On Germanic Linguistics Irmengard Rauch, Gerald F. Carr, Robert L. Kyes, 1992 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by approaching language from an interdisciplinary perspective. TRENDS IN LINGUISTICS considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. The Age of German Idealism Kathleen Higgins, Robert C. Solomon, 2023-05-09 German Idealism was one of the most fertile and important movements in the history of Western philosophy. This volume includes eleven chapters on all aspects and the period's most influential philosophers including Kant and Hegel.

German Pop Literature Margaret McCarthy, 2015-04-24 Pop literature of the 1990s enjoyed bestselling success as well as an extensive and sometimes bluntly derogatory reception in the press. Since then, less censorious scholarship on pop has emerged to challenge its flash in the pan status by situating the genre within a longer history of aesthetic practices. This volume draws on recent work and its attempts to define the genre, locate historical antecedents and assess pop's ability to challenge the status quo. Significantly, it questions the official story of pop literature by looking beyond Ralf Dieter Brinkmann's works as origin to those of Jürgen Ploog, Jörg Fauser and Hadayatullah Hirsch. It also remedies the lack of attention to questions of gender in previous pop lit scholarship and demonstrates how the genre has evolved in the new millennium via expanded thematic concerns and new aesthetic approaches. Essays in the volume examine the writing of well known established pop authors such as Christian Kracht, Andreas Neumeister, Joachim Lottman, Benjamin Lebert, Florian Illies, Feridun Zaimoğlu and Sven Regener as well as more recent works by Jana Hensel, Charlotte Roche, Kerstin Grether, Helene Hegemann and songwriter/poet Peter Licht.

Linguistic Stratigraphy Matthias Urban, 2023-11-29 This book examines the historical linguistic panorama of Western South America focusing on the minor languages that were partially or fully replaced by the expansion of the Quechuan family through the region. The author presents a coherent and generally applicable framework for studying prehistoric language shift processes and reconstructing earlier linguistic landscapes before significant language spreads ousted former patterns of linguistic diversity. This framework combines toponymic evidence with the analysis of substrate contact effects and in some cases extralinguistic evidence to create an integrated if incomplete of extinct and undocumented languages. In an authoritative exploration of case studies concerning Aymara in parts of Southern Peru, Cañar in Ecuador and

Chacha in Northern Peru the book shows how the identities of lost languages and earlier linguistic panoramas can be reconstructed
