**Question 4: Are the following geologic events: volcanic eruptions, earthquakes, meteorite impacts, and storm deposits geologic events encompassed by uniformitarianism? Why?**

Yes, volcanic eruptions, earthquakes, meteorite impacts and storm deposits are encompassed by uniformitarianism. Uniformitarianism is the principle in which the processes we see happen now are still the same as they were in the past. These events are all accompanied by this process because the way that these events took place in the past is the same as they take place today; using this knowledge we can infer how these events took place in the past. It is important to know that this process also does not mean that these events take place in the same time duration as one another, but that they are all important no matter the time duration in shaping the earth. A lot of these events are also unobserved by the human eye and this does not take away from them being encompassed by uniformitarianism.

**Have You Discovered Your Assignment with Destiny?** Anthony Ugochukwu O. Aliche, 2012-07-27 The subject of destiny has attracted various explanations from diverse schools of thought While some believe in and espouse the philosophy of predestination others hold that man is the architect of his own destiny and still others fail to believe in the concept at all Even among those who believe in the concept of destiny there is lack of consensus about its definition and its workings given the critical nature of the subject of destiny There is a need for man to clearly understand and employ the knowledge in his journey from mortality to immortality In Have You Discovered Your Assignment with Destiny author Anthony Ugochukwu O. Aliche thoroughly examines the concept of destiny and seeks to guide others to an understanding of

how this important aspect of our existence functions The journey begins with Aliches lamentation of mans inability to acknowledge and define his destiny with particular reference to his assignment with himself his obligation with his environment and his assignment with the Creator and the entire cosmos He believes that life lived without discovering ones assignment with destiny is life lived without putting God firstand consequently a life tragically wasted He opens our eyes to the fact that so many lives could make a quantum leap if only they could turn to God and nature for the discovery and manifestation of their destiny The world would be a better place if we all discovered that we have a role to play individually and collectively and that we can only achieve if we strive to discover our assignment with destiny **Take Back Your**
