Water Development Report #4 (3 Vols.) UNESCO,2012-01-01 Released every three years since March 2003 the United Nations World Water Development Report WWDR a flagship UN Water report published by UNESCO has become the voice of

the United Nations system in terms of the state use and management of the world's freshwater resources. The report is primarily targeted at national decision makers and water resource managers but is also aimed at educating and informing a broader audience from governments to the private sector and civil society. It underlines the important roles water plays in all social, economic, and environmental decisions, highlighting policy implications across various sectors from local and municipal to regional and international levels. Similarly to the first two editions, this report includes a comprehensive and up-to-date assessment of several key challenge areas such as water for food, energy, and human health, and governance challenges such as institutional reform, knowledge and capacity building, and financing, each produced by individual UN agencies.

The lack of sufficient access to clean water is a common problem faced by communities. Efforts to alleviate poverty and gender inequality and improve economic growth in developing countries. While reforms have been implemented to manage water resources, these have taken little notice of how people use and manage their water and have had limited effect at the ground level. On the other hand, regulations developed within communities are livelihood oriented and provide incentives for collective action but they can also be hierarchical, enforcing power and gender inequalities. This book shows how bringing together the strengths of community-based laws rooted in user participation and the formalized legal systems of the public sector water management regimes will be more able to reach their goals.
