Radiation Effects in Semiconductors Krzysztof Iniewski, 2018-09-03 Space applications nuclear physics military operations medical imaging and especially electronics modern silicon processing are obvious fields in which radiation damage can have serious consequences i e degradation of MOS devices and circuits Zeroing in on vital aspects of this broad and complex topic Radiation Effects in Semiconductors addresses the ever growing need for a clear understanding of radiation effects on semiconductor devices and circuits to combat potential damage it can cause Features a chapter authored by renowned radiation authority Lawrence T Clark on Radiation Hardened by Design SRAM Strategies for TID and SEE Mitigation This book analyzes the radiation problem focusing on the most important aspects required for comprehending the degrading effects observed in semiconductor devices circuits and systems when they are irradiated It explores how radiation interacts with solid materials providing a detailed analysis of three ways this occurs Photoelectric effect Compton effect and

creation of electron positron pairs The author explains that the probability of these three effects occurring depends on the energy of the incident photon and the atomic number of the target The book also discusses the effects that photons can have on matter in terms of ionization effects and nuclear displacement Written for post graduate researchers semiconductor engineers and nuclear and space engineers with some electronics background this carefully constructed reference explains how ionizing radiation is creating damage in semiconducting devices and circuits and systems and how that damage can be avoided in areas such as military space missions nuclear applications plasma damage and X ray based techniques It features top notch international experts in industry and academia who address emerging detector technologies circuit design techniques new materials and innovative system approaches

Particle Physics: Perspectives And Opportunities - Report Of The Dpf Committee On Long-term Planning Robert N Cahn,Roberto Peccei,Michael E Zeller,Jonathon A Bagger,David G Cassel,Paul D Grannis,Frank J Sciulli,1995-09-20 This book is the result of a broad based and in depth study of high energy physics commissioned by the Executive Committee of the Division of Particles and Fields of the American Physical Society This year long study was initiated in the early 1994 in the wake of the cancellation of the SSC and is meant to complement the report of the Drell HEPAP subpanel charged with providing a vision for the future of the field The DPF study of high energy physics was organized on the basis of the working groups each led by a number of co conveners chosen among established leaders in the various subspecialties in the field These conveners in turn organized their working groups by inviting other active workers in the discipline to participate and gathered further input from the community by holding a variety of specialized meetings and workshops This book contains the final reports of the 11 working groups assembled for the study along with an extended overview and executive summary by the editors
