Hall, A.M. Williams, 2013-06-29 The origins of this book lie in a project of the International Geographical Union Study Group on the Geography of Sustainable Tourism The theme Tourism and migration reflects the growing interests of tourism geographers in common with other geographers and social scientists to reach across traditional cleavages in the way research is undertaken and knowledge is formed In this instance the aim was to connect the largely discrete research domains of tourism studies and migration This was informed not only by awareness of the limitations of disciplinary barriers but also by the growing need to respond to the emergence of new forms of mobility and circulation which fitted uncomfortably into many
