Separatism Democracy And Disintegration:

Separatism Metta Spencer, 1998 As we approach the millennium the world is experiencing civil wars exclusively half of which are being waged over the issue of secession This book offers a comparative view of nine historic separatist movements some of which have achieved the break up of an empire or a state and others that to date have not Separatist struggles occur in waves that tend to coincide with upsurges of democratization Several chapters explore this connection making comparisons with economic and geopolitical causes The authors analyze the long term effects of secession after partition ethnic strife typically continues for generations minorities decline in status and democracy and human rights are derogated The break up of one state often leads to further fragmentation as in the disintegration of the Ottoman Austro Hungarian and Russian empires where years later separatism unfolded in the successor states of Yugoslavia Czechoslovakia Palestine Chechnya and Tatarstan The authors attribute much of today's separatism to the demagoguery of politicians losing legitimacy in post communist states for whom nationalism is a convenient populist ideology A broader explanation however points to the failure of modern democracies to develop constitutional mechanisms reconciling the expression of particularistic identities with the universalism of citizenship The book reviews proposals toward that end The Soviet Union - Federation or Empire? Tania Raffass, 2012-06-14 The Soviet Union is often characterised as nominally a federation but really an empire liable to break up when individual federal units which were allegedly really subordinate colonial units sought independence This book questions this interpretation revisiting the theory of federation and discussing actual examples of federations such as the United States arguing that many federal unions including the United States are really centralised polities It also discusses the nature of empires nations and how they relate to nation states and empires and the right of secession highlighting the importance of the fact that this was written in to the Soviet constitution It examines the attitude of successive Soviet leaders towards nationalities and the changing attitudes of nationalists towards the Soviet Union Overall it demonstrates that the Soviet attitude to nationalities and federal units was complicated wrestling in a similar way to many other states with difficult questions of how ethno cultural justice can best be delivered in a political unit which is bigger than the national state **Media as Politics in South Asia** Sahana Udupa, Stephen McDowell, 2017-07-14 The dramatic expansion of the media and communications sector since the 1990s has brought South Asia on the global scene as a major center for media production and consumption This book is the first overview of media expansion and its political ramifications in South Asia during these years of economic reforms From the puzzling liberalization of media under military dictatorship in Pakistan to the brutal killings of journalists in Sri Lanka and the growing influence of social media in riots and political protests in India Nepal and Bangladesh the chapters analyse some of the most important developments in the media fields of contemporary South Asia Attentive to colonial histories as well as connections within and beyond South Asia in the age of globalization the chapters combine theoretically grounded studies with original empirical research to unravel the

dynamics of media as politics The chapters are organized around the three frames of participation control and friction They bring to the fore the double edged nature of publicity and containment inherent in media thereby advancing postcolonial perspectives on the massive media transformation underway in South Asia and the global South more broadly For the first time bringing together the cultural regulatory and social aspects of media expansion in a single perspective this

interdisciplinary book fills the need for overview and analytical studies on South Asian media **Constitutionalising Secession** David Haljan,2014-11-01 Constitutionalising Secession proceeds from the question What if anything does the law have to say about a secession crisis But rather than approaching secession through the optic of political or nationalist institutional accommodation this book focuses on the underpinnings to a constitutional order as a law making community underpinnings laid bare by secession pressures Relying on the corrosive effects of secession it explores the deep structure of a constitutional order and the motive forces creating and sustaining that order A core idea is that the normativity of law is best understood through a constitutional optic as an integrative associative force Constitutionalising Secession critically analyses conceptions of constitutional order implicit in the leading models of secession and takes as a leading case study the judicial and legislative response to secession in Canada The book therefore develops a concept of constitutionalism and law making associative constitutionalism to describe their deep structure as a continuing integrative process of association This model of a dynamic process of value formation can address both the association and the disassociation of constitutional systems **Separation, Assimilation, or Accommodation** Terrence E. Cook,2003-09-30 Ethnic violence is rampant but avoidable Cook compares and contrasts all major options in ethnic minority policy including forms of separation assimilation or accommodation typically favored by subordinate ethnic groups Topics include segregation and genocide emigrations and secessionist struggles attempts at cultural annihilation assimilating for individual or collective opportunities accommodations as minimal concessions in such things as tolerance special group rights or power sharing and accommodations as maximal demands on those same themes Grounded in current concrete examples Cook s analysis brings coherence to a confused and often lethal political problem *French North America in the Shadows of Conquest* Ryan André Brasseaux,2020-12-29

