Gottfried, 2011-03-28 Synthesizing coverage of sensation and reward into a comprehensive systems overview *Neurobiology of Sensation and Reward* presents a cutting edge and multidisciplinary approach to the interplay of sensory and reward processing in the brain While over the past 70 years these areas have drifted apart this book makes a case for reuniting sensation a **Odor Sensation and Memory** Trygg Engen, 1991-11-21 Our sense of smell as Trygg Engen reminds us early in this definitive work has been neglected as a research area This neglect belies the very critical role that the sense plays in human adaptation to the environment through the monitoring of odors Smell is learned through experience and results Engen maintains in a schema of memory system that enables individuals to process and categorize odors There are closer relationships between the individual detecting an odor the circumstances or environment and the reaction of pleasure or aversion than with the other senses When future occasions present the same or similar odors memory will bring back the early experience and directly affect the reaction to the new stimuli Engen sees odor perception as mainly psychological unlike the traditional approach which sees the sense largely as an innate mechanism with a direct physiological basis The research underlying this book is the most current in sensory cognition reminding the reader of the importance of the sense of smell through examples of what deprivation entails The author develops an appreciation of the odor sensing ability mankind has and explores the uses to which that sense is applied The ability to relate past to present perception odor memory and the gradations of odor impact are discussed as well as the engaging questions of fragrances effects on behavior odors and sexuality mother infant bonding and pollution This book is essential reading for all who work in areas relating to sensory perception and cognition

entrepreneur this book explores Hill's role in perpetuating a sense of individualism associated more closely with the concepts of home hearth and honor of the nineteenth century than the psychological anomie associated with the Modernism of the twentieth her own time In addition on the pages of this book will be found relevant discussions regarding Hills ties to Sense Sensibility and Sensation that is to the idea of individualism associated with nineteenth century miniatures and Walt Whitman's celebration of America the notion of beauty associated with Contemplative Romanticism espoused by Edmund Burke the sentiments of the Romance poets Lord Byron and Percy B Shelley as well as the nineteenth century color theories of Michel Chevreul favored by the Impressionists Moreover notions of democratic empiricism aesthetic lyricism and Hills passion for symphonic colors are all contributory factors which help to identity Laura Coombs Hills as what I have termed America's Lyrical Impressionist

The Creation of Sensation and the Evolution of Consciousness E T Mullin,2007-11 Too many people have little regard for their lives as though they consider it out of their hands and beyond control Should we just absorb the slings and arrows or should we look for truth and how to cope with it There is nothing more crucial to the life of an organism than its nervous system It is the source of all sensation action and motivation In short it is the mechanism that sustains life Sensation is the nervous system's communications facility it monitors all incoming events that impact the body and directs them to the brain where they can be analyzed and acted upon To be precisely understood the brain communicates in just one language the language of sensation Universally used throughout the human nervous system we see examples of sensation language in its messages to us such as touch taste smell sound and sight our five senses But these are only examples of its extensive use Sensation began with life itself and evolved from meager beginnings into its enormous variations in modern humans Within all organisms the occurrence of each sensation corresponds to a unit of consciousness
