On Defining The Proper Name:

Making Sense of the Divine Name in the Book of Exodus Austin Surls, 2017-05-08 The obvious riddles and difficulties in Exod 3 13 15 and Exod 6 2 8 have attracted an overwhelming amount of attention and comment These texts make important theological statements about the divine name YHWH and the contours of the divine character From the enigmatic statements in Exod 3 13 15 most scholars reconstruct the original form of the name as Yahweh which is thought to describe YHWH s creative power or self existence Similarly Exod 6 3 has become a classic proof text for the Documentary Hypothesis and an indication of different aspects of God s character as shown in history Despite their seeming importance for defining the divine name these texts are ancillary to and preparatory for the true revelation of the divine name in the book of Exodus This book attempts to move beyond atomistic readings of individual texts and etymological studies of the divine name toward a holistic reading of the book of Exodus Surls centers his argument around in depth analyses of Exod 3 13 15 6 2 8 and Exod 33 12 23 and 34 5 8 Consequently the definitive proclamation of YHWH s character is not given at the burning bush but in response to Moses later intercession Exod 33 12 23 YHWH proclaimed his name in a formulaic manner that Israel could appropriate Exod 34 6 7 and the Hebrew Bible quotes or alludes to this text in many genres This demonstrates the centrality of Exod 34 6 7 to Old Testament Theology The character of God cannot be discerned from an etymological analysis of the word yhwh but from a close study of YHWH s deliberate ascriptions made progressively in the book of Exodus

Basil of Caesarea's Anti-Eunomian Theory of Names Mark DelCogliano, 2010-07-12 Basil of Caesarea s debate with Eunomius of Cyzicus in the early 360s marks a turning point in the fourth century Trinitarian controversies It shifted focus to methodological and epistemological disputes underlying theological differences This monograph explores one of these fundamental points of contention the proper theory of names It offers a revisionist interpretation of Eunomius s theory as a corrective to previous approaches contesting the widespread assumption that it is indebted to Platonist sources and showing that it was developed by drawing upon proximate Christian sources While Eunomius held that names uniquely predicated of God communicated the divine essence in response Basil developed a notionalist theory wherein all names signify primarily notions and secondarily properties not essence

Named Entities for Computational Linguistics Damien Nouvel, Maud Ehrmann, Sophie Rosset, 2016-01-07 One of the challenges brought on by the digital revolution of the recent decades is the mechanism by which information carried by texts can be extracted in order to access its contents The processing of named entities remains a very active area of research which plays a central role in natural language processing technologies and their applications Named entity recognition a tool used in information extraction tasks focuses on recognizing small pieces of information in order to extract information on a larger scale The authors use written text and examples in French and English to present the necessary elements for the readers to familiarize themselves with the main concepts related to named entities and to discover the problems associated with them as well as the methods available in practice for solving these

