Liability for Crimes Involving Artificial Intelligence Systems Gabriel Hallevy, 2014-11-06 The book develops a general legal theory concerning the liability for offenses involving artificial

intelligence systems The involvement of the artificial intelligence systems in these offenses may be as perpetrators accomplices or mere instruments The general legal theory proposed in this book is based on the current criminal law in most modern legal systems In most modern countries unmanned vehicles sophisticated surgical systems industrial computing systems trading algorithms and other artificial intelligence systems are commonly used for both industrial and personal purposes The question of legal liability arises when something goes wrong e g the unmanned vehicle is involved in a car accident the surgical system is involved in a surgical error or the trading algorithm is involved in fraud etc Who is to be held liable for these offenses the manufacturer the programmer the user or perhaps the artificial intelligence system itself The concept of liability for crimes involving artificial intelligence systems has not yet been widely researched Advanced technologies are forcing society to face new challenges both technical and legal The idea of liability in the specific context of artificial intelligence systems is one such challenge that should be thoroughly explored

The Criminalization of European Cartel Enforcement Peter Whelan, 2014-08-07 Cartel activity is prohibited under EU law by virtue of Article 101 1 of the Treaty on the Functioning of the European Union Firms that violate this provision face severe punishment from those entities responsible for enforcing EU competition law the European Commission the national competition authorities and the national courts Stiff fines are regularly imposed on firms by these entities such firm focused punishment is an established feature of the antitrust enforcement landscape within the EU In recent years however focus has also been placed on the individuals within the firms responsible for the cartel activity It is increasingly recognized that punishment for cartel activity should be individual focused as well as firm focused Accordingly a growing tendency to criminalize cartel activity can be observed in the EU Member States The existence of such criminal sanctions within the EU presents a number of crucial challenges that need to be met if the underlying enforcement objectives are to be achieved in practice without violating prevailing legal norms For a start given the severe consequences of a custodial sentence the employment of criminal antitrust punishment must be justifiable in principle one must have a robust normative framework rationalizing the existence of criminal cartel sanctions Second for it to be legitimate antitrust criminalization should only occur in a manner that respects the mandatory legalities applicable to the European jurisdiction in question These include the due process rights of the accused and the principle of legal certainty Finally the correct practical measures such as a criminal leniency policy and a correctly defined criminal cartel offence need to be in place in order to ensure that the employment of criminal antitrust punishment actually achieves its aims while maintaining its legitimacy These three particular challenges can be conceptualized respectively as the theoretical legal and practical challenges of European antitrust criminalization This book analyses these three crucial challenges so that the complexity of the process of European antitrust criminalization can be understood more accurately In doing so this book acknowledges that the three challenges should not be considered in isolation In fact there is a dynamic relationship between the theoretical legal and practical challenges of European antitrust

criminalization and an effective antitrust criminalization policy is one which recognizes and respects this complex interaction

