Serial Verb Construction Parameter:

The Serial Verb Construction Parameter Osamuyimen Thompson Stewart, 2013-10-31 An investigation of the serial verb construction this work engages central issues in syntactic theory complex predicates clausal architecture and syntactic variation

Serial Verb Constructions Aleksandra IľUľr'evna Aikhenval'd, R.M.W. Dixon, 2006 A serial verb construction is a sequence of verbs which acts together as one This outstanding book is the first to study the phenomenon across languages of different typological and genetic profiles The authors all experienced linguistic fieldworkers follow a unified typological approach and avoid formalisms

Creoles, Their Substrates, and Language Typology Claire Lefebvre, 2011-01-01 Since creole languages draw their properties from both their substrate and superstrate sources the typological classification of creoles has long been a major issue for creolists typologists and linguists in general Several contradictory proposals have been put forward in the literature For example creole languages typologically pair with their superstrate languages Chaudenson 2003 with their substrate languages Lefebvre 1998 or even creole languages are alike Bickerton 1984 such that they constitute a definable typological class McWhorter 1998 This book contains 25 chapters bearing on detailed comparisons of some 30 creoles and their substrate languages As the substrate languages of these creoles are typologically different the detailed investigation of substrate features in the creoles leads to a particular answer to the question of how creoles should be classified typologically The bulk of the data show that creoles reproduce the typological features of their substrate languages This argues that creoles cannot be claimed to constitute a definable typological class

Argument Realisation in Complex Predicates and Complex Events Brian Nolan, Elke Diedrichsen, 2017-01-26 This book offers a comprehensive investigative study of argument realisation in complex predicates and complex events at the syntax semantic interface across a wide variety of the world's languages ranging over languages such as German Irish Sicilian and Italian Lithuanian Estonian and other Finno Ugric languages Pitjantjatjara Yankunytjatjara and Ngaanyatjarra from Australia's Western Desert region Japanese Tepehua Totonacan Mexico Cheyenne Mexican Spanish Boharic Coptic and Persian This volume examines the syntactic variation of complex events complex predicates and multi verb constructions within a single clause where the clause is viewed as representing a single event studying their semantics and syntax within functional cognitive and constructional frameworks to arrive at a better understanding of their cross linguistic behaviour and how they resonate in syntax These constructions manifest considerable variability in cross linguistic comparisons of complex predicate formation In European languages for example typically one of the verbs in a verb verb construction highlights a phase of an underspecified event while the matrix verb specifies the actual event In contrast serial verbs require each verb to provide a sub event dimension within a complex event that is viewed holistically as unitary in syntax This book contributes to an understanding of complex events complex predicates and multi verb constructions across languages their syntactic constructional patterns and argument realisation

Parameter Setting in Language

Acquisition Dalila Ayoun, 2005-02-28 This book provides a broad overview of parameter setting theory in first and second language acquisition and refines the theory by revisiting and challenging the traditional assumptions that underlie it based on cross linguistic language data that cover a range of syntactic and phonological phenomena From an historical perspective on parameter setting theory to an introduction to its role in computational linguistics neurolinguistics and language change the reader will find a critique of the most commonly made arguments as well as an index of all the syntactic phonological lexical and morphological parameters presented in the literature to date A closer look at the theory itself addresses the following questions What does a parameter setting approach to language acquisition entail What are the underpinnings of the theory What issues and problems remain to be solved The empirical studies carried out to test the null subject parameter and verb movement parameter are reviewed to re examine long standing theoretical assumptions as well as the learnability implications for first and second language acquisition Multi-verb Constructions Alexandra Y. Aikhenvald, Pieter

Muysken, Joshua Birchall, 2010-12-17 This book surveys multi verb constructions in multiple languages from the Americas showing a very rich tapestry of typologically unusual constructions including serial verbs auxiliaries co verbs phasal verbs Where possible a diachronic perspective is offered **A grammar of Japhug** Guillaume Jacques, 2021 Japhug is a vulnerable Gyalrongic language which belongs to the Trans Himalayan Sino Tibetan family It is spoken by several thousand speakers in Mbarkham county Rngaba district Sichuan province China This grammar is the result of nearly 20 years of fieldwork on one variety of Japhug based on a corpus of narratives and conversations a large part of which is available from the Pangloss Collection It covers the whole grammar of the language and the text examples provide a unique insight into Gyalrong culture It was written with a general linguistics audience in mind and should prove useful not only to specialists of Trans Himalayan historical linguistics and typologists but also to anthropologists doing research in Gyalrong areas It is also hoped that some readers will use it to learn Japhug and pursue research on this fascinating language in the future

