The A to Z of Existentialism Stephen Michelman, 2010-04-01 Existentialism is the philosophy of human existence which flourished first in Germany in the 1920s and 1930s and then in France in the decade following the end of World War II The operative meaning of existentialism here is thus broader than it was circa 1945 when

the term first gained currency in France as a label for the philosophy of Jean Paul Sartre. However, it is considerably less broad than the view proposed by commentators in the 1950s and 1960s who, in an attempt to overcome Sartre's hegemony, discovered the seeds of existentialism far and wide in Shakespeare, Saint Augustine, and the Old Testament prophets. In this dictionary, existentialism is understood as a decidedly 20th-century phenomenon, though with roots in the 19th century. Effort has been made to understand the philosophy of existentialism as all philosophies should be understood as part of an ongoing intellectual tradition, an evolving history of problems, concepts, and arguments. **The A to Z of Existentialism** explains the central claims of existentialist philosophy and the contexts in which it developed into one of the most influential intellectual trends of the 20th century. This is done through a chronology, an introductory essay, a bibliography, and more than 300 cross-referenced dictionary entries offering clear, accessible accounts of the life and thought of major existentialists like Jean Paul Sartre, Martin Heidegger, Martin Buber, Karl Jaspers, Gabriel Marcel, Simone de Beauvoir, Albert Camus, and Maurice Merleau-Ponty, as well as thinkers influential to its development such as Wilhelm Dilthey, Henri Bergson, Edmund Husserl, and Max Scheler. This book affords readers an integrated, critical, and historically sensitive understanding of this important philosophical movement.

Refugees and the Media Nasir Uddin, Delaware Arif, 2024-07-17. Media and refugees rhetorically live together and practically complement each other. Yet it involves plenty of hidden political agendas and ethical issues in the representation of refugees in media. This collection raises questions: Should the media stand by refugees or maintain deliberate neutrality? Should the media dehumanize the refugees further in their humanitarian conditions? Are the media entitled to publish photographs of refugees without informed consent? Should the media stand by the state being responsible for generating refugee crisis, or should the state be accountable for rendering its people refugees? What effective roles can media play in redressing the refugee crisis in the world? The book brings together scholars across disciplines and continents who reflect on the nexus between media and refugees in contexts around the world. It engages in cutting-edge methodological and theoretical discussions and challenges regarding the reciprocal engagement between media and refugees from both local and global perspectives.

Sociocultural Studies in Education Critical Thinking for Democracy fills a void in the education of educators and citizens in a democracy It explores some of the fundamentals around which disagreements in education arise It presents a process with which those new to these debates can understand often confusing and entwined sets of facts and logics This book leads the reader through some general concepts and intellectual skills that provide the basis for making sense out of the debates around public education in a democracy This book can be seen as a primer on how to read texts about education It acknowledges that good teachers must be not only trained to teach but also educated about education It presents the various themes and currents found within the arguments and narratives that people use to represent public education It assumes that the more those interested in education know about how to see through the rhetoric the better they will be at discerning whose interests are served by which texts
