Senses of the Empire Eleanor Betts, 2017-02-24 The Roman empire afforded a kaleidoscope of sensations Through a series of multisensory case studies centred on people places buildings and artefacts and on specific aspects of human behaviour this volume develops groundbreaking methods and approaches for sensory studies in Roman archaeology and ancient history Authors explore questions such as what it felt like and symbolised to be showered with saffron at the amphitheatre why the shape of a dancer's body made him immediately recognisable as a social outcast how the dramatic gestures loud noises and unforgettable smells of a funeral would have different meanings for members of the family and for bystanders and why feeling the weight of a signet

ring on his finger contributed to a man's sense of identity. A multisensory approach is taken throughout with each chapter exploring at least two of the senses of sight, hearing, smell, taste, and touch. The contributors' individual approaches vary reflecting the possibilities and the wide application of sensory studies to the ancient world. Underlying all chapters is a conviction that taking a multisensory approach enriches our understanding of the Roman empire but also an awareness of the methodological problems encountered when reconstructing past experiences. Social, Emotional, and Psychosocial Development of Gifted and Talented Individuals Anne Rinn, 2021-09-23
Social Emotional and Psychosocial Development of Gifted and Talented Individuals Merges the fields of individual differences, developmental psychology, and educational psychology with the field of gifted education. Provides a complete overview of the social, emotional, and psychosocial development of gifted and talented individuals. Explores multiple paradigmatic lenses and varying conceptions of giftedness. Serves as a comprehensive resource for graduate students, early career scholars, and teachers. Addresses implications for the field of gifted education and future research. This book is framed around four broad questions: a) What is development? b) Are gifted individuals qualitatively different from others? c) Which psychosocial skills are necessary in the development of talent? and d) What effect does the environment have on the development of talent? Topics covered include developmental trajectories, personality development, social and emotional development, perfectionism, sensory sensitivity, emotional intensity, self-beliefs, motivation systems, perspective, psychosocial interventions, and counseling and mental health. **So, I'm Autistic** Sarah O'Brien, 2023-06-21 There isn't a secret manual outlining exactly how to get through your teens and young adulthood as an autistic individual, but this book provides a script for how to do what adulthood will make you do anyway in a way that is most accessible for you. You've just received an autism diagnosis, so why do you still feel so lost when it comes to what autism actually means for you? Written by autistic advocate Sarah O'Brien, this book gives a much-needed introduction into what autism is and removes the myths, stereotypes, and stigma that surround it. Sarah provides insights into what to do after diagnosis and how to approach and navigate the process of informing those in your life, from your family and friends to your teachers or manager at work. Utilising her own experience of feeling lost after diagnosis and navigating all of the firsts of adolescence and young adulthood, Sarah provides an honest and friendly voice to guide you through it all. Intelligent and clearly written, this is the fact-led and information-rich resource that will answer your questions about autism, introduce you to your new community, and set you up to thrive as an autistic adult. **deep-sensory** Gudrun Leyendecker, 2024-07-26 Gudrun Leyendecker has been an author since 1995. Experimental Psychology, Cognition, and Human Aging Donald H. Kausler,2012-12-06 This book is a major revision and extension of my earlier book Experimental Psychology and Human Aging which appeared in 1982 The intervening years have seen a remarkable expansion of psychological research on human aging especially on topics dealing with cognition They have also seen research on cognitive aging gain increasing importance within the mainstream of basic cognitive research As my lecture notes for my course in the psychology of aging grew so did my apprehension regarding the task ahead of me in revising the first edition The research explosion in cognitive aging forced several major changes in content from the first to the second edition Two chapters on learning and memory in the first edition were necessarily expanded to six chapters in the present edition Similarly the single prior chapter on perception and attention became two chapters as did the single prior chapter on thinking Another change from the first edition is in the addition of some review of the effects of abnormal aging on various cognitive processes particularly in regard to memory functioning To keep the revision within reasonable length some sacrifices had to be made The multiple chapters on methodology and theory in the first edition were condensed into the present single chapter However the major topics from the first edition were retained and in fact added to by the inclusion

of important topics and issues that emerged over the past eight years The Web of Life Imperative Michael J. Cohen, 2003

A book and course that teaches you the Natural Systems Thinking Process A nature connected learning tool enables our psyche to genuinely tap the healing powers of nature and regenerate 48 peaceful natural intelligences in our awareness and thinking Backyard or backcountry this practical multiple sense book empowers you to improve your health relationships and happiness by replacing destructive omissions in how we learn to think with rejuvenated natural sensitivities Learn how to reconnect your psyche to its nurturing origins in the restorative vigor sustainability and peace of nature Help yourself and your community benefit from the profound renewal that lies in the magnificence of a beautiful day the wisdom of an ancient tree and the fortitude of a weed Let nature s invincible healing energies help your thinking transform your stress disorders and harmful bonds into constructive personal social and environmental rewards Grow from hands on accredited Applied Biophilia classes essays activities research internships ethics counseling and healing Strengthen your inborn natural genius Enjoy an Earth friendly job career internship or teaching certification Take advantage of subsidized online courses and degree programs To understand how and why this book will work for you as it has for so many others consider the following key intelligence test question one that ordinarily might help assess a person s mathematical aptitude If you count a dog s tail as one of its legs how many legs does a dog have Five of course is the correct answer for a math test Intelligent people say five because it is valid in mathematical systems and contemporary thinking and is highly regarded and rewarded by our society However we don t solely live our lives or think in mathematical systems Our natural sense of reason can consider what we know from our actual contact with a real normal dog too That s when our multitude of other natural senses come into play senses of touch motion color texture language sound smell consciousness community trust contrast and love They each provide further information and help our sense of reason make more sense and a more informed decision They enable our thinking to register that a tail is different than a leg that a dog has four legs not five no matter what might be correct in mathematical logic It is a grave mistake for anyone not to take seriously the difference between 4 leg and 5 leg ways of knowing and our learned prejudice for the latter As this book shows when they are not in balance the schism between their two different ways of registering the world is significant Four leg knowing is a magnificent psychological and physiological phenomenon with deep natural system roots into the eons the heart of Earth and our psyche It brings our widely diverse multiplicity of natural sensory experiences into our awareness Five leg knowing produces important awareness through abstract imagination labels and stories However when it does not also seek and contain 4 leg knowledge it results not only in our desensitization but in the separation of our thinking from the regenerative powers of Earth s natural systems within and around us This profound loss produces the many destructive side effects of our artificial world that we can not readily solve Four leg versus 5 leg discord creates an entrenched conflict in our psyche between how we think and how nature works This is a point source of the stress and contamination our society produces in the integrity of people and the environment It

