Marriage In Australia Age At First Marriage And Proportions Marrying 1860 1971:

A Cultural History of Marriage in the Age of Empires Paul Puschmann, 2021-11-18 During the age of empires 1800 1900 marriage was a key transition in the life course worldwide a rite of passage everywhere with major cultural significance This volume presents an overview of the period with essays on Courtship and Ritual Religion State and Law Kinship and Social Networks the Family Economy Love and Sex the Breaking of Vows and Representations of Marriage Using this framework this volume explores global trends in marriage In nineteenth century Western Europe marriage was increasingly regarded as the only way to reach happiness and self fulfilment In the United States former slaves obtained the right to marry leading to a convergence in marriage patterns between the black and white populations In Latin America marriage remained less common but marriage rates were nevertheless on the rise In African and Asian societies European colonial powers tried to change indigenous marriage customs like polygamy and arranged marriages but had limited success Across the globe in a time of turbulent political and economic change marriage and the family remained crucial institutions the linchpins of society that they had been for centuries *The Making and Breaking of the Australian Family* Michael Gilding, 2020-07-31 Once everyone knew what the family was It was something natural and without a history mum dad and the kids Divorce women in the workforce de facto relationships and the sexual liberation movements have fractured the old certainties Nowadays there is more talk about the family than ever even if no one is quite sure what it is anymore The making and breaking of the Australian family looks at the family in history It traces the shift from the household economy of the late nineteenth century to the child centred nuclear family of the mid twentieth century to the recent proliferation of households The book argues that the so called traditional family was a quite recent creation and that its fragmentation is obscured by new redefinitions of the family The making and breaking of the Australian family addresses the changing experiences of childhood parenting home neighbourhood work birth and sexuality It examines the expansion of the market and the state patterns of class mobilisation the reconstruction of masculinity and femininity and the creative strategies of ordinary people in everyday life This is a lively and accessible book which will prove a valuable reference for students of history sociology women s studies and Australian studies and will generate wide discussion amongst people concerned with family policy welfare and contemporary social issues **Marriage in Australia** Australian Family Formation Project, Peter F. In the late 19th and early 20th centuries most countries in Europe and English speaking countries outside Europe experienced a fertility transition where fertility fell from high levels to relatively low levels England and the other English speaking countries experienced this from the 1870s while fertility in Australia began to fall in the 1880s This book investigates the fertility transition in Tasmania the second settled colony of Australia using both statistical evidence and historical sources The book examines detailed evidence from the 1904 New South Wales Royal Commission into the Fall in the Birth Rate which the Commissioners regarded as applying not only to NSW but to every state in Australia Many theories have been proposed as to why fertility declined at this time theories of economic and social development economic theories diffusion theories the spread of secularisation increased availability of artificial methods of contraception and changes in the rates of infant and child mortality The role of women in the fertility transition has generally been ignored The investigation concludes that fertility declined in Tasmania in the late 19th century in a period of remarkable social and economic transformation with industrialisation urbanisation improvements in transport and communication increasing levels of education and opportunities for social mobility One of the major social changes was in the status and role of women who became the driving force behind the fertility decline Knowing Women Marjorie R. Theobald, 1996

A comprehensive study of female education in nineteenth century Australia rich in narrative detail **Women, Love and Learning** Alison Mackinnon, 2010 This book tells the story of a generation of American and Australian women who embodied and challenged the prescriptions of their times In the 1950s and early 60s they went to colleges and universities trained for professions and developed a life of the mind They were also urged to embrace their femininity to marry young to devote themselves to husbands children and communities Could they do both While they might be seen as a privileged group they led the way for a multitude in the years ahead They were

quietly making the revolution that was to come Did they have the best of all possible worlds Or were they caught in a double bind Sylvia Plath's letters tell of her delighted sense of life opening before her as a college girl Her poetry however tells of anguish of reaching for distant goals Drawing on interviews surveys reunion books letters biographical and autobiographical writing from both American and Australian women this cultural history argues that the choices that faced educated women in that time led to the revolution of the late 1960s and 70s Something had to give There are lessons here for today's young women facing again conflicting expectations Is it possible they ask to have it all
