Rudolf Steiner, 2001-10 Written 1902 CW 8 As simultaneously mysticism and fact Christianity is a breakthrough in the historical development of humanity for which the mysteries with the results that they brought about form a prior evolutionary stage Rudolf Steiner During the fall and winter of 1901-02 Steiner gave a series of lectures called Christianity as Mystical Fact to members of the Theosophical Society The lectures were rewritten and issued as a book later that year They mark a watershed in the development of Western esotericism Steiner wrote of the idea behind his book The title Christianity as Mystical Fact was one I gave to this work eight years ago when I gathered together the content of lectures given in 1902 It was meant to indicate the special approach adopted in the book Its theme is not just the mystical side of Christianity in a historical presentation It was meant to show from the standpoint of a mystical awareness how Christianity came into being Behind this was the idea that spiritual happenings were factors in the emergence of Christianity which could only be observed from such a point of view It is for the book itself to demonstrate that by mystical I do not in any way imply a vague intuition rather than strict scientific argument In many circles mysticism is understood as just that and therefore it is distinguished from the concerns of all genuine science In this book however I use the term to mean a presentation of spiritual reality a reality accessible only to a knowledge drawn from the sources of spiritual life itself Anyone who denies the possibility of such knowledge in principle will find its contents hard to comprehend any reader who accepts the idea that mysticism may coexist with the clarity of the natural sciences may acknowledge that the mystical aspect of Christianity must be described mystically This is a significant book for Steiner's own development that of Western esotericism and our own

understanding of the Christ event Readers will find the evolutionary development from the ancient Mysteries through the great Greek philosophers to the events portrayed in the Gospels Included are an informative introduction and annotated notes by Andrew Welburn and an afterword by Michael Debus a priest of The Christian Community who summarizes the book and places it in context This book is a translation from German of *Das Christentum als mystische Tatsache und die Mysterien des Altertums* GA 8 Cover image Photo of Bordeaux Cathedral by James Nicholls      Centers of Pedagogy Robert S. Finser, 2001 As a result of today's crisis in education people are beginning to realize that schools involve far more than providing children with knowledge and skills Schools are communities and like all communities may be healthy or unhealthy School Renewal addresses the problems and challenges of a school community Through the use of fairy tales myths and the personal experience of Waldorf education Torin Finser describes how both teachers and parents can come to grips with common problems such as burnout interpersonal conflicts and the traps of routine Most important the author stresses that an

educational community must come to terms with the many unseen dimensions of each individual He shows how these little understood aspects of the mind can be cultivated and nourished to keep the school and education alive School Renewal does not offer formulas and slapdash solutions Rather it encourages a whole new way of thinking about education and personal growth for children and for the adults who care about them if one wish could be granted me on behalf of school renewal I would ask for significant improvement in the quality of sleep afforded to parents and teachers No other change has the potential to do more good than simply eliminating the state of chronic exhaustion found by the end of the week in most schools Torin Finser understands what it s like to deeply care about the education of our children His message will be a healing balm for those open to his wise and practical counsel I want to rush out and buy a copy of this book for every teacher and parent I know Eric Utne founder of Utne Reader Extremely accessible down to earth and full of very important insights I highly recommend this book Dave Alsop Chairman Association of Waldorf Schools of North America Splendid not just teachers but parents students and just plain stressed out citizens would benefit from the wisdom information and insight Finser offers Joseph Chilton Pearce author of Magical Child and Evolution s End Wise guidance for those of us who want to be good stewards of our children and the schools that serve them Parker J Palmer author of The Courage to Teach and Let Your Life Speak An exciting and refreshing book for parents and teachers in his clear and concise writing Torin has shown us how to bring common sense back to our schools Jim Grant Executive Director Staff Development for Educators For Finser school renewal is about self development the suggestions offered here contribute to new ways of thinking about education and personal growth Highly recommended for school administrators teachers community groups and parents Library Journal Shows that a healthy school community is one that is able to recognize and work with the problems that can mar even the most liberal and creative educational systems burnout stress and interpersonal conflict NAPRA Review [The Essential Renewal of America's Schools](#) Carl Glickman,Ian M. Mette,2020 What can educational leaders do to create schools that are purposeful moral and successful This book outlines a practical framework to replace dependence on top down state and federal regulations with locally guided initiatives to address local goals Building on Glickman s classic Renewing America s Schools this resource is for anyone involved with school change in today s complex times *School Districts and Instructional Renewal* Amy M. Hightower,2002 This volume shows how school districts can and do make essential contributions to the renewal and enhancement of American education It expands the conversation on what school districts are what they do and how they can enhance the quality of teaching and learning in US schools *Renewal* Harold Kwalwasser,2012-03-16 Harold Kwalwasser has put together a call to action for education reform that makes a clear case for what has to be done in order to educate all children to their full potential He visited forty high performing and transforming school districts charters parochial and private schools to understand why they have succeeded where others have failed The analysis in Renewal Remaking America s Schools for the Twenty First Century brings together all of the necessary changes in

one dynamic strategy Many schools even though facing seemingly impossible odds have succeeded brilliantly But their histories also reflect that there are neither silver bullets or demons The heart of successful reform is systemic change which requires the patience understanding and commitment of every adult who has a role in the process from parents and taxpayers to the school board members superintendents and teachers and on to state legislators and members of Congress Renewal offers a clear picture of how to move away from the mass production style of education that most schools offered throughout the twentieth century to a new more innovative and flexible model that can meet this country s promise of truly educating every child and preparing each of them for the challenges ahead Hear from the author in this 5 minute video on YouTube

Self-Reflective Renewal in Schools Bradley S. Portin,Lynn G. Beck,Michael Knapp,Joseph Murphy,2003-02-28

The primary purpose of this study is to learn from the experiences of schools across the U S that are engaged in a largely process oriented reform strategy Schools vary in their capacity for productive self reflection The authors examine the process of self assessment that many schools engaged in during this time of widespread public attention to the equality of schools The schools examined in these cases reveal a complex interaction between the nature of the self reflective activity the schools were engaged in in this case a National Education Association school review process entitled KEYS to Success in Schools the contexts that shape the school and the readiness on the part of school staff to engage in systematic reflection around issues that affect teaching and learning The act of self reflection in schools may not provide by itself a source of new ideas alternative models and a sense of what might be possible for the school to accomplish Some external agent can often provide the impetus for or constrain the actions of school staffs in examining their programs and capacity for renewal The acts and outcomes of self reflection are inevitably guided and or constrained by various contexts including the school s history culture structure and supports and pressures provided from communities districts and states
