 M Zbikowski University of Chicago Essays on Psychogeography and the City as Performance John C Green, 2024-01-26
 With 70% of the world's population expected to live in urban environments by 2050 cities are poised to become the most
 significant spaces to shape personal and communal identity As contemporary cities become event destinations a dialogue is
 emerging between the performing arts and the urban context and social fabric Inspired by the principles of Psychogeography
 this collection of essays highlights the performative aspects of cities as landscapes of creative inspiration where curiosity
 imagination playfulness and the energy of the street combine with contemporary performance practices to create immersive
 public art experiences Written by an international cohort of scholar artists these essays offer arts practitioners urban
 specialists and general readers a practical guide to experiencing the cityscape as the Artscape **Radio as Art** Anne
 Thurmann-Jajes, Ursula Frohne, Jee-Hae Kim, Maria Peters, Franziska Rauh, Sarah Schönewald, 2019-08-15 Acoustic signals
 voice sound articulation music and spatial networking are dispositifs of radiophonic transmission which have brought forth a
 great number of artistic practices Up to and into the digital present radio has been and is employed and explored as an
 apparatus based structure as well as an expanded model for performance and perception This volume investigates a broad
 range of aesthetic experiments with the broadcasting technology of radio and the use of radio as a means of disseminating
 artistic concepts With exemplary case studies its contributions link conceptual recipient response related and sociocultural
 issues to matters of relevance to radio art's mediation Introduction to Computer Music Nick Collins, 2010-02-01 An up to
 date core undergraduate text Introduction to Computer Music deals with both the practical use of technology in music and
 the key principles underpinning the discipline It targets both musicians exploring computers and technologists engaging with
 music and does so in the confidence that both groups can learn tremendously from the cross disciplinary encounter It is
 designed to approach computer music as its own subject and strongly bridge the arts to computing divide benefiting and
 reconciling both musicians and computer scientists You will need little or no prior experience of computer programming
 itself and may not have an extensive background in mathematics or music but this highly engaging textbook will help you
 master many disciplines at once with a focus on both fascinating theories and exciting practical applications **From
 Music to Sound** Makis Solomos, 2019-10-28 From Music to Sound is an examination of the six musical histories whose
 convergence produces the emergence of sound offering a plural original history of new music and showing how music had
 begun a change of paradigm moving from a culture centred on the note to a culture of sound Each chapter follows a
 chronological progression and is illustrated with numerous musical examples The chapters are composed of six parallel
 histories timbre which became a central category for musical composition noise and the exploration of its musical potential
 listening the awareness of which opens to the generality of sound deeper and deeper immersion in sound the substitution of

composing the sound for composing with sounds and space which is progressively viewed as composable The book proposes a global overview one of the first of its kind since its ambition is to systematically delimit the emergence of sound Both well known and lesser known works and composers are analysed in detail from Debussy to contemporary music in the early twenty first century from rock to electronica from the sound objects of the earliest musique concrète to current electroacoustic music from the Poème électronique of Le Corbusier Varèse Xenakis to the most recent inter arts attempts Covering theory analysis and aesthetics From Music to Sound will be of great interest to scholars professionals and students of Music Musicology Sound Studies and Sonic Arts Supporting musical examples can be accessed via the online Routledge Music Research Portal

From Xenakis's UPIC to Graphic Notation Today ZKM Hertz-Labor (Peter Weibel, Ludger Brümmer, Sharon Kanach), 2024-11-29 From Xenakis's UPIC to Graphic Notation Today sheds light on the revolutionary UPIC system developed by composer Iannis Xenakis in the late 1970s This digital innovation enables the transformation of drawings into musical compositions and continues to shape the world of contemporary music notation Freely available in open access this book provides unrestricted access to the historical origins of UPIC and its evolution into modern notation techniques Richly illustrated it reveals the unique fusion of image and sound Through QR codes readers can experience the compositions interactively IANNIS XENAKIS 1922-2001 was not only a composer but also a visionary and a bridge builder between music mathematics and architecture Originally trained as an engineer in Athens he developed innovative compositional techniques that integrate geometric and mathematical principles with music His creation of the UPIC system established him as a pioneer of computer assisted music with an influence that extends into today's musical landscape Often described as a sound architect Xenakis's unique approach and interdisciplinary works remain groundbreaking

