it Section One Philosophies Positivist Geography Humanism Feminist Geographies Marxisms Structuration Theory Human Animal Realism Postmodern Geographies Poststructuralist Theories Actor Network Theory Postcolonialism Geohumanities Technologies Section Two People Institutions and Cultures Places and Contexts Memories and Desires Understanding Place Personal and Political Becoming a Geographer Movement and Encounter Spaces and Flows Places as Thoughts Section Three Practices Mapping and Geovisualization Quantification Evidence and Positivism Geographic Information Systems Humanism Activism Feminist Geographies Poststructuralist Theories Psychoanalysis Environmental Inquiry Contested Geographies and Culture Wars Fully updated throughout and with eight brand new chapters this is the core text for modules on history theory and practice in Human Geography

Mapping Worlds Rob Kitchin, 2013-09-13 Social and cultural geography is practised by geographers from around the world However for various reasons including language and publishing traditions knowledge of the research being undertaken can often remain confined to those working within those countries This book draws together for the first time into one volume reports of social and cultural geography undertaken in several countries from around the world It provides an important overview of geographic ideas and traditions and the history of human geography more generally allowing comparison between countries and details of key studies and references As such the book will be of interest to geographers schooled in different national traditions and those interested in the production and history of geographic knowledge Entries are written in both English and the country's own national language
