Markets and Power Eric A. Schutz, 2016-07-01 In what ways do the actions and economic behavior of today's multinational corporations resemble the functioning and processes of the old command economies of the Soviet Union By ignoring questions about power relations in markets mainstream neoclassically oriented economists conclude that there are no significant power structures operating in market systems to control allocation and distribution This book argues to the contrary that there are fundamental and systemic power structures monopoly access to information or finance employer power etc at work in market economies which affects their ability to achieve real competition in much the same way as state controlled command economies hinder business activities Thus for example the biggest firms at the hubs of financial networks wield a kind of shaping power upon large numbers of relatively autonomous firms not only upon those that belong to the networks but also on the many firms outside them that are also affected

progress is unsustainable and potentially destructive of the planet and its socio economic systems The new landscape this creates socially politically economically intellectually is explored through an interdisciplinary approach providing a wide ranging assessment of the collapse of modernity and the challenges it poses us Sim calls for a radical alteration in our world view and for purposeful changes both to our economic and intellectual life we need to jettison the free market rein in conspicuous consumption reinvigorate public service and develop talents other than the entrepreneurial if we are to reconstruct our society satisfactorily

Digital Disconnect Robert W. McChesney, 2013-03-05 Celebrants and skeptics alike have produced valuable analyses of the Internet's effect on us and our world oscillating between utopian bliss and dystopian hell But according to Robert W McChesney arguments on both sides fail to address the relationship between economic power and the digital world McChesney's award winning Rich Media Poor Democracy skewered the assumption that a society drenched in commercial information is a democratic one In Digital Disconnect McChesney returns to this provocative thesis in light of the advances of the digital age incorporating capitalism into the heart of his analysis He argues that the sharp decline in the enforcement of antitrust violations the increase in patents on digital technology and proprietary systems and other policies and massive indirect subsidies have made the Internet a place of numbing commercialism A small handful of monopolies now dominate the political economy from Google which garners an astonishing 97 percent share of the mobile search market to Microsoft whose operating system is used by over 90 percent of the world's computers This capitalistic colonization of the Internet has spurred the collapse of credible journalism and made the Internet an unparalleled apparatus for government and corporate surveillance and a disturbingly anti democratic force In Digital Disconnect Robert McChesney offers a groundbreaking analysis and critique of the Internet urging us to reclaim the democratizing potential of the digital revolution while we still can

*Reframing the Social* Poe Yu-ze Wan, 2011 Poe Yu ze Wan argues for a critical realist and systemist social ontology designed to shed light on current debates in social theory concerning the relationship of social ontology to practical social research and the nature of the social It explores the works of the systems theorist Mario Bunge in comparison with the approach of Niklas Luhmann and critical social systems theorists to challenge the commonly held view that the systems based approach is holistic in nature and necessarily downplays the role of human agency

**Inequality, Class, and Economics** Eric Schutz, 2022-01-24 What if neoclassical economics addressed the question of class This accessible overview of economic theory launches this investigation The COVID 19 pandemic exposed the economic inequalities pervading every aspect of society and then multiplied them to a staggering degree A mere nine months into the lockdown the net worth of the infamous Forbes 400 increased by one trillion dollars In a single year the US poverty rate rose by the largest amount ever since record keeping began sixty years ago At the same time mass unemployment imperiled or erased the fragile right to quality health care for a substantial number of people living in states without Medicaid In Inequality Class and Economics Eric Schutz illumines the pillars undergirding the monstrous polarities which define our

times and reveals them as the very same structures of power at the foundations of the class system under today's capitalism. Employing both traditional and novel approaches to public policy, Inequality, Class, and Economics offers prescriptions that can genuinely address the steepening and hardening of class boundaries. This book pushes past economists' studied avoidance of the problem of class as a system of inequality based in unequal opportunity and exhorts us to tackle the heart of the problem at long last.

**International Political Economy in the 21st Century** Roy Smith, Imad El-Anis, Christopher Farrands, 2017-02-10. Understanding of the theories that underpin international political economy (IPE) and their practical applications is crucial to the study of international relations, politics, development, and economics. This is a comprehensive and accessible introduction to the field with an engaging and coherent foundation to the subject. It considers traditional and alternative approaches to IPE and, in doing so, elucidates key concepts, assumptions, and the intellectual and historical context in which they arose and developed. At all times, it makes clear their relevance to issues from trade, finance, and government to environment, technology, health, labour, security, migration, development, and culture. The book encourages independent reflection and critical thinking through a range of in-text guiding features. In addition, each chapter presents theoretical analysis alongside contemporary issues, helping the reader to relate to the real world of IPE and to better understand how theory helps inform interpretation of it. New to this edition: comprehensively updated to include key coverage of the post-2015 framework of the Sustainable Development Goals; the financial crisis and international government responses, successful or otherwise; to recent challenges; fully updated data; reflective questions; recommended readings; concept and example boxes; and illustrations. New chapters on health, migration, and labour; additional coverage of trade theories and key contemporary issues such as national versus human security, economic versus human development, and illegal networks in global trade.

**United We Fall** Phil Neisser, 2008-06-30 United We Fall argues that today s harmful levels of polarization in American politics can be ratcheted down only by giving up the twin notions that the center is the sweet spot for political efficiency and that all differences deserve equal weight in the democratic balance The American people need instead to embrace a political credo of civic engagement confrontation with open ears and spirited debate The commonplace United We Stand must be supplanted by the insight that democracy is strongest where it acknowledges and formalizes real division But surely bipartisan rancor in America and extremist violence around the world are symptoms of too much disagreement not too little No asserts the author The root cause of political violence of all stripes is the failure of opposing camps to engage each other openly and persuasively on their genuine and irreconcilable differences In making the case for principled disagreement United We Fall reviews the history of good and bad disagreement practices in American politics analyzes our mass media through a pro disagreement lens and draws on studies of conformist group behavior to expose the manipulative dynamics of contemporary dialog initiatives Neisser assesses best practices for conducting public debate at all civic levels on the most vexed issues in America today terrorism multiculturalism religion in politics social and family values race the media education and the environment
