On Meaning Selected Writings In Semiotic Theory:

On Meaning Algirdas Julien Greimas, 1987 *On Meaning* Algirdas Julien Greimas, 1987-01 **On Meaning** Algirdas Julien Greimas, 1987 Maupassant: the Semiotics of Text Algirdas Julien Greimas, 1988-01-01 Translated by Paul Perron

Maupassant's short story *Two Friends* is examined in order to test methodological tools and to hone them for their application in the analysis of narrative discourse starting from the oral tale Propp and ending with the written tale instituted as literary genre. Complex procedures of textual production are identified among which entire sequences as well as the evenemential level of narrative fade away in favor of its cognitive dimension. This semiotic investigation is accompanied by a challenge to certain conventions of literary criticism: dialogue the locus of Realist stereotypes appears laden with paradoxical truths; the description of nature inherited from the Romantics bristles with narrative intent; and entire sections of a valorized figurative universe unfold before us. Thematic readings are linked up with semantic analysis: the figure of Water exerts its profound fascination. A Christian symbolics is uncovered which traverses the text and invites us to read it as a new Gospel Parable. New readings complement older ones and remain as so many suspended possibilities. The tale appears somewhat as a sonnet that is to say as a fixed form genre where the closure of the text would be a necessary condition for transcending it.

Paris School Semiotics: Theory Paul Perron, Frank Collins, 1989-01-01. It has often been claimed that the aim of semiotics is to establish a general theory of systems of signification. However as Jean Claude Coquet notes in a recent collection of essays what distinguishes one school of semiotics from another is the initial definition given of sign. If for certain semioticians the sign is first of all an observable phenomenon for the Paris School it is first of all a construct and this point of departure has crucial theoretical and practical consequences. The essays appearing in these two volumes are representative of recent work carried out by members of this semiotic school. Essays in Volume I study problems more closely related to theoretical issues while Volume II focuses more specifically on various fields of application.

The Reading of Theoretical Texts Peter Ekegren, 2002-01-04. Since the structuralist debates of the 1970s the field of textual analysis has largely remained the preserve of literary theorists. Social scientists while accepting that observation is theory laden have tended to take the meaning of texts as given and to explain differences of interpretation either in terms of ignorance or bias. In this important contribution to methodological debate Peter Ekegren uses developments within literary criticism philosophy and critical theory to reclaim this study for the social sciences and to illuminate the ways in which different readings of a single text are created and defended.

The Routledge Companion to Semiotics Paul Cobley, 2009-09-11. The ideal introduction to semiotics containing engaging essays from an impressive range of international leaders in the field. Universal Grammar and Narrative Form David Herman, 1995 In a major rethinking of the functions methods and aims of narrative poetics David Herman exposes important links between modernist and postmodernist literary experimentation and contemporary language theory Ultimately a search for new tools for narrative theory his work clarifies complex connections between science and art theory and culture and philosophical analysis and narrative discourse Following an extensive historical overview of theories about universal grammar Herman examines Joyce's *Ulysses* Kafka's *The Trial* and Woolf's *Between the Acts* as case studies of modernist literary narratives that encode grammatical principles which were re-fashioned in logic linguistics and philosophy during the same period Herman then uses the interpretation of universal grammar developed via these modernist texts to explore later twentieth century cultural phenomena The problem of citation in the discourses of postmodernism for example is discussed with reference to syntactic theory An analysis of Peter Greenaway's *The Cook The Thief His Wife and Her Lover* raises the question of cinematic meaning and draws on semantic theory In each case Herman shows how postmodern narratives encode ideas at work in current theories about the nature and function of language Outlining new directions for the study of language in literature **Universal Grammar and Narrative Form** provides a wealth of information about key literary linguistic and philosophical trends in the twentieth century

The Success and Failure of Fredric Jameson Steven Helmling, 2000-11-09 This is the first book to provide a critical overview of the work and career as a whole of the Marxist culture critic Fredric Jameson foremost among American intellectuals and a vanguard figure

in the theory movement of the past three decades Steven Helmling identifies major themes and traces both continuity and change in Jameson's engagement with the challenges presented by continental theory from the 1950s to the present. Instead of approaching Jameson's work by circumventing his notoriously difficult writing style as many have chosen to do, Helmling takes at face value Jameson's insistence that the success and failure of critique are conditioned on how it is written. Jameson insists on a dialectical prose that not merely analyzes but enacts or performs the contradictions of its subjects, resulting in an agitating dramatic and compelling style that questions the very success or failure of critique itself. Style is thus regarded both as a salient feature of the writing and as a problem for critical practice in general. Besides illuminating an oeuvre that's far from fully understood, the book makes a timely contribution to the current 'What was theory' discussion.

Narrative Theory Kent Puckett, 2016-11-07 Kent Puckett's Narrative Theory: A Critical Introduction provides an account of a methodology increasingly central to literary studies, film studies, history, psychology, and beyond. In addition to introducing readers to some of the field's major figures and their ideas, Puckett situates critical and philosophical approaches towards narrative within a longer intellectual history. The book reveals one of narrative theory's founding claims: that narratives need to be understood in terms of a formal relation between story and discourse, between what they narrate and how they narrate it, both as a necessary methodological distinction and as a problem characteristic of modern thought. Puckett thus shows that narrative theory is not only a powerful descriptive system but also a complex and sometimes ironic form of critique. Narrative Theory offers readers an introduction to the field's key figures, methods, and ideas, and it also reveals that field as unexpectedly central to the history of ideas.
