Legacies of Space and Intangible Heritage Fernando Armstrong-Fumero, Julio Hoil Gutierrez, 2017-03-01 Legacies of Space and Intangible Heritage is an interdisciplinary exploration of the intersections between the study and management of physical sites and the reproduction of intangible cultural legacies The volume provides nine case studies that explore different ways in which place is mediated by social political and ecological processes that have deep historical roots and that continue to affect the politics of heritage management Spaces of human habitation are both historical records of the past and key elements in reproducing the knowledge and values that define lives in the present Practices knowledge and skills that communities recognize as part of their culture and that a range of legal statutes define as protected intangible heritages are threatened by increased migration the displacement of indigenous peoples and limits on access to culturally or historically significant sites This volume addresses how different physical environments contribute to the reproduction of cultural forms even in the wake of these processes of displacement and change Case studies from North and South America reveal a pattern of abandonment and reestablishment of settlements and show how collective memory drives people back to culturally meaningful sites This tendency for communities to return to the sites that shaped their collective histories along with the growing importance granted to intangible heritage challenges archaeologists and other heritage workers to find new ways of incorporating the cultural legacies that link societies to place into the work of research and stewardship By examining the politics of cultural continuity through the lenses of archaeology and ethnohistory Legacies of Space and Intangible Heritage demonstrates this complex relationship between a people s heritage and the landscape that affects the making of place Contributors Rani Alexander Hannah Becker Minette Church Bonnie Clark Chip Colwell Winifred Creamer Emiliana Cruz T J Ferguson Julio Hoil Gutierrez Jonathan Haas Saul Hedquist Maren Hopkins Stuart B Koyiyumptewa Christine Kray Henry Marcelo Castillo Anna Roosevelt Jason Yaeger Keiko Yoneda

New Age in Latin America , 2016-06-10 This book is at the crossroads where a New Age sensibility advancing like an ecumen of

worldwide spirituality without national cultural or ecclesiastical frontiers meets Latin America's syncretic religions practiced by groups of people with African or indigenous roots or developed from the tradition of popular Catholicism. The syncretic character of the two sensibilities makes both the New Age and popular religion behave like two syncretizing and syncretizable matrices of meaning. This book opens up a rich vein of debate with new dilemmas and discussions that will provide a framework for a new field of study in anthropology. What new ways of signifying living and experiencing religion is the New Age generating in Latin America? What are its limits? Contributors are Alejandra Aguilar Ros, Santiago Bastos Lizette Campechano, Sylvie P. Dron, Colombani Alejandro, Frigerio Jacques, Galinier Silas, Guerriero Cristina, Gutierrez Ziga Nahayeilli B. Juarez Huet, Jos. Guilherme C. Magnani, Antoinette Molini, María Teresa Rodríguez Deis, Siqueira Carlos, Alberto Steil, Engel Tally, René de la Torre and Marcelo Zamora.

Mexico's Valleys of Cuicatlán and Tehuacán David Yetman, Alberto Búrquez, 2023-09-26 Mexico's Valleys of Cuicatlán and Tehuacán provides an accessible overview of an extraordinary region of Central Mexico. Through firsthand experience and engaging prose, the authors provide a synthesis of the environment, plants, and peoples of the valleys, showing their importance and influence as Mesoamerican arteries for environmental and cultural interchange through Mexico.

Ethnobotany of the Mountain Regions of Mexico Alejandro Casas, José Juan Blancas Vázquez, 2023-05-31 Research in recent years has increasingly shifted away from purely academic research and into applied aspects of the discipline, including climate change research, conservation, and sustainable development. It has by now widely been recognized that traditional knowledge is always in flux and adapting to a quickly changing environment. Trends of globalization, especially the globalization of plant markets, have greatly influenced how plant resources are managed nowadays. While ethnobotanical studies are now available from many regions of the world, no comprehensive encyclopedic series focusing on the world's mountain regions is available in the market. Scholars in plant sciences worldwide will be interested in this website and its dynamic content. The field and thus the market of ethnobotany and ethnopharmacology has grown considerably in recent years. Student interest is on the rise; attendance at professional conferences has grown steadily, and the number of professionals calling themselves ethnobotanists has increased significantly. The various societies—Society for Economic Botany, International Society of Ethnopharmacology, Society of Ethnobiology, International Society for Ethnobiology, and many regional and national societies in the field—currently have thousands of members. Growth has been most robust in BRIC countries. The objective of this new MRW on Ethnobotany of Mountain Regions is to take advantage of the increasing international interest and scholarship in the field of mountain research. We anticipate including the best and latest research on a full range of descriptive, methodological, theoretical, and applied research on the most important plants for each region. Each contribution will be scientifically rigorous and contribute to the overall field of study.
