*On being different: Exploring the relationship between dissimilarity and social inclusion in the workplace* Onur Sahin, 2024-09-06 In this dissertation I investigate how being different from the majority of one's colleagues shapes social inclusion perceptions at work In Chapter 1 I introduce the relational demography approach and ingroup projection model as the frameworks of my dissertation and summarize the methods findings and broader implications of the empirical chapters that follow In these chapters I utilize a multi method approach consisting of desk research experimental studies and large scale correlational studies to offer six significant contributions to the literature First in Chapter 2 an analysis of diversity statements of 84 Dutch private and public organizations showed that most statements include both surface level readily visible such as gender and ethnicity and deep level dimensions more underlying such as personality and sexual orientation However surface level dimensions were more often included without clear differences between statements of private and public organizations Second in Chapter 3 experimental studies N 128 in Study 1 N 196 in Study 2 recruited via Prolific established the causal relationship between dissimilarity and social inclusion Third in Chapter 4 a survey study with 887 employees of a public organization in the Netherlands revealed that deep level dissimilarity rather than surface level dissimilarity related to social inclusion and that inclusion explained the relationships between dissimilarity and work related outcomes Fourth in Chapter 5 a survey study with 6 312 employees of another Dutch public organization accounted for multidimensionality and revealed that as employees perceived dissimilarity on more dimensions they perceived less inclusion Furthermore the results showed that dissimilarity in personality ethnicity cultural background age level of education work experience and disability negatively related to perceptions of inclusion offering a more nuanced understanding of the dissimilarity inclusion relationship Fifth a review of the relational demography literature in Chapter 6 identified four general mechanisms theorized to explain why dissimilarity relates to outcomes 1 uncertainty 2 trust 3 disapproval and 4 initiated interaction between colleagues A survey study with 2 409 UK residents recruited via Prolific confirmed that all four mechanisms uniquely explained the dissimilarity inclusion relationship Sixth and finally I found support for the indispensable role of the organizational climate for inclusion across Chapters 4 5 and 6 In these chapters a positive climate for inclusion buffered the negative relationships between dissimilarity and outcomes My research argues for a broader consideration of dissimilarity dimensions beyond the dimensions diversity policies typically focus on emphasizing the importance of recognizing multidimensionality and the crucial contextual role of climate for inclusion This dissertation not only enriches our understanding of workplace diversity but also offers actionable opportunities to mitigate social inclusion disparities

*Bullying Scars* Ellen Walser deLara, 2016-05-02

An explosion of research on bullying has raised our collective awareness of the serious impacts it can have on children No longer do we accept it as an innocuous rite of passage just a part of growing up that we grin and bear and grow out of later But do we grow out of it or are there lingering effects that last well beyond the school playgrounds and lunchrooms Is bullying traumatic and if so does it last into adult life Are there life long consequences or are the effects pretty much shed as people grow Are some of us more resilient than others Are there any positive or unexpected outcomes as a result of being bullied or having been a bully as a child In an effort to answer these questions *Bullying Scars* describes childhood bullying from the vantage point of those victims bullies and bystanders who are now adults the book discusses how lives have been changed and explores the range of reactions adults exhibit The research gathered for this book through interviews with over 800 people points out that even adult decision making is often altered by the victimization they experience as children at the hands of peers siblings parents or educators Written in an engaging and accessible style that draws heavily from the rich interview data that deLara has collected this book will be of interest to anyone struggling with the lingering effects of being bullied Additionally it is highly relevant to mental health professionals counselors therapists social workers clinical psychologists working with clients who are dealing with these issues

*Why Software Sucks-- and what You Can Do about it*

David S. Platt, 2007 I've just finished reading the best computer book *Why Software Sucks* since I last re read one of mine and I wanted to pass along the good word Put this one on your must have list if you have software love software hate programmers or even ARE a programmer because Mr Platt who teaches programming has set out to puncture the bloated egos of all those who think that just because they can write a program they can make it easy to use This book is funny but it is also an important wake up call for software companies that want to reduce the size of their customer support bills If you were ever stuck for an answer to the question Why do good programmers make such awful software this book holds the answer John McCormick Locksmith columnist TechRepublic com I must say first I don't get many computing manuscripts that make me laugh out loud Between the laughs Dave Platt delivers some very interesting insight and perspective all in a lucid and engaging style I don't get much of that either Henry Leitner assistant dean for information technology and senior lecturer on computer science Harvard University A riotous book for all of us downtrodden computer users written in language that we understand Stacy Baratelli author's barber David's unique take on the problems that bedevil software

creation made me think about the process in new ways If you care about the quality of the software you create or use read this book Dave Chappell principal Chappell Associates I began to read it in my office but stopped before I reached the bottom of the first page I couldn't keep a grin off my face I'll enjoy it after I go back home and find a safe place to read Tsukasa Makino IT manager David explains in terms that my mother in law can understand why the software we use today can be so frustrating even dangerous at times and gives us some real ideas on what we can do about it Jim Brosseau Clarrus Consulting Group Inc A Book for Anyone Who Uses a Computer Today and Just Wants to Scream Today's software sucks There's no other good way to say it It's unsafe allowing criminal programs to creep through the Internet wires into our very bedrooms It's unreliable crashing when we need it most wiping out hours or days of work with no way to get it back And it's hard to use requiring large amounts of head banging to figure out the simplest operations It's no secret that software sucks You know that from personal experience whether you use computers for work or personal tasks In this book programming insider David Platt explains why that's the case and more importantly why it doesn't have to be that way And he explains it in plain jargon free English that's a joy to read using real world examples with which you're already familiar In the end he suggests what you as a typical user without a technical background can do about this sad state of our software how you as an informed consumer don't have to take the abuse that bad software dishes out As you might expect from the book's title Dave's expose is laced with humor sometimes outrageous but always dead on You'll laugh out loud as you recall incidents with your own software that made you cry You'll slap your thigh with the same hand that so often pounded your computer desk and wished it was a bad programmer's face But Dave hasn't written this book just for laughs He's written it to give long overdue voice to your own discovery that software does indeed suck but it shouldn't