issues **The Limits of Logical Empiricism** Alfons Keupink, Sanford Shieh, 2006-03-30 Arthur Pap's work played an important role in the development of the analytic tradition. This role goes beyond the merely historical fact that Pap's views of dispositional and modal concepts were influential. As a sympathetic critic of logical empiricism, Pap like Quine saw a deep tension in logical empiricism at its very best in the work of Carnap. But Pap's critique of Carnap is quite different from Quine's and represents the discovery of limits beyond which empiricism cannot go where there lies nothing other than intuitive knowledge of logic itself. Pap's arguments for this intuitive knowledge anticipate Etchemendy's recent critique of the model theoretic account of logical consequence. Pap's work also anticipates prominent developments in the contemporary neo-Fregean philosophy of mathematics championed by Wright and Hale. Finally, Pap's major philosophical preoccupation, the concepts of necessity and possibility, provides distinctive solutions and perspectives on issues of contemporary concern in the metaphysics of modality. In particular, Pap's account of modality allows us to see the significance of Kripke's well-known arguments on necessity and apriority in a new light. *The Realistic Spirit* Cora Diamond, 1995-03-02 The realistic spirit, a non-metaphysical approach to philosophical thought concerned with the character of philosophy itself, informs all of the discussions in these essays by philosopher Cora Diamond. Diamond explains Wittgenstein's notoriously elusive later writings, explores the background to his thought in the work of Frege, and discusses ethics in a way that reflects his influence. Diamond's new reading of Wittgenstein challenges currently accepted interpretations and shows what it means to look without mythology at the coherence commitments and connections that are distinctive of the mind. A System Of Logic, Ratiocinative And Inductive Book 18Th Edition John Stuart Mill, 2023-12-01 The renowned British philosopher and political economist John Stuart Mill is credited with the authorship of a significant work entitled *A System of Logic Ratiocinative and Inductive*. The reader's curiosity is piqued, prompting them to persist in reading further as the protagonist exhibits a notable inclination for self gratification. Certain narratives might be characterized by their macabre and unconventional nature while others possess a subtle allure that gradually captivates the reader. This study provides a comprehensive analysis of the principles and approaches of logic aiming to build a systematic foundation for the processes of reasoning and induction. Within this seminal academic publication, Mill delves into the intricacies of logic, delving into the nuanced distinctions between deductive reasoning, also known as ratiocinative reasoning, and inductive reasoning. The rules governing both forms of inference are thoroughly delineated by the author, who also provides a systematic approach for generating sound arguments and performing empirical research. The significance of Mill's work lies in its substantial impact on the progression of the scientific method as it underscored the crucial role of empirical evidence and experimentation as integral elements in the derivation of conclusions. The author initiates a scholarly discussion concerning the canons of induction, which comprise the techniques of agreement, difference, and concomitant variation.

Defective Institutions Jacques Lezra, 2024-03-05 *Defective Institutions* overturns the basis of institutionalism. Faith in classic institutions, exposed as clamorously inadequate by the failure of governance under neoliberalism, does not result in greater democracy, greater horizontality, or more equitable living. Nor does trust in the standing of decisions, in the authority of antecedent cases, in the coherence, strength, continuity, or solidity of the institutions that frame and render legitimate these decisions, and the rules they buttress. To the contrary, the classically imagined institution and our faith in it lie at the heart of neoliberal unfreedom and racialized violence. Working at the point of contact and conflict between socialist and anarcho philosophical traditions, *Defective Institutions* offers an alternative which is also an alternative to the figures of governance associated with the liberal conception of the state: an aberrant republicanism comprised of defective institutions run through with the necessity of their abolition. Lezra's book moves from the primitive scenes of Western political institution—the city, the family, the university, the first person race—through recent work in the philosophy of translation, decolonial studies, abolitionism, Afropessimism, and its critiques, psychoanalysis, and musicology. To offer an original wedding of abolition and institution, Lezra brings together genealogies of contemporary institutionalism from Durkheim and Hauriou to Searle, post-Marxist accounts of the state, Balibar, Abensour, philosophical and anthropological anarchism, Wolff, Malabou, Graeber, Scott, critical legal theory, analyses of *Marbury v. Madison* as well as *Dobbs v. Jackson*, continental and analytic versions, and critiques of foundationalism, Heidegger, Lyotard, and Butler, Quine, Searle, and Fine, and political and sociological abolitionism, Lewis, O'Brien. At a time when some call for strengthening institutions and for

defending liberties ostensibly protected by such institutions and others long for the destruction of institutions that have long been oppressive. Lezra's book offers today's Left a new framework for confronting institutions' necessity and their necessary abolition.

A Modest Certainty Frank D. Schubert, 2012-10-04 The central problem of philosophy is the problem of certainty What does it mean to be sure Are there ideas beyond the possibility of error or refutation What does it mean for a notion to be incorrigible In this book Frank D Schubert squarely addresses the question of whether there is a single standard of certainty that can be applied to such disparate areas as logic mathematics politics religion familial tribal commitments and science Schubert proposes a common standard for assessing certainty the certainty of knowing one's own personal proper name as a standard that can establish common ground within each widely disparate area The result is a new philosophy in a grand manner and a powerful ethical proposal for our time
