Separate But Equal A Levels And Gnvqs:

Separate But Equal? ,1997 Looking in detail at the strong contrasts in the provision traditionally made for academically and vocationally minded students the authors discuss the differences and similarities in practice as observed in 40 schools and colleges **Separate But Equal?** Tony Edwards,Carol Fitz-Gibbon, Frank Hardman,Roy Haywood,Nick Meagher,2005-08-19 This book looks in detail at the strong contrasts in the provision traditionally made for academically and vocationally minded students and looks at differences and similarities in practice The chapters report evidence of how students on both sides think they have been taught They also report on how those students prefer to learn how their teachers define the kinds of learning appropriate for particular qualifications and how the organisation of learning for different but equal qualifications was observed in forty schools and colleges The book s main focus is on the objectives and processes of learning at a stage which is certainly being transformed but which is still powerfully shaped by myths about the sixth form and education of leaders *Teaching Modern Foreign Languages at Advanced Level* Norbert Pachler,2002-11-01 Designed to complement Learning to Teach Modern Foreign Languages in the Secondary School this book focuses specifically on the skills and processes of teaching MFL at A and A S level in schools and colleges The book is divided into three sections the changing nature of A and A S level courses bridging the gap between GCSE and A level and planning teaching and assessment With chapters on learner independence teaching and learning grammar planning topics and programmes of work working with literature and vocational alternatives the book will be an essential text for all secondary MFL students and teachers *Aspects of Teaching Secondary Design and Technology* Gwyneth Owen-Jackson,2003-09-02 Beginning by outlining the national curriculum for design and technology Aspects of Teaching Secondary Design and Technology goes on to look at what design and technology is in the primary school at examination level and post 16 Vocational qualifications relevant to design and technology are also discussed There are chapters looking at the relationship between design and technology and the wider social and cultural context The development of cross curricular skills and value judgements are discussed as are sustainability and the role of the community in the teaching and learning of design and technology Together these articles comprise a sound guide to good classroom practice related to the requirements of the curriculum and rooted in the professional perspectives of experienced teachers **Resources in Education** ,1998 *National School Policy (1996)* Jim Docking,2018-02-06 Published in 1996 this book presents a broad overview of the development of educational policy for schools in England and Wales since Margaret Thatcher s Conservative administration took office in 1979 It reviews the separate strands of education policy as it relates to curriculum equal educational opportunities diversity and choice and management policies and combines these with an overall appraisal of the direction of the schools system in the two decades before it was written The book thereby provides a comprehensive text for undergraduate and postgraduate students which raises issues for debate and includes support material for discussion It will also be of interest to school governors

educationalists and all those who care about the direction of educational change **Separate But Equal?** Edwards Tony,1997-11-13 Very damaging effects are attributed to the deep divide between academic and vocational post compulsory education which has marked the English education system It has been blamed for keeping one side too narrowly academic and the other too narrowly practical Even worse a persistent belief that real education post 16 is properly reserved for an academically minded minority has kept participation rates well below those of most comparable countries thereby producing an under educated and under skilled workforce This text looks in detail at the contrasts in the provision traditionally made for academically and vocationally minded students and looks at differences and similarities in practice The chapters report evidence of how students on both sides think they have been taught They also report on how those students prefer to learn how their teachers define the kinds of learning appropriate for particular qualifications and how the organization of learning for different but equal qualifications was observed in 40 schools and colleges **Teaching Young Adults** Trevor Dawn,Joe Harkin,Gill Turner,2013-07-04 Further and Higher Education in the UK has expanded greatly in recent years bringing into education large numbers of young people who present teachers with new challenges At the same time there is an immense pressure to improve the quality of learning and teaching and to encourage students to be active participants in the process This book is aimed at teachers aspiring teachers and other professionals in upper secondary schools further education colleges and universities who wish to increase learner motivation and to create opportunities for greater learner autonomy It will relate learning theory to practice provide practical help for teachers to understand how they tend to interact with students suggest how they may build a repertoire of teaching styles that foster sharing of responsibility with learners for more effective learning **Understanding Mass Higher Education** Ted Tapper,David Palfreyman,2005 In recent years most western democracies have experienced a shift from elite to mass higher education with the United States leading the way This text compares the experience of this very important social change within different nation states Whilst recognising the critical global economic forces that appear to explain the international nature of the change it sees the issues as rooted within different national traditions There is a particular focus upon the discourse of access especially the political discourse The book addresses questions such as How has expansion been explained Has expansion been generated by state intervention or by a combination of economic and social forces What are the forms of political intervention What points of agreement and conflict are generated within the wider society by expanding access Leading academic experts explore the ways in which different systems of higher education have accommodated mass access constructing comparative pictures and comparative interpretations and lessons in an accessible and informative style This book should be critical reading for students in education sociology and politics as well as policy makers and academics **Separate But Equal?** Lecturer in Industrial Relations Warwick Business School Tony Edwards,Carol Fitz-Gibbon,Frank Hardman,Roy Haywood,Nick Meagher,1997-11-13 This book looks in detail at the strong contrasts in the provision traditionally made for academically and

vocationally minded students and looks at differences and similarities in practice The chapters report evidence of how students on both sides think they have been taught They also report on how those students prefer to learn how their teachers define the kinds of learning appropriate for particular qualifications and how the organisation of learning for different but equal qualifications was observed in forty schools and colleges The book's main focus is on the objectives and processes of learning at a stage which is certainly being transformed but which is still powerfully shaped by myths about the sixth form and education of leaders