Data-Rich Linguistics Oluseye Adesola, Akinbiyi Akinlabi, Olanike Ola Orie, 2018-10-09 This collection was compiled by an international group of scholars in recognition of Professor Yiwola Awoyale's contributions to African language and linguistic studies Based at University of Pennsylvania Professor Awoyale is particularly celebrated as a great field linguist who pays special attention to data and data documentation This edited volume presents current research on topics concerning the syntax semantics phonology applied and socio linguistics of African languages providing a state of the art account of contemporary issues in African linguistics today *The Atoms Of Language* Mark C Baker, 2008-08-05 Whether all human languages are fundamentally the same or different has been a subject of debate for ages This problem has deep philosophical implications If languages are all the same it implies a fundamental commonality and thus the mutual intelligibility of human thought We are now on the verge of answering this question Using a twenty year old theory proposed by the world's greatest living linguist Noam Chomsky researchers have found that the similarities among languages are more

profound than the differences Languages whose grammars seem completely incompatible may in fact be structurally almost identical except for a difference in one simple rule The discovery of these rules and how they may vary promises to yield a linguistic equivalent of the Periodic Table of the Elements a single framework by which we can understand the fundamental structure of all human language This is a landmark breakthrough both within linguistics which will thereby become a full fledged science for the first time and in our understanding of the human mind

The Syntax of Jamaican Creole Stephanie Durrleman, 2008 This book offers an in depth study of the overall syntax of basilectal Jamaican Creole the first since Bailey 1966 The author a Jamaican linguist meticulously examines distributional and interpretative properties of functional morphology in Jamaican Creole JC from a cartographic perspective Cinque 1999 2002 Rizzi 1997 2004 thus exploring to what extent the grammar of JC provides morphological manifestations of an articulate IP CP and DP The data considered in this work offers new evidence in favour of these enriched structural analyses and the instances where surface orders differ from the underlying functional skeleton are accounted for in terms of movement operations This investigation of Jamaican syntax therefore allows us to conclude that the poor inflectional morphology typical of Creole languages in general and of basilectal Jamaican Creole in particular does not correlate with poor structural architecture Indeed the free morphemes discussed as well as the word order considerations that indicate syntactic movement to designated projections serve as arguments in favour of a rich underlying functional map

Basic Linguistic Theory Volume 3 R. M. W. Dixon, 2012-05-24 R M W Dixon provides a comprehensive guide to the nature of human languages and their description and analysis The volumes comprise a one stop introduction for undergraduate and graduate students of linguistics Truly a guide for the perplexed Basic Linguistic Theory is destined to be a classic Nick Enfield

Lexical Categories Mark C. Baker, 2003-03-13 For decades generative linguistics has said little about the differences between verbs nouns and adjectives This book seeks to fill this theoretical gap by presenting simple and substantive syntactic definitions of these three lexical categories Mark C Baker claims that the various superficial differences found in particular languages have a single underlying source which can be used to give better characterizations of these parts of speech These definitions are supported by data from languages from every continent including English Italian Japanese Edo Mohawk Chichewa Quechua Choctaw Nahuatl Mapuche and several Austronesian and Australian languages Baker argues for a formal syntax oriented and universal approach to the parts of speech as opposed to the functionalist semantic and relativist approaches that have dominated the few previous works on this subject This book will be welcomed by researchers and students of linguistics and by related cognitive scientists of language

of human grammar s Several grammatical phenomena are dealt with including tonal systems person distinctions modalities reciprocity complex predicates grammatical relations word order clause linkage and information structure The structure of the book illustrates the fundamental importance of the analytical distinction between the onomasiological and the semasiological approach to language and language diversity Both perspectives are integrated in most papers with a dominant focus on either the former or the latter perspective
