Snyder, Mildred Shapley Matthews, 2018-01-30 The planet Mars has been a subject of wonder for millennia as attested by its place in mythology by later speculation about its canals and by the scientific and public excitement over the Viking mission Although the scientific literature about the planet is voluminous no comprehensive treatment of the results of modern spacecraft exploration has yet been made available This volume fills that gap by providing a summary of what is presently known about Mars and identifying many puzzles such as polar cap variance occurrence of dust storms and the possible location of water The introductory chapter cites questions controversies and milestones in the study of Mars and also includes an annotated book list basic data about the planet and a guide to Martian seasons A chapter on telescopic observation credits the contributions made by many amateurs that have advanced our knowledge of variations observed on Mars A chapter on spacecraft exploration by an American and a Russian author who have participated in all Mars missions includes a revelation of an additional Soviet attempt Twenty nine technical articles cover geophysics bedrock geology surface atmosphere exosphere and magnetic field and climate history Two chapters address the search for life on Mars three concluding chapters consider the Martian satellites An indispensable reference for scientists Mars will also serve as a complete sourcebook for serious amateur astronomers      [The midnight sky. notes on the stars and planets](#) Edwin Dunkin, 1879      [Astronomical Almanac for the Year 2015 and Its Companion, The Astronomical Almanac Online](#) Government Publications Office, 2014-03-21 Prepared jointly with Her Majesty's Nautical Almanac Office United Kingdom Hydrographic Office Designed in consultation with other astronomers of many countries Provides current accurate astronomical data for use in the making and reduction of observations and for general purposes The Astronomical Almanac Online extends the printed version by providing data best presented in machine readable form Online data are provided for several years Contains data for astronomy space sciences geodesy surveying navigation and other applications Also used for navigation by air and water      **Old and New Astronomy** Richard Anthony Proctor, 1892      **Eclectic Magazine** , 1893      **Worlds in Collision** Immanuel Velikovsky, 2009 Velikovsky presents the revolutionary results of his 10 year long interdisciplinary research into modern catastrophism based on eyewitness reports by ancestors which shook the doctrine of uniformity of geology as well as Darwin's theory of evolution      [The Electrical Review](#) , 1877      [Elements of Astronomy](#) Robert Stawell Ball, 1886      **The Galaxy** William Conant Church, 1877      [The Telegraphic Journal and Electrical Review](#) , 1877      **Mathematical Questions and Solutions, from the "Educational Times"** W.
