Beyond Creation's End Nicholas P W Coe, 2014-07-28. Fifty thousand years in the future, the universe begins to collapse prematurely. Despite having advanced technology, the only viable options to survive the end of the universe come down to creating a Dyson Sphere enclosed in shielding that would resist the collapsing forces during the progression towards singularity and investigating a mysterious object that has been sighted two billion light years away towards the edge of the universe. Because of its bizarre nature, this enigmatic vessel is rumored to have come from a prior universe. While the Dyson is being built and populated, Mila and Thorne are sent on what is considered a long shot expedition to see if the rumors are true. If this strange object is really from a prior universe, could it guide them to the next? On a planet where the infrastructure is failing, Strider and his mysterious telepathic companion, known only as The Sylk, struggle to survive in the hope of finding answers to questions they can barely even understand yet. As all these paths converge, can humanity forge a path beyond the end of this universe, can they find a way forward to a new future?

Terminal evaluation of the areas beyond national jurisdiction (ABNJ) Deep-Sea project, part of the "Sustainable fisheries management and biodiversity conservation of deep-sea living marine resources and ecosystems in ABNJ" Food and Agriculture Organization of the United Nations, 2020-10-06. The marine areas beyond national jurisdiction (ABNJ) comprises 40 percent of the earth's surface; it covers 64 percent of the surface of the ocean and 95 percent of its volume. The Common Oceans ABNJ Program 2014-2019 was implemented by FAO as a concerted effort to bring various stakeholders to work together to manage and conserve the world's common oceans. The ABNJ Deep Sea project, one component of the Common Oceans ABNJ Program, was of great assistance to newly formed regional fisheries management organizations and arrangements (RFMOs) as well as some long-standing regional fisheries. The project showed positive results in safeguarding vulnerable marine ecosystems, strengthening monitoring, control, and surveillance to combat illegal, unreported, and unregulated fishing, mitigating bycatch mortality trends, and building awareness of cross-sectoral aspects in effective governance of ABNJ. Through its cooperation with RFMOs, the

project has to some extent contributed to minimize the negative impacts of bycatch Results achieved should be capitalized on and upscaled in a second phase Beyond the Light Horizon Ken MacLeod,2024-06-25 MacLeod s final book in the Lightspeed trilogy is nothing short of celestial AI Fairness and Beyond Chris Reed,2024-08-08 This book proposes a regulatory system for ensuring that AI makes fair decisions No one wants to be the subject of an unfair decision made by an AI and fairness is so important to society that we are likely to want to regulate to demand it But how This book attempts to answer that question The aim of regulation must be for an AI s decisions to match the human conception of fairness To understand what that is the book proposes a holistic understanding of fairness which tells us what regulation must try to achieve However regulation is not an abstract activity it regulates how humans behave and the humans in question are those who develop and use AI for decision making Thus the book investigates how those humans are attempting to achieve AI fairness It finds that there is a serious mismatch between how technologists conceptualise fairness compared to other humans How can AI regulation bridge this gap Traditional models of regulation cannot solve this problem Fairness is too nuanced too contextual and is ultimately a human emotional response Instead the book proposes to place the responsibility on the AI community to explain and justify their efforts to achieve fairness basing regulatory and legal responses on how well that explanation deals with the risks that particular AI presents and whether the AI operates in accordance with the explanation in use The book concludes by examining how far this regulatory model might be useful for some of the other social problems which AI generates An original and significant contribution to the literature on AI regulation this book is a must read for those working in the areas of law regulation and technology