generates our many disorders and troubles that are seldom found in nature It is important to recognize is that by financially and socially rewarding us for getting good grades or for making the grade by using nature isolated 5 leg thinking our socialization habitually bonds conditions programs or ad

The Social, Cultural, and Political Discourses of Autism Jessica Nina Lester, Michelle O'Reilly, 2021-11-13 Taking up a social constructionist position this book illustrates the social and cultural construction of autism as made visible in everyday educational institutional and historical discourses alongside a careful consideration of the bodily and material realities of embodied differences The authors highlight the economic consequences of a disabling culture and explore how autism fits within broader arguments related to normality abnormality and stigma To do this they provide a theoretically and historically grounded discussion of autism one designed to layer and complicate the discussions that surround autism and disability in schools health clinics and society writ large In addition they locate this discussion across two contexts the US and the UK and draw upon empirical examples to illustrate the key points Located at the intersection of critical disability studies and discourse studies the book offers a critical reframing of autism and childhood mental health disorders more generally

Neural processing of emotion in multimodal settings Martin Klasen, Benjamin Kreifelts, Yu-Han Chen, Janina Seubert, Klaus Mathiak, 2015-05-06 Our everyday life is characterized by a multitude of emotionally relevant cues that we perceive and communicate via various sensory channels This does not only encompass the obvious cases of auditory and visual modalities but also olfactory gustatory and even tactile stimuli Any kind of emotional situation in a natural setting is usually a multimodal experience A friend welcomes us with warm words a smile and a happy voice the sight of our favourite food is accompanied by a seductive smell and a delicious taste the thrill of watching an exciting movie scene is intensified by a gripping soundtrack In these situations the signals from various senses do not stand on their own they interact and create a unified emotional experience Recent neuroscientific research has begun to accommodate this inherent multimodality of emotions in natural situations by studying the interaction of affectively relevant information from more than one sensory channel Fascinating new aspects emerge concerning the neurobiology of emotion processing and there is evidence that integrating emotional cues from various sources invokes brain processes that go beyond the well known patterns observed during unimodal stimulation The aim of this volume is to present novel and interesting studies dealing with the multimodality of emotions and their neural processing This includes findings from novel paradigms beyond the classical stimulus response pattern fascinating new insights into the interaction of the chemical senses new analysis methods comprehensive reviews of selected topics multimodality in social interactions and clinical perspectives Taken together the studies of this volume thus help us to better understand the interplay of various senses in our daily emotional experiences

Reductive Model of the Conscious Mind Galus, Wieslaw, Starzyk, Janusz, 2020-08-21 Research on natural and artificial brains is proceeding at a rapid pace However the understanding of the essence of consciousness has changed slightly over the millennia and only the last decade has brought some progress to the area Scientific ideas emerged

that the soul could be a product of the material body and that calculating machines could imitate brain processes. However, the authors of this book reject the previously common dualism, the view that the material and spiritual/psychic processes are separate and require a completely different substance as their foundation. Reductive Model of the Conscious Mind is a forward-thinking book wherein the authors identify processes that are the essence of conscious thinking and place them in the imagined simplified structure of cells able to memorize and transmit information in the form of impulses, which they call neurons. The purpose of the study is to explain the essence of consciousness to the degree of development of natural sciences because only the latter can find a way to embed the concept of the conscious mind in material brains. The book is divided into three parts. Part 1 works to convince readers that the emergence of consciousness does not require detailed knowledge of the structure and morphology of the brain, with the exception of some specific properties of the neural network structure that the authors attempt to point out. Part 2 proves that the biological structure of many natural brains fulfills the necessary conditions for consciousness and intelligent thinking. Similarly, Part 3 shows the ways in which artificial creatures imitating natural brains can meet these conditions, which gives great hopes for building artificially intelligent beings endowed with consciousness. Covering topics that include cognitive architecture, the embodied mind, and machine learning, this book is ideal for cognitive scientists, philosophers of mind, neuroscientists, psychologists, researchers, academicians, and advanced-level students. The book can also help to focus the research of linguists, neurologists, and biophysicists on the biophysical basis of postulated information processing into knowledge structures.

Senses And Sensitivity: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the engaging narratives that have charmed audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This poignant tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Senses And Sensitivity : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is an exceptional and suspenseful novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
