On Knowing That One Knows The Logic Of Skepticism And Theory Revisioning Philosophy Vol 13:

On Knowing that One Knows Richard Bosley,1993 The intent of this work is to discover suitable terms for harmonizing the dispositions of both theorist and skeptic and for providing balance between them Towards reaching balance the work in dialectic ways advances a reconsideration of concepts basic to any epistemology doubting and affirming truth and existence knowing and perceiving and necessity and contingency A new account of hypothetical and relative modalities furnishes the mechanism of balance The work also provides a critical examination of recent defense and criticism of skepticism *Truth and Skepticism* Robert Almeder,2010-08-16 Robert Almeder provides a comprehensive discussion and definitive refutation of our common conception of truth as a necessary condition for knowledge of the world and to defend in detail an epistemic conception of truth without falling into the usual epistemological relativism or classical idealism in which all properties of the world turn out to be linguistic in nature and origin There is no other book available that clearly and thoroughly defends the case for an epistemic conception of truth and also claims success in avoiding idealism or epistemological relativism **The Cumulative Book Index** ,1994 A world list of books in the English language *Subject Guide to Books in Print* ,2001

Forthcoming Books Rose Arny,1993-04 **Truth and its Deformities** Peter A. French,Howard K. Wettstein,2009-03-23 Truth and Its Deformities is the 32nd volume in the Midwest Studies in Philosophy series It contains major new contributions on a range of topics related to the general theme of the volume by some of the most important philosophers writing on truth in recent years **Pyrrhonian Skepticism** Walter Sinnott-Armstrong,2004-07-22 Throughout the history of philosophy skepticism has posed one of the central challenges of epistemology Opponents of skepticism including externalists contextualists foundationalists and coherentists have focussed largely on one particular variety of skepticism often called Cartesian or Academic skepticism which makes the radical claim that nobody can know anything However this version of skepticism is something of a straw man since virtually no philosopher endorses this radical skeptical claim The only skeptical view that has been truly held by Sextus Montaigne Hume Wittgenstein and most recently Robert Fogelin has been Pyrrhonian skepticism Pyrrhonian skeptics do not assert Cartesian skepticism but neither do they deny it The Pyrrhonian skeptics doubts run so deep that they suspend belief even about Cartesian skepticism and its denial Nonetheless some Pyrrhonians argue that they can still hold common beliefs of everyday life and can even claim to know some truths in an everyday way This edited volume presents previously unpublished articles on this subject by a strikingly impressive group of philosophers who engage with both historical and contemporary versions of Pyrrhonian skepticism Among them are Gisela Striker Janet Broughton Don Garrett Ken Winkler Hans Sluga Ernest Sosa Michael Williams Barry Stroud Robert Fogelin and Roy Sorensen This volume is thematically unified and will interest a broad spectrum of scholars in epistemology and the history of philosophy **Das Schweizer Buch** ,1994 Bibliografisch repertorium van de wijsbegeerte ,1995
