9 pages | 2087 words

Emile Durkheim's "The Rules of Sociological Method" posits the existence of various 'social facts' which, according to him, should be the scope of all sociological study and discourse. Durkheim's discourse defines social facts as, ...a category of facts with very distinctive characteristics: it consists of ways of acting, thinking and feeling, external to the individual, and endowed with a power of coercion, by reason of which they control him. (Durkheim 3)

Thus the three main features of social facts are surfaced; as being external to the individual, emanating from a general and higher level than the individual and that these coerce or force an individual to act in accordance to them for the purpose of control. These facts, according to Durkheim, must be considered things, which he defines as realities that may be observed and classified. These things are posited to exist on the level of society, completely outside the realm of the individual and are used to control a person's thoughts, actions and feeling from being otherwise.

Should a person refuse to submit to this coercion, he would find himself the object of negative reactions ranging from ridicule, isolation or even concrete punishment or sanction. The implications of this definition initially cast sociology's field of study as all-encompassing, referring to all realities and processes of human life and behavior, thus Durkheim seeks to clarify and establish the meaning of the descriptor 'social' as opposed to other adjectives such as 'biological', 'psychological' and 'philosophical'.

Each individual drinks, sleeps, eats, reasons; and it is society's interest that these functions be exercised in an orderly manner. If then, all these facts are counted as "social" facts, sociology would have no subject matter exclusively its own, and its domain would be confused with biology and psychology. (Durkheim 1) As mentioned above, Durkheim perceives the social fact as the scope of sociological study, and uses other fields of study to show what sociology should underscore.

Biological facts and study deal with characteristics of the physical body of a person and are therefore not social, since the need to follow these facts (such as sleeping, eating and breathing) emanate from the physiological needs of an organism to survive. Psychological study deals with thought processes and phenomena that occur within an individual's consciousness. Durkheim posits that 'social' facts emanate not from one person's consciousness nor from a person's physiological needs, but from the level of society itself, "...

this term [social] fits them quite well, for it is clear that, since their source is not the individual, their substratum can be no other than society. " (Durkheim 3) Another implication of his definition is that social facts exist only with the presence of social institutions which enforce them and create them. For Durkheim, it is imperative to clarify that in most cases a social institution exists with the social fact, but it must not be thought that for a social fact to exist, a social institution must be present to have created it.

Rather, the reverse of the causation is in place....
