**Sociology and Interpretation** Charles A. Pressler, Fabio B. Dasilva, Fabio B.. Da Silva, 1996-01-01 Interpretive sociology involves the consideration of not only sense evidence but also of meanings affects and other subjective phenomena Sociologists and social philosophers have attempted to understand social behavior through observable interaction and wellsprings of behavior This book is dedicated to a critical analysis of these approaches from the positivist hermeneutics of Emilio Betti to the non rational ethics of Max Scheler Guided by a general model of social scientific activity developed in the introduction it carefully explores the rich diversity of interpretive positions

Constitutional Imaginaries Jiří Přibáň, 2021-09-30 This book offers a social theoretical analysis of imaginaries as constituent social forces of positive law and politics Constitutional imaginaries invite constitutional and political theorists philosophers and sociologists to rethink the concept of constitution as the normative legal limitation and control of political power They show that political constitutions include societal forces impossible to contain by legal norms and political institutions The constitution of society as one polity defined by the unity of topos ethnos nomos that is the unity of territory people and their laws informed the rise of modern nations and nationalisms as much as constitutional

democratic statehood and its liberal and republican regimes However the imaginary of polity as one nation living on a given territory under the constitutional rule of law is challenged by the process of European integration and its imaginaries informed by transnational legal and societal pluralism administrative governance economic performativity and democratically mobilised polity This book discusses the sociology of imagined communities and the philosophy of modern social imaginaries in the context of transnational European constitutionalism and its recent theories most notably the theory of societal constitutions It offers a new approach to the legal constitutions as societal power formations evolving at national European and global levels The book will be of interest to scholars and students interested in constitutional and European law theory and philosophy as much as interdisciplinary and socio legal studies of transnational law and society

**Wittgenstein and Levinas** Bob Plant, 2005-02-16 Wittgenstein and Levinas examines the oft neglected relationship between the philosophies of two of the most important and notoriously difficult thinkers of the twentieth century By bringing the work of each philosopher to bear upon the other Plant navigates between the antagonistic intellectual traditions that they helped to share The central focus on the book is the complex yet illuminating interplay between a number of ethical religious themes in both Wittgenstein's mature thinking and Levinas's distinctive account of ethical responsibility

**Wealth of Persons** Fr. John McNerney, 2016-08-31 Thomas Piketty's *Capital in the Twenty First Century* initiated a great debate not just about inequality but also regarding the failures found in the economic models used by theoreticians and practitioners alike *Wealth of Persons* offers a totally different perspective that challenges the very terms of the debate The Great Recession reveals a great existential rift at the core of certain economic reflections thereby showing the real crisis of the crisis of economics In the human sciences we have created a kind of Tower of Babel where we cannot understand each other any longer The breakdowns occur equally on the personal social political and economic levels There is a need for an about face in method to restore harmony among dissociated disciplines *Wealth of Persons* offers a key to such a restoration applying insights and analysis taken from different economic scholars schools of thought philosophical traditions various disciplines and charismatic entrepreneurs *Wealth of Persons* aims at recapturing an

adequate understanding of the acting human person in the economic drama one that measures up to the reality The investigation is a passport allowing entry into the land of economic knowledge properly unfolding the anthropological meaning of the free economy *Handbook of Digital Resources in Mathematics Education* Birgit Pepin, Ghislaine Gueudet, Jeffrey Choppin, 2024-06-21 This handbook presents the state of the art scholarship on theoretical frames mathematical content learning environments pedagogic practices teacher professional learning and policy issues related to the development and use of digital resources in mathematics education With the advent of more and more open access digital resources teachers choose from the web what they see fit for their classroom students choose in the moment what they need for their projects and learning paths However educators and students often find it difficult to choose from the abundance of materials on offer as they are uncertain about their quality and beneficial use It is clear that at a time of bouleversement of the teaching learning processes it is crucial to understand the quality and the potentially transformative aspects of digital resources This book provides comprehensive analyses of and insights into the transformative aspects of digital resources

Recreating Relationships Helen Christiansen, Linda Goulet, Mhairi Maeers, Caroline Krentz, 1997-01-01 Focuses on two major themes the improvement of teaching practice through collaborative research and reflection on the process of collaboration itself to understand its role in educational change **The Oxford Handbook of the Sources of International Law** Jean d'Aspremont, Samantha Besson, Sévrine Knuchel, 2017-10-19 The question of the sources of international law inevitably raises some well known scholarly controversies where do the rules of international law come from And more precisely through which processes are they made how are they ascertained and where does the international legal order begin and end This is the static question of the pedigree of international legal rules and the boundaries of the international legal order Second what are the processes through which these rules are made This is the dynamic question of the making of these rules and of the exercise of public authority in international law The Oxford Handbook of the Sources of International Law is the very first comprehensive work of its kind devoted to the question of the sources of international law It provides an accessible and systematic overview of the key issues and debates around the sources of international law It also offers an authoritative theoretical guide for anyone studying or working within but also outside international law wishing to understand one of its most foundational questions This Handbook features original essays by leading international law scholars and theorists from a range of traditions nationalities and perspectives reflecting the richness and diversity of scholarship in this area **Subject and Agency in Psychoanalysis** Frances Moran, 1993-05-01 Psychoanalysis works with words words spoken by a subject who asks that the analyst listen This is the belief that underlies Francis Moran's rewarding exploration of a central problem in psychoanalytic theory namely the separation of the concepts of subject and agency Subject and Agency in Psychoanalysis contends that Freud simultaneously employs two frameworks for explaining agency one clinical and one theoretical As a result Freud's exploration of agency proceeds from two logically incompatible

assumptions The division between these assumptions is a part of Freud's psychoanalytic legacy Moran reads the Freudian inheritance in light of this division showing how Klein and Hartmann's theoretical concepts of subject are adrift from the subject who speaks in analysis Moran also shows that while Lacan's subject provides more focus on this issue Lacan reverts to the Freudian division in his use of logically contradictory assumptions concerning the location of agency Drawing on contemporary theory development from Lacanian innovations to the social theories of Anthony Giddens Moran proposes a new and fertile approach to a fundamental problem significantly narrowing the gap between psychoanalytic theory and practice

*Strangers in a Familiar Land* James A. Blumenstock, 2020-04-28 Throughout history many Christians have existed on the margins of society deviants and strangers in lands they call home To survive they have had to construct alternate identities that not only make sense of their religious experiences and beliefs but also equip them to successfully negotiate their social worlds In Thailand a nation where social identities are thoroughly intertwined with Buddhist religious adherence Christians must come to terms with such a marginalized existence By leaving Buddhism and adopting what is considered a foreign faith Christian converts become deviants to normal Thai identity and belonging In response they have discovered creative solutions for traversing this complex terrain of marginalization This book presents a deep exploration of the phenomenon of marginalization as experienced by Thai Christian converts In it readers will follow participants through the heights of transformative religious experience the lows of severe social displacement the tensions of managing two disparate lifeworlds and two conflicting selves and the comfort and joy of finding a new place to call home In the end the reader will gain deep insight into what it is like to successfully navigate a minority religious identity on the margins of society

The Frankfurt School Critique of Capitalist Culture Ronald Jeremiah Schindler, 2019-05-23 First published in 1998 this volume is an impressive contradictory cultural phenomenon It addresses almost every existing contemporary school of thought whilst belonging completely to none of them through an absence of external signifiers With remarkable erudition Ronald Schindler reveals to official society the truth about itself through explorations of areas including the origins of dialectical intelligence a metatheoretical reconstruction of Marxism Habermas historical materialism and hermeneutics and political visions for the universities
