Sensory Integration Plus Wendy Vann MS LPC, 2014-01-16 Wendy Vann's job as a counselor could not prepare her for raising two sons with special needs. Mykel did not like to be held, would not sleep at night, cried often, and couldn't be comforted. He also had projectile vomiting, allergies to milk, asthma, and never slowed down. Jesse was even more active than his brother, and his list of problems included frantic feeding, tremors, difficulty nursing, and constant ear infections. In this book, Vann shares how she came to view her children's problems as assets. She also explores how she struggled with decisions over medicating her children versus using more natural methods. Throughout, she focuses on sensory integration or processing, which is how we use information through our senses to connect with what we have already learned about the world around us. Children with special needs often process this information much differently than others. Whether you have a loved one with Autism, Sensory Processing, Tourette Syndrome, Obsessive Compulsive Disorder, Attention Deficit Hyperactivity Disorder, Dyslexia, or some other problem, you'll be inspired by Vann's journey and walk away with practical information to improve behavior and enhance success with **Sensory Integration Plus**.

A Parent's Guide to Developmental Delays Laurie Fivozinsky LeComer, 2006-01-03 Developmental delays affect millions of children each year and often go undetected until an alert and caring parent recognizes there's a problem. In **A Parent's Guide to Developmental Delays**, special education expert and consultant Laurie LeComer, M.Ed., provides essential information for any parent with a child who might have cognitive, physical, or emotional delays. Easy to understand, reassuring, and up to date, the book covers everything concerned parents need to know. Using real-life examples and case studies along with checklists, exercises, and other hands-on advice, the book covers a range of delays and disorders that include autism, ADHD, learning disabilities, Sensory Processing Disorder, aggressive behavior, and motor control problems. Topics include spotting the red flags of delayed development for every age group, identifying your child's specific challenges, acting swiftly in order to gain the advantages of early intervention, getting a diagnosis and treatment plan that fits your child's needs, working with teachers, health professionals, and specialists for maximum results, tracking your child's progress, understanding your rights, and making the most of every available resource. Trusting your instincts in order to help your child learn, develop, and thrive.

The Brat Stops Here! Mary-Elaine Jacobsen, Psy.D., 2007-04-01 In her private practice, Mary-Elaine Jacobsen worked with thousands of parents to help them with their defiant, obnoxious, and challenging children. By following her program, parents have seen their children's arguing, tantrums, and disobedience come to an end. In **THE BRAT STOPS HERE**, Dr. Jacobsen comprehensively outlines her program for giving parents the essential tools they need to set limits and expectations and follow through with their kids when they cross the line. The key to Dr. Jacobsen's program is the Privileges On/Privileges Off approach. When a child does not comply with the rules of the house, which are carefully explained to the child in an age-appropriate manner, he or she loses all privileges and must earn them back by apologizing, acknowledging what they would do differently, doing what was asked of them in the first place, and performing an additional chore. Following this approach consistently over the course of five weeks will have a

dramatic effect on the household including reducing tension in the interaction between parents and children developing skills that will help children get along better at home and at school and laying the foundation for children to become self sufficient responsible adults The Early Childhood Education Intervention Treatment Planner David J.