Christ as Centre and

Circumference John Warwick Montgomery, 2012-07-23 Endorsements Dr Montgomery's latest book is one that every serious reader interested in clear Christian thinking should have on a table near her most comfortable reading chair. It is filled with a wide variety of bite-sized essays that are absolutely delightful, knowledgeable, fun, witty, and unexpected. If you have never read the work of J. W. Montgomery before, you are in for a treat. This is a book that brings together his best writing from the past with his latest essays. It's a Christian feast of ideas that celebrates our Lord and His unfailing Word. Craig J. Hazen, Ph.D., Director, MA Program in Christian Apologetics, Biola University. What makes J. W. Montgomery tick? What has driven him over a massively productive career to such wide-ranging interests as computers and Chemnitz legal theory and apologetics, human rights and Christology, Dawkins and Duchamp? The answer is clear: the gospel of Jesus Christ and its defense, articulation, and application to the real world in which the Word became flesh, died, and rose again as the Savior. Many of our best confessional era theologians, both Lutheran and Reformed, were Renaissance men, but that's rarely the case today. Dr. Montgomery is a glaring exception, and this book is a wonderful display of that full scope of his remarkable insights. While being an ardent defender of the Lutheran confession, he is far from parochial. Even in places where one might disagree, the clarity, logic, and relentless rigor of his arguments will kindle fires in hearths that we didn't even know we had, and make us better advocates for the gospel. Dr. Michael Horton, J. Gresham Machen Professor of Systematic Theology and Apologetics, Westminster Seminary California. About the Contributor: John Warwick Montgomery is Professor Emeritus of Law and Humanities, University of Bedfordshire, England; Distinguished Research Professor of Philosophy and Christian Thought, Patrick Henry College, Virginia, U.S.A., and Director, International Academy of Apologetics, Evangelism, and Human Rights, Strasbourg, France. He holds ten earned degrees, besides a Doctorate in Philosophy from the University of Chicago, the Doctorat d'Universit from Strasbourg, France, and the LL.M. and LL.D. from the University of Cardiff, Wales, UK. A frequent contributor to Christianity Today, Dr. Montgomery has been honored by inclusion in Who's Who in America, Who's Who in France, and The Dictionary of International Biography. He is the author of some thirty books in the areas of theology, philosophy, and church history. He pleads cases before the European Court of Human Rights and has received the Patriarch's Medal of the Romanian Orthodox Church for his efforts in behalf of religious liberty. He is an ordained Lutheran pastor. Websites: **Crime and Justice in**

Contemporary Japan Jianhong Liu, Setsuo Miyazawa, 2017-12-15 This book provides an important overview of key criminology and criminal justice concerns in Japan. It highlights similarities between the practice of criminology research in Japan as well as important differences with other areas of Asia and with the West. In previous decades, Japan attracted international attention as the only industrialized country where the crime rate declined along with a rise in urbanization and economic development. Currently, Japan still enjoys a declining crime rate, the lowest among major industrialized countries, and a study of criminal justice practices in Japan may provide important insights for other regions. Japan also experiences important contemporary challenges which are shared by other regions. 1. Japan has the highest proportion of people over the

age of 60 in the world For criminology this means key challenges in the victimization of older people as well as the challenges of an aging prison population 2 Besides the United States Japan is the only developed country that still practices capital punishment and its rate has been on the rise in the past 20 years 3 Japan has also introduced new reforms in its law practice including the introduction of new trial formats The research in this book provides a helpful overview for scholars interested in criminology and criminal justice in Japan to understand the key issues of concern and present a framework for future research needs It will be of interest to researchers in criminology and criminal justice international studies Asian Studies sociology and political science

Enforcing Pollution Control Regulation Carolyn Abbot, 2009-05-18 Monitoring and enforcement issues must be analysed when determining the effectiveness of pollution control regulation and clearly influence choices about how to regulate This book demonstrates how an economic analysis of law enforcement can

generate important insights into how best to enforce pollution control regulation. It seeks to provide a clear and accessible way into the law and economics literature on enforcement. More specifically, it uses Gary Becker's deterrence model, which by differentiating between two enforcement variables, namely the probability of apprehension and conviction and the severity of sanction, facilitates a comparison of the effectiveness of different enforcement tools in inducing desirable behaviour. As such, it provides a valuable analytical tool in considering how best to pursue cost-effective enforcement. Major themes to be addressed include Becker's deterrence model and expansions thereof, reasons for compliance, environmental enforcement strategies, and the importance of a deterrence threat and formal pollution control law enforcement mechanisms such as prosecution and criminal sanctions, administrative mechanisms, and civil liability. The book argues that in pursuing cost-effective enforcement, much can be learned from examining enforcement practices in different jurisdictions, and to this end, the author examines pollution control laws, enforcement strategies, and sanctions in Australia, Canada, and England and Wales. The book makes an important contribution to existing literature on environmental law enforcement, but its value extends beyond this. The theoretical framework adopted and the range of issues discussed make it of interest to regulatory and public law scholars more generally.
