Rethinking Clinical Trials and Redefining Responsibility for Research Participants Ike Iyioke, 2023-11-25 This is a new treatment of clinical research ethics in an African context and an indispensable resource for researchers students policy makers and research institutions interested in African research ethics In re appraising the African philosophical notion of selfhood it argues for the need to re conceptualize responsibility in clinical trials pushing researchers to go beyond autonomy based considerations based on the individual only and to develop clinical trials that appropriately embed research subjects within their community and their environment The African standpoint stresses communalism and communitarianism As such responsibility for and by the individual can only make sense through the community in which the individual is rooted The book emphasizes the African viewpoint by making explicit the importance of the self in the re contextualized arena of the community It forces research ethicists to go beyond autonomy based considerations for the individual only and to appropriately embed research subjects within their community and their environment *A New Handbook of Christian Theologians* Donald W. Musser, 1996-09-01 In recent years the flow of Christian theology has been channeled in diverse streams represented by such trends and movements as black theology liberation theology feminist theology and womanist theology To survey this abundance and diversity of current Christian theology this book examines the theologies of representative theologians Particularly to help students navigate the sea of information the editors have identified various routes for reading and have traced several threads or issues common to many of the essays thus demarcating such recurrent concerns as the ways in which the theologians consider the sources and goals for theology their variant assumptions and conclusions about the nature of God their divergent approaches to understanding the person and purpose of the Christ and their distinct expectations for the destiny of history and faith **Human Dignity, Human Rights, and Social Justice**

New Testament Micro-Ethics Raymond Kemp Anderson, 2018-10-09 Anderson shows how Early Christians faith took root in a multicultural world just as diverse and conflicted as our own Their basic attitude turns out to have been one of astounding freedom not a cultus of rules but a matter of whole hearted response for they lived in conversation with the One whose love for all his wayward creatures is utterly tenacious We find ourselves continually surprised by an insistent grace that treasures all persons equally while exposing and deposing our evil Such faith still evokes basic confidence and we find ourselves ever again moved by gratitude and trusting each others Christ emboldened freedom If we are embraced by grace our becoming great again can only mean unlimited concern for all and free flowing interactive service The playful work ethic that ensues holds promise for our politically splintered post industrial age The New Testament's seed like ethical genotype still unfolds into a secure all embracing and mutually supportive sabbatic life stance What could be more relevant for our future in conflicted times

Communication, Public Discourse, and Road Safety Campaigns Nurit Guttman, 2014-06-05 This book discusses the use of communication campaigns to promote road safety arguing that they need to elicit public discourse on issues pertaining to culture equity gender workplace norms environmental issues and social solidarity Increasingly new media channels and formats are employed in the dissemination process making road safety related messages ubiquitous and often controversial Policy makers educators researchers and the public continue to debate the utility and morality of some of

the influence tactics employed in these messages such as the use of graphic images of injury or death stigmatization or blame and shame and the use of black humor Guttman argues that influencing road safety requires making changes in normative and cultural conceptions of broader issues in society yet the typical discourse on road safety tends to focus on individual attitudes and practices The book highlights the importance of social and behavioral theory in communication campaigns on road safety and critiques the tendency to focus on individual cognition affect and risk conceptions rather than on normative structural and cultural factors The volume positions the discourse on road safety as a social issue and treats road safety behavior as a social activity that directly relates to other public issues social values and social policy while discussing potential uses of social media and participatory approaches The discussion turns to the role of road safety communication campaigns as part of a democratic process of eliciting public discourse including how contemporary society could address broader issues of risk and safety

Mawhinney,2020-11-20 This book is primarily for a general audience of persons of good will regardless of faith or non faith as well as for professionals who counsel others on the issues discussed Written in a simple straightforward language it is meant to help people dialogue on acrimoniously divisive issues that divide and undermine our nation such as abortion family planning contraception in vitro fertilization IVF and LGBTQ issues through respectful dialogue in public forums small or large by searching for mediating middle ground compromises just as trade and peace negotiators do No one in the dialogue may be satisfied with the concessions they have to make but they can at least live with them until better solutions are found Those

engaging in such dialogue must be open to understanding where others are coming from and be respectful of the good faith consciences of others and avoiding passing laws that would the consciences of others Engineers for Change Matthew Wisnioski, 2012-10-19 An account of conflicts within engineering in the 1960s that helped shape our dominant contemporary understanding of technological change as the driver of history In the late 1960s an eclectic group of engineers joined the antiwar and civil rights activists of the time in agitating for change The engineers were fighting to remake their profession challenging their fellow engineers to embrace a more humane vision of technology In Engineers for Change Matthew Wisnioski offers an account of this conflict within engineering linking it to deep seated assumptions about technology and American life The postwar period in America saw a near utopian belief in technology s beneficence Beginning in the mid 1960s however society influenced by the antitechnology writings of such thinkers as Jacques Ellul and Lewis Mumford began to view technology in a more negative light Engineers themselves were seen as conformist organization men propping up the military industrial complex A dissident minority of engineers offered critiques of their profession that appropriated concepts from technology s critics These dissidents were criticized in turn by conservatives who regarded them as countercultural Luddites And yet as Wisnioski shows the radical minority spurred the professional elite to promote a new understanding of technology as a rapidly accelerating force that our institutions are ill equipped to handle The negative consequences of technology spring from its very nature and not from engineering s failures Sociotechnologists were recruited to help society adjust to its technology Wisnioski argues that in responding to the challenges posed by critics within their profession engineers in the 1960s helped shape our dominant contemporary understanding of technological change as the driver of history *Selected Papers* American Society of Christian Ethics, Franklin Sherman, 1975 Living Into Community Christine D. Pohl, 2011-12-20 Every Christian should read this provocative book Christine thoroughly delineates the interlocking relationships and dangerous deformities of practices that could deepen our communities but often destroy them This volume is pertinent to our families churches even places of work Marva J Dawn author of *Truly the Community*

God's Patience and our Work Ben Fulford, 2024-02-28 In *God's Patience and our Work* Ben Fulford argues that Hans Frei's theology and ethics offers unheralded but valuable resources for thinking about the social and political engagement of Christian communities in pluralistic societies in light of hope in Jesus Christ He shows how Frei's project of recovering the conditions for and shape of a generous orthodoxy runs through his work offering broad flexible vision of Christian identity ethical responsibility and humanistic witness focused in the person and presence of Jesus Christ In dialogue with liberation theologies Fulford draws from Frei an account of divine patience and providence to frame hopeful pragmatic Christian participation in work for dignity justice and penultimate reconciliation rooted in new and deeper contextual reading of his work
