The Political Theories of Risk Analysis Nicholas P. Guehlstorf, 2012-11-03 The purpose of this study is to question whether liberal political theories ought to inform the way policymakers and administrators analyze risk in proposed courses of environmental practice In order to explore the relationship of liberal theory to rational practice in environmental policy this project examines the risk analysis used to approve the genetically engineered bovine growth hormone in American agricultural policy The Political Theories of Risk Analysis suggests that American environmental public policy is attempting to assess danger with an incomplete notion of utility to eliminate the hazards of society with an inadequate contractual justification of political authority and to publicly debate accepted levels of risk with an unfulfilled critical social theory Because environmental risk analyses are incorrectly perceived as technically rational and socially apolitical they result in practices that are muddled and misdirected Making theoretical foundations explicit however could lead to improved practice Public policy and administrative decisions regarding agricultural biotechnologies should and can function with more concern for democratic values The Political Theories of Risk Analysis is for environmental scientists philosophers public policy planners applied ethicists political scientists and environmentalists

The Politics of Human Nature Thomas Fleming, 1988-01-01 The effort to understand human nature in a political context is a daunting challenge that has been undertaken in a variety of ways and by a myriad of disciplines through the ages From Plato to Hobbes and Burke to Wallas and Oakeschott in our era efforts have been made to provide

some organic framework for the political study of mankind What has added greatly to the complexity of the task is the increasing denial even rejection in the positivist and behaviorist traditions of the very notion of a human nature The work can be described as a series of interlocking propositions the proverbial view of human nature can be explained by evolutionary theory Biological differences between men and women are responsible for family community and group life Social evolution goes through stages which are recapitulated in the moral life of individuals A well defined federal system mirrors human development And finally for Fleming most problems in social and political life stem from violations of this federalist system Fleming s volume takes up a variety of issues sex and gender differences democracy and dictatorship individual and familial patterns of association He does so in the context of showing how forms of legitimate authority such as families communities and nations establish such authority by appeals to human nature and that these appeals while presumably resting on empirical evidence also confirm the existence of normative structures Fleming s work is an effort of synthesis that is sure to arouse discussion and debate It represents a serious addition to a literature retrieved from the historical dustbins to which it has been repeatedly consigned

The Supreme Court against the Criminal Jury John A. Murley, Sean D. Sutton, 2014-06-12

The Supreme Court against the Criminal Jury Social Science and the Palladium of Liberty is an analysis of the United States Supreme Court decisions in what has come to be called the jury size and jury decision rule cases In *Williams v Florida* 1970 and *Ballew v Georgia* 1978 a majority of the Supreme Court looked to history empirical studies and functional analysis to support its claim that there was no discernible difference between the verdicts of juries of six and juries of twelve In the process the Court also decided that the number twelve was an historical accident and that the twelve member jury was not an essential ingredient of trial by jury Two years later the Court following essentially the same line of reasoning used in *Williams* decided in the companion cases *Apodaca v Oregon* 1972 and *Johnson v Louisiana* 1972 that defendants were as well served with juries that reached verdicts by a majority vote of 11 1 10 2 and 9 3 as they were with unanimous jury verdicts In these cases the Supreme Court rejected the centuries old common law view that the unanimous jury verdict was an essential element of trial by jury With these four decisions the criminal jury as it had been known for more than six hundred years under the common law and the Constitution was in principle abandoned We critique these decisions from the perspective of unreliable jury studies and the impact of these decision on jury nullification
