1871-1945 Raffael Scheck, 2008-11-15 At the end of the Second World War the first unified German state collapsed a disintegration with European and global ramifications Ever since historians have sought to explain what went wrong in German history Many have focused on the violence which forged unification others have highlighted the clash of authoritarian anti democratic and anti Semitic traditions with rapid industrialization and modernization Germany 1871 1945 presents a pragmatic interpretation of German history from the unification to the end of the Nazi regime This more open approach acknowledges the strong trend in German society towards modernization and democratization particularly before 1914 while also highlighting the factors which propelled Germany toward World War I The rise of the Nazis also demands a close analysis of the economic and political instability of the 1920s and early 1930s Finally a detailed assessment of the Third Reich explains how the regime's early successes fostered a loyalty and acceptance that remained hard to shake until disaster was obvious and unavoidable

**Catholic Mediations in Southern Europe** Xabier Itçaina, 2018-11-13 Investigating the role played by religious actors in sociopolitical issues as a manifestation of the invisible politics of religion this book concentrates on the social economy support to migrants the fight against social exclusion and pacifist campaigns where religious actors have played discreet but structuring roles In the European context politico religious matters have been reduced in two ways first a reduction of identity with religion being transformed into a heritage in the form of a minimal sense of belonging and second the media focus on the most fundamentalist currents within all religions This book responds by proposing an alternative perspective with a focus on Southern European Catholicism and a comparison between Italian Spanish and French subnational territories In a period of polarized relations between religion and politics there is a Catholic action repertoire which avoids this binary confrontation and which in contrast is characterized by its mediating dimension The Catholic mediation repertoire receives little publicity and is expressed in a discreet but structuring way to address different public problems An important contribution to the literature this book will interest scholars and upper level students working on religion and politics mediation and peace studies local policy making and comparative approaches to Southern European society and politics
