On Being With Others Heidegger Wittgenstein Derrida:

On Being With Others Simon Glendinning, 2006-12-05 *On Being With Others* is an outstanding exploration of this key philosophical question Simon Glendinning shows how traditional positions in the philosophy of mind can do little to rebuff the accusation that in fact we have little claim to have knowledge of minds other than our own *On Being With Others* sets out to refute this charge and disentangle many of the confusions in contemporary philosophy of mind and language that have led to such scepticism Simon Glendinning explores why early attempts by J L Austin and Martin Heidegger to refute scepticism about other minds failed and argues that we must turn to Wittgenstein in order to build a solid theory of other minds Drawing on the celebrated debate between John Searle and Jacques Derrida Simon Glendinning establishes fascinating and important links between controversies in the philosophy of mind language and epistemology **On Being with Others**

Simon Glendinning, 1998 *On Being With Others* is an outstanding and compelling uncovering of one of the key questions in philosophy how can we claim to have knowledge of minds other than our own *Derrida: A Very Short Introduction* Simon Glendinning, 2011-08-25 Simon Glendinning explores both the difficulty and significance of the work of Derrida arguing that his challenging ideas make a significant contribution to philosophy P 2 of cover **Heidegger's Metaphysical Abyss**

Elizabeth Cykowski, 2021-02-04 Heidegger presented reflections on animality most extensively in his 1929/30 lecture course *The Fundamental Concepts of Metaphysics* In these lectures Heidegger poses two provocative metaphysical theses The human he claims is world forming in contrast the animal is poor in world Contemporary secondary literature has emphatically criticised these theses on account of the objection that they forge an abyss of essence between human and nonhuman organisms The theses undermine scientific developments by breaking apart the biological continuum in order to secure the human within in its own unique category all the while leaving the world poor animal on the other side of the abyss Heidegger thus reinstates an outmoded dualism that he ought on his own terms to renounce human versus animal Heidegger's *Metaphysical Abyss* undertakes a close examination of the lecture course in order to clarify the true meaning scope and significance of Heidegger's theses Drawing on other places within Heidegger's writings where the theme of animality features Cykowski demonstrates that Heidegger's examination of animality points beyond received dualisms back to a more essential way of philosophising about life and the human's relationship to it Heidegger thus intended to examine and illuminate rather than simply to repeat the orthodox metaphysical hierarchies that we have inherited and his exploration of animality raises deep questions about the status of the human within nature that continue to be important today

Heidegger's Eschatology Judith Wolfe, 2013-07-25 Heidegger's *Eschatology* is a ground breaking account of Heidegger's early engagement with theology from his beginnings as an anti Modernist Catholic to his turn towards an undogmatic Protestantism and finally to a resolutely a theistic philosophical method The book centres on Heidegger's developing commitment to an eschatological vision derived from theological sources but reshaped into a central resource for the

development of an atheistic phenomenological account of human existence This vision originated in Heidegger's attempt in the late 1910s to formulate a phenomenology of religious life that would take seriously the inherent temporality of human existence In this endeavour Heidegger turned to two trends in Protestant scholarship the discovery of eschatology as a central preoccupation of the Early Church by A Schweitzer and the History of Doctrine School and the existential eschatology of Karl Barth and Eduard Thurneysen indebted to Kierkegaard Dostoevsky and Franz Overbeck His synthesis of such trends within a phenomenological framework elaborated primarily via readings of Paul and Augustine in his lecture courses of 1921-2 led Heidegger to postulate an existential sense of eschatological unrest as the central characteristic of authentic Christian existence His description of this expectant restlessness however was now inescapably at odds with its Christian sources since Heidegger's commitment to a phenomenological description of the human situation led him to abstract the existential experience of expectation from its traditional object the blessed hope for the Kingdom of God Christian hope thus for Heidegger no longer constitutes but rather negates eschatological unrest because such hope projects an end to that unrest and thus to authentic existence itself Against the Christian vision Heidegger therefore develops a systematic eschatology without eschaton paradigmatically expressed as being unto death Judith Wolfe tells the story of his re-conception of eschatology using a wealth of primary and newly available original language sources and offering in depth analysis of Heidegger's relationship to theological tradition and the theology of his time

Feeling Together and Caring with One Another Héctor Andrés Sánchez Guerrero, 2016-07-07 This book examines the human ability to participate in moments of joint feeling It presents an answer to the question concerning the nature of our faculty to share in what might be called episodes of collective affective intentionality The proposal develops the claim that our capacity to participate in such episodes is grounded in an ability central to our human condition our capacity to care with one another about certain things The author provides a phenomenologically adequate account of collective affective intentionality that takes seriously the idea that feelings are at the core of our emotional relation to the world He details a form of group emotional orientation that relies on the fact that the participating individuals have come to share a number of concerns Readers will learn that at the heart of a collective affective intentional episode one does not merely find a set of shared concerns but also a particular mode of caring In the end the argument presented in this monograph makes plausible the idea that the emotions through which humans participate in moments of affective intentional community express our nature In addition it shows that the debate on collective affective intentionality also permits us to better understand the relationship between two conflicting philosophical pictures of ourselves the idea that we are essentially social beings and the claim that we are creatures for whom our personal existence is an issue Thus aiming at an elucidation of the nature of our ability to feel together the book offers a detailed account of what it is to situationally express our human nature by caring about something in a properly joint manner

Derrida's Legacies Simon Glendinning, Robert Eaglestone, 2008-01-22 This volume brings together some of the most well

known and highly respected commentators on the work of Jacques Derrida from Britain and America in a series of essays written to commemorate the life and come to terms with the death of one of the most important intellectual presences of our time Derrida's thought reached into nearly every corner of contemporary intellectual culture and the difference he has made is incalculable He was indeed controversial but the astonishing originality of his work always marked by the care precision and respect with which he read the work of others leaves us with a philosophical ethical and political legacy that will be both lasting and decisive The sometimes personal always insightful essays reflect on the multiple ways in which Derrida's work has marked intellectual culture in general and the literary and philosophical culture of Britain and America in particular The outstanding contributors offer an interdisciplinary view investigating areas such as deconstruction ethics time irony technology location and truth This book provides a rich and faithful context for thinking about the significance of Derrida's own work as an event that arrived and perhaps still remains to arrive in our time Contributors Derek Attridge Thomas Baldwin Geoffrey Bennington Rachel Bowlby Alex Callinicos David E Cooper Simon Critchley Robert Eaglestone Simon Glendinning Marian Hobson Christopher Johnson Peggy Kamuf Michael Naas Nicholas Royle *Heidegger's Metaphysical Abyss* Beth Cykowski, Elizabeth Cykowski, 2021 Beth Cykowski offers a fresh reading of Heidegger's discussions of animality arguing that they point beyond received dualisms back to a more essential way of philosophising about life and the relationship to it of the human His exploration of animality raises deep questions about the status of the human within nature

does philosophy relate to science to politics to literature What methods does the modern philosopher use and how does philosophy progress Does philosophy differ from place to place What can philosophy do for us And what can it not do This book with contributions from such exciting and influential contemporary philosophers as Simon Blackburn Michael Friedman Simon Critchley and Manuel DeLanda offers us a fascinating picture of the character and methods of philosophy its possibilities and its limitations And of course it is itself a piece of philosophy in action not merely offering us answers but also prompting us to ask further questions and to philosophise for ourselves
