Signs, Mind, and Reality Sebastian Shaumyan, 2006-04-06 The book presents a new science of semiotic linguistics The goal of semiotic linguistics is to discover what characterizes language as an intermediary between the mind and reality so that language creates the picture of reality we perceive The cornerstone of semiotic linguistics is the discovery and resolution of language antinomies contradictions between two apparently reasonable principles or laws Language antinomies constitute the essence of language and hence must be studied from both linguistic and philosophical points of view The basic language antinomy which underlies all other antinomies is the antinomy between meaning and information Both generative and classical linguistic theories are unaware of the need to distinguish between meaning and information By confounding these notions they are unable to discover language antinomies and confine their research to naturalistic description of superficial language phenomena rather than the quest for the essence of language Series A

Semiotics and Verbal Texts Jane Gravells, 2016-12-27 This book offers an innovative approach to analysing written texts grounded in principles of semiotics Envisaging whole news media representations as signs and using the real world example of the BP Deepwater Horizon crisis the author demonstrates how business crises are constructed through language Gravells identifies patterns of language which show a progression from one kind of current news representation to a different kind of coverage This coverage positions the crisis as having symbolic and conventional meaning within varied social contexts including the arts business and the environment Using a wealth of examples from the BP story to illustrate her practical research approach Gravells draws language maps of different phases of the crisis representation showing how an early iconic phase of representation moves through an indexical to a symbolic phase and projects a return to a naturalised icon This book will be of interest to researchers and students of semiotics those exploring research methods and linguists with an interest in business and media communications

The Ecology and Semiotics of Language Learning Leo van Lier, 2006-04-18 In this book I try to give a coherent and consistent overview of what an ecological approach to language learning might look like This is not a fully fledged grand theory that aims to provide an explanation of everything but an

attempt to provide a rationale for taking an ecological world view and applying it to language education which I regard as one of the most important of all human activities Goethe once said that everything has been thought of before but that the difficulty is to think of it again The same certainly is true of the present effort If it has any innovative ideas to offer these lie in a novel combination of thoughts and ideas that have been around for a long long time The reader will encounter influences that range from Spinoza to Bakhtin and from Vygotsky to Halliday The scope of the work is intentionally broad covering all major themes that are part of the language learning process and the language teaching profession These themes include language perception and action self learning critical pedagogy and research At the same time I have attempted to look at both the macro and the micro sides of the ecological coin and address issues from both a theoretical and a practical perspective This then aims to be a book that can be read by practitioners and theoreticians alike and the main idea is that it should be readable and challenging at the same time

Semiotics and Linguistics Yishai Tobin, 1990-01-01

New Directions in Linguistics and Semiotics James E. Copeland, 1984-01-01 This volume derives from a symposium held in March 1982 to celebrate the inauguration of the Department of Linguistics at Rice University The focus of the symposium was the state of linguistics and semiotics in its recent past the current status and directions to be explored in the immediate future

Theory and Methodology of Semiotics Alexandros Ph. Lagopoulos, Karin Boklund-Lagopoulou, 2020-11-23 The book is an in depth presentation of the European branch of semiotic theory originating in the work of Ferdinand de Saussure It has four parts a historical introduction the analysis of language narrative theory and communication theory Part I briefly presents all the semiotic schools and their main points of reference Although this material is accessible in many other Anglophone publications the presentation is marked by specific choices aiming to display similarities and differences The analysis of language in Part II is also available in Anglophone bibliography but the book presents Saussurean theory according to a new theoretical rationale and enriched with later developments In addition it is orientated so as to offer the foundation for the part that follows Part III is a presentation of Greimasian narrative theory well documented in Francophone bibliography but poorly represented in Anglophone publications The presentation extends the theory in both a qualitative and a new quantitative direction and includes a great number of examples and two extended textual analyses to help the reader understand and apply it Part IV communication theory combines an extension of Greimasian sociosemiotics with other schools of thought This original theoretical section discusses fourteen consecutive communication models the synthesis of which results in a holistic social semiotic theory of communication

Computational Semiotics Jean-Guy Meunier, 2021-08-12 Can semiotics and computers be compatible Can computation advance semiotics by enhancing the scientific basis of the theory of signs Coupling semiotics a philosophical and phenomenological tradition concerned with

theories of signs with computation a formal discipline may seem controversial and paradoxical Computational Semiotics tackles these controversies head on and attempts to bridge this gap Showing how semiotics can build the same type of conceptual formal and computational models as other scientific projects this book opens up a rich domain of inquiry toward the formal understanding of semiotic artifacts and processes Examining how pairing semiotics with computation can bring more methodological rigor and logical consistency to the epistemic quest for the forms and functions of meaning without compromising the important interpretive dynamics of semiotics this book offers a new cutting edge model driven theory to the field
