Market, Ethics and Religion Niels Kærgård, 2023-01-18 This book deals with the basic question of what money can and cannot buy and offers an analysis of the limitations of the market mechanism Few concepts are as controversial as religion and the market mechanism Some consider religion to be in conflict with a modern rational scientific view of life and thus as a contributory cause of harsh conflicts and a barrier to human happiness Others consider religious beliefs as the foundation for ethics and decent behaviour Similar a number of neoliberal writers acclaimed the market mechanism as one of the greatest triumphs of the human mind and saw it as the main reason why rich countries became rich Others are extremely skeptical and stress how this mechanism has result in big multinational firms with powerfully rich owners and masses of poor low paid workers Researchers from various fields economists social scientists theologians and philosophers handle these questions very differently applying different methods and different ideals This book offers a synthesis of the different viewpoints It deals with economists theologians and philosophers differing thoughts about the market and its limitations

China: Bioethics, Trust, and the Challenge of the Market J. Tao Lai Po-wah, 2008-07-08 to the Moral Challenges H Tristram Engelhardt Jr and Aaron E Hinkley 1 Taking Finitude Seriously in a Chinese Cultural Context Across the world health care policy is a moral and political challenge Few want to die young or to suffer yet not all the money in the world can deliver physical immortality or a life free of suffering In addition health care needs differ As a result unless a state coercively forbids those with the desire and means to buy better basic health care to do so access to medicine will be unequal No one can afford to provide all with the best of care In countries such as China there are in addition stark regional differences in the quality and availability of health care posing additional challenges to public policy making Further in China as elsewhere the desire to lower morbidity and mortality risks has led to ever more resources being invested in health care When such investment is supported primarily by funds derived from taxation an increasing burden is placed on a country's economy This is particularly the case as in China with its one child policy where the proportion of the elderly population consuming health care is rising These policy challenges are compounded by moral diversity De facto humans do not share one morality Instead they rank cardinal human goods and right making conditions in different orders often not sharing an affirmation of the same goods or views of the right Official Gazette of the United States Patent and Trademark Office, 2003 **Reforming the Health**

Care Market David F. Drake, 1994-09-19 Examining the health care market in a historical framework Drake analyzes the forces and events that have shaped American health care in the twentieth century and sheds new light on why and how our health care system has dampened competitive market forces and failed to provide sound value for much of our health care expenditures He examines the roles that physicians hospitals insurance companies businesses individual consumers and government legislation have played in creating a provider dominated market in which the cost of care has been concealed from consumers Comparing U S health care expenditures with those of other developed countries he concludes that a

significant part of our health care problem is the style of medicine practiced in the United States which is much more specialized and high tech than in other developed nations Drake develops proposals for health care financing reform that consider the political and economic difficulties involved He first examines the Clinton health care reform plan and makes specific recommendations for revisions that would improve its likelihood of controlling costs He then offers an alternative proposal that would both maintain the principle of universal noncancelable coverage and eliminate the flaws in the market for health care services by giving consumers a financial stake in cost containment This timely argument combining economic and historical analysis with thoughtful consideration of the motivating humanitarian and political concerns will be of interest to everyone seeking to understand and to reform our ailing health care system