French North America in the Shadows of Conquest is an interdisciplinary postcolonial and continental history of Francophone North America across the long twentieth century revealing hidden histories that so deeply shaped the course of North America Modern French North America was born from the process of coming to terms with the idea of conquest after the fall of New France The memory of conquest still haunts those 20 million Francophones who call North America home The book re examines the contours of North American history by emphasizing alliances between Acadians Cajuns and Qu b cois and French Canadians in their attempt to present a unified challenge against the threat of assimilation linguistic extinction and Anglophone hegemony It explores cultural trauma narratives and the social networks Francophones constructed and shows how North American history looks radically different from their perspective This book presents a missing chapter in

the annals of linguistic and ethnic differences on a continent defined in part by its histories of dispossession It will be of interest to scholars and students of American and Canadian history particularly those interested in French North America as well as ethnic and cultural studies comparative history the American South and migration *Restoring Justice after Large-scale Violent Conflicts* Ivo Aertsen, Jana Arsovska, Holger-C Rohne, Marta Valiñas, Kris Vanspauwen, 2013-05-13 This book provides a comparative analysis of the potential of restorative justice approaches to dealing with mass victimization in the context of large scale violent conflicts focusing on case studies from Kosovo Israel Palestine and Congo incorporating contributions from leading authorities in these areas One of the main objectives of the book is to examine if how and to what extent restorative justice is applicable in various different cultural social and historical contexts and what common themes can be identified within the different regions under analysis The book will also provide a critical analysis of the UN Basic Principles on the use of restorative justice programmes in criminal matters as applied to the context of large scale violence

Kurds Under Threat Deniz Gumustekin, 2021-08-30 Previous researches examine how transnational ethnic ties impact the relationship between host states and diaspora and why states and ethnic minorities in the diaspora may occasionally support violent rebel organizations in the homeland However these previous studies do not really consider the relationships among co ethnic organizations without a homeland government This book tackles the following important questions How and when do co ethnic Kurdish organizations provide open support for each other during conflict peace cycle events Moreover do external threats impact the relationship among co ethnic organizations The aim of this research is to identify the causal factors that influence the transnational networks between Kurdish organizations Research findings reveal that political rationality and external threats seem to be stronger predictors of political behavior than ethnic ties in the Kurdish case This study helps scholars and policy makers to evaluate the impact of transnational networks between co ethnic Kurdish organizations in cases of civil war which may play a crucial role in the escalation and de escalation of international conflicts In addition this research helps to understand the role of co ethnic organizations in building sustainable peace in areas of conflict

Citizenship in Diverse Societies Will Kymlicka, Wayne Norman, 2000-03-16 Is it possible in a modern pluralistic society to promote common bonds of citizenship while at the same time accommodating and showing respect for ethnocultural diversity Citizenship and diversity have been two of the major topics of debate in both democratic politics and political theory over the past decade Much has been written about the importance of citizenship civic identities and civic virtues for the functioning of liberal democracies and the need to accommodate the ethnocultural linguistic and religious pluralism that is a fact of life in most modern states By and large however these two topics have been largely discussed in mutual isolation Much of the writing on the issues of both citizenship and diversity remains rather abstract and general and disconnected from the specific issues of public policy and institutional design *Citizenship in Diverse Societies* examines the specific points of conflict and convergence between concerns for citizenship and diversity in

democratic societies and reassesses and refines existing theories of diverse citizenship by examining these theories in the light of actual practices and policies of pluralistic democracies *Contested States in World Politics* D.

Esherick, Hasan Kayali, Eric Van Young, 2006-04-27 The fall of empires and the rise of nation states was a defining political transition in the making of the modern world Here ten prominent specialists discuss the empire to nation transition in comparative perspective Chapters on Latin America the Middle East Eastern Euro *The Ashgate Research Companion to Secession* Peter Radan, 2016-03-23 Secession is a detachment of a territory from an existing state with the aim of creating a new state on the detached territory Secession is usually an outcome of the political mobilization of a population on the territory to be detached and as a political phenomenon is a subject of study in the social sciences Its impact on inter state relations is a subject of study in international relations But secession is also subject to regulation both in the constitutional law of sovereign states and in international law Following a spate of secessions in the early 1990s legal scholars have proposed a variety of ways to regulate the international responses to attempts at secessions Moreover since the 1980s normative justification of secession has been subject to an intense debate among political theorists and moral philosophers This research companion has the following three complementary aims First to offer an overview of the current theoretical approaches to secession in the social sciences international relations legal theory political theory and applied ethics Second to outline the current practice of international recognition of secession and current domestic and international laws which regulate secession Third to offer an account of major secessionist movements past and present from a comparative perspective In their accounts of past secessions and current secessionist movements the contributors to this volume focus on the following four components the nature and source of secessionist grievances the ideologies and techniques of secessionist mobilization the responses of the host state or majority parties in the host state and the international response to attempts at secession This provides a basis for identification of at least some common patterns in the otherwise highly varied processes of secession Politics of Civil Wars Amalendu Misra, 2013-05-13 Civil war is one of the critical issues of our time Although intrastate in nature it has a disproportionate and overwhelming effect on the overall peace and stability of contemporary international society Organized around the themes of contested nationalism violence external intervention post conflict reconstruction reconciliation and governance Amalendu Misra investigates why civil wars have become so widespread and how can they be contained Particularly noteworthy is its focus on the cycle of conflict ranging as it does on the causes conduct and end of civil wars as well as on subsequent efforts to return post conflict society to normal politics Theoretically robust and empirically solid this book clearly charts the course of contemporary civil wars using case studies from a variety

of zones of conflict including Africa Asia and Latin America to produce the most comprehensive guide to understanding civil wars in an interconnected and interdependent world