The Bloomsbury Handbook of Sound Art Sanne Krogh Groth, Holger Schulze, 2020-02-20 The Bloomsbury Handbook of Sound Art explores and delineates what Sound Art is in the 21st century Sound artworks today embody the contemporary and transcultural trends towards the post apocalyptic a wide sensorial spectrum of sonic imaginaries as well as the decolonization and deinstitutionalization around the making of sound Within the areas of musicology art history and later sound studies Sound Art has evolved at least since the 1980s into a turbulent field of academic critique and aesthetic analysis Summoning artists researchers curators and critics this volume takes note of and reflects the most recent shifts and drifts in Sound Art rooted in sonic histories and implying future trajectories

Perspectives on Contemporary Musical

Practices Madalena Soveral, 2022-06-01 This volume sheds light on the wide range of perspectives on musical activity today and shows how it can be analyzed from different points of view working within a diverse theoretical framework It is organized into three sections the first of which discusses the changing contexts of musical work compositions over the 20th century The second part offers a rich and in depth musical analysis rigorously connected to the performative and interpretative dimension while the third considers the relationship between technology and music and its influence on the creation of new paradigms for musical performance and creation Covering practical and theoretical problems the collection will be of great interest to scholars professionals students of music composers and performers *The Saturday Review of Politics, Literature, Science and Art*, 1862 *Experimental Film and Queer Materiality* Juan A. Suárez, 2024 Often described as an art of abstraction and subjective introspection experimental film is also invested in exploring daily objects and materials and in channeling in the process a peculiar perception of the modern everyday that this book calls queer materiality Queer materiality designates the queer latency of modern material culture which often inspired queer artists and filmmakers to envision wayward bodies and behaviors and refers to the way in which sexual and social dissidence was embedded in the objects technologies substances and spaces that make up the hardware of experience This book studies a rich archive of queer material engagements in work by well known filmmakers such as Andy Warhol Barbara Hammer Carolee Schneemann and Jack Smith as well as under recognized figures such as Tom Chomont Jim Hubbard Ashley Hans Scheirl and Teo Hernández Combining history formal analysis and theoretical reflection author Juan A. Suárez shows how plastics glitter mechanical ensembles urban ruins garbage amphetamine film grain and noise have been mobilized in the articulation of queerness for the screen *Experimental Film and Queer Materiality* is an inquiry into the liveliness of matter and into the interface between sexuality and the material world *The Saturday Review of Politics, Literature, Science, Art, and Finance*, 1866 **Sonic Flux** Christoph Cox, 2018-10-22 From Edison's invention of the phonograph through contemporary field recording and sound installation artists have become attracted to those domains against which music has always defined itself noise silence and environmental sound Christoph Cox argues that these developments in the sonic arts are not only aesthetically but also philosophically significant revealing sound to be a continuous material flow to which human expressions contribute but which precedes and exceeds those expressions Cox shows how over the course of the twentieth and twenty first centuries philosophers and sonic artists have explored this sonic flux Through the philosophical analysis of works by John Cage Maryanne Amacher Max Neuhaus Christian Marclay and many others *Sonic Flux* contributes to the development of a materialist metaphysics and poses a challenge to the prevailing positions in cultural theory proposing a realist and materialist aesthetics able to account not only for sonic art but for artistic production in general **Cinema Studies** Susan Hayward, 2017-08-18 *Cinema Studies The Key Concepts* is essential reading for anyone interested in film Providing accessible coverage of a comprehensive range of genres movements theories and production terms this is a must
