On Nature Nature Landscape And Natural History:

On Nature Daniel Halpern, 1987 A collection of twenty four essays by writers concerned with nature and natural history including Italo Calvino Howard Ensign Evans Robert Finch Joyce Carol Oates and Edward Hoagland On nature : nature, landscape, and natural history Daniel Halperin, 1987 Nature and Landscape Allen Carlson, 2009 The roots of environmental aesthetics reach back to the ideas of eighteenth century thinkers who found nature an ideal source of aesthetic experience Today having blossomed into a significant subfield of aesthetics environmental aesthetics studies and encourages the appreciation of not just natural environments but also human made and human modified landscapes Nature and Landscape is an important introduction to this rapidly growing area of aesthetic understanding and appreciation Allen Carlson begins by tracing the development of the field's historical background and then surveys contemporary positions on the aesthetics of nature such as scientific cognitivism which holds that certain kinds of scientific knowledge are necessary for a full appreciation of natural environments Carlson next turns to environments that have been created or changed by humans and the dilemmas that are posed by the appreciation of such landscapes He examines how to aesthetically appreciate a variety of urban and rural landscapes and concludes with a discussion of whether there is in general a correct way to aesthetically experience the environment **Library of Congress Subject Headings** Library of Congress, Library of Congress. Office for Subject Cataloging Policy, 2011 *Australian national bibliography*, 1961 **Haunted Spaces in Twenty-First Century British Nature Writing** Anneke Lubkowitz, 2020-06-08 This study investigates the figure of haunting in the New Nature Writing It begins with a historical survey of nature writing and traces how it came to represent an ideal of natural space as empty of human history and social conflict Building on a theoretical framework which combines insights from ecocriticism and spatial theory the author explores the spatial dimensions of haunting and hauntology and shows how 21st century writers draw on a Gothic repertoire of seemingly supernatural occurrences and spectral imagery to portray natural space as disturbed uncanny and socially contested Iain Sinclair and Robert Macfarlane are revealed to apply psychogeography's interest in hidden histories and haunted places to spaces associated with wilderness and the countryside Kathleen Jamie's allusions to the Gothic are put in relation to her feminist re-writing of the outdoors and John Burnside's use of haunting is shown to dismantle fictions of the far north This book provides not only a discussion of a wide range of factual and fictional narratives of the present but also an analysis of the intertextual dialogue with the Romantic tradition which enfolds in these texts *Geography in America at the Dawn of the 21st Century* Gary L. Nature Writing Don Scheese,2013-10-28 In this comprehensive study of the genre Don Scheese traces its evolution from the pastoralism evident in the natural history observations of Aristotle and the poetry of Virgil to current American writers He documents the emergence of the modern form of nature writing as a reaction to industrialization Scheese s personal observations of natural settings sharpen the reader s understanding of the dynamics between author and locale His study is further informed by ample use of illustrations and close readings core writers such as Thoreau John Muir and Mary Austin showing how each writer s work exemplifies the pastoral tradition and celebrate a spirit of place in the United States

Contemporary Literary Landscapes Daniel Weston, 2017-05-15 Writing landscapes inevitably occurs in dialogue with a long textual and pictorial tradition but first hand experience also provides key stimuli to many writers accounts This monograph employs a comparative lens to offer an intervention in debates between literary scholars who focus on genre and those cultural geographers who are concerned that self perpetuating literary tropes marginalize practical engagements Suggesting that representation and experience are not competing paradigms for landscape Daniel Weston argues that in the hands of contemporary writers they are complementary forces building composite articulations of place In five case studies Weston matches a writer to a mode of apprehending place W G Sebald with picturing Ciaran Carson with mapping Iain Sinclair with walking Robert Macfarlane with engaging Kathleen Jamie with noticing Drawing out a range of sites at which representation and experience interact Weston s argument is twofold first interaction between traditions of landscape writing and direct experience of landscapes are mutually influential and second writers increasingly deploy style form and descriptive aesthetics to recover the experience of place in the poetics of the text itself As Weston shows emergent landscape writing shuttles across generic boundaries reflecting the fact that the landscapes traversed are built out of a combination of real and imaginary sources

People and Places of Nature and Culture Rod Giblett, 2014-05-27 Using the rich and vital Australian Aboriginal understanding of country as a model People and Places of Nature and Culture affirms the importance of a sustainable relationship between nature and culture While current thought includes the mistaken notion perpetuated by natural history ecology and political economy that humans have a mastery over the Earth this book demonstrates the problems inherent in this view In the current age of climate change this is an important appraisal of the relationship between nature and culture and a projection of what needs to change if we want to achieve environmental stability
