Ecosocialism Leigh Brownhill, Salvatore Engel-Di Mauro, Terran Giacomini, Ana Isla, Michael Löwy, Terisa E.

Turner, 2021-12-27 Building on the classical works that have propelled and shaped ecosocialist thinking and action and more recent political developments on the ground the volume will provide a reference point for international work in the field both directly political and academic The Handbook acquaints readers with the varied roots of and sometimes conflicting approaches to ecosocialism It does not attempt any unification of ecosocialist currents Rather it aims to provide a resource that is as comprehensive as possible with respect not only to theorization and ideological framing but also and especially to existing projects practices and movements and giving a sense of the geographical reach that ecosocialism so far represents This includes scholarship that extends Marxist foundations and reflects on more recent political developments The theoretical and practice oriented moorings are buttressed by discussions on movements frameworks and prefigurative processes as well as on social struggles occurring within institutional settings Together the collection offers a reference point for international work in the field in social movements and in institutional transformations Providing detailed but accessible overviews of the complex varied dimensions of ecosocialism the Handbook is an essential up to date guide and reference not only for researchers but also for undergraduate and graduate students in geography environmental studies development studies sociology and political science as well as for policymakers and activists

The Return of Nature John Bellamy Foster, 2020-06-16 Winner 2020 Isaac and Tamara Deutscher Memorial Prize A fascinating reinterpretation of the radical and socialist origins of ecology Twenty years ago John Bellamy Foster s Marx s Ecology Materialism and Nature introduced a new understanding of Karl Marx s revolutionary ecological materialism More than simply a study of Marx it commenced an intellectual and social history encompassing thinkers from Epicurus to Darwin who developed materialist and ecological ideas Now with The Return of Nature Socialism and Ecology Foster continues this narrative In so doing he uncovers a long history of the efforts to unite questions of social justice and environmental sustainability and helps us comprehend and counter today s unprecedented planetary emergencies The Return of Nature begins with the deaths of Darwin 1882 and Marx 1883 and moves on until the rise of the ecological age in the 1960s and 1970s Foster explores how socialist analysts and materialist scientists of various stamps first

in Britain then the United States from William Morris and Frederick Engels to Joseph Needham Rachel Carson and Stephen J Gould sought to develop a dialectical naturalism rooted in a critique of capitalism In the process he delivers a far reaching and fascinating reinterpretation of the radical and socialist origins of ecology Ultimately what this book asks for is nothing short of revolution a long ecological revolution aimed at making peace with the planet while meeting collective human needs

Karl Marx's Ecosocialism Kohei Saito,2017-10-24 Reveals the ideal of a sustainable ecosocialist world in Marx s writings Karl Marx author of what is perhaps the world s most resounding and significant critique of bourgeois political economy has frequently been described as a Promethean According to critics Marx held an inherent belief in the necessity of humans to dominate the natural world in order to end material want and create a new world of fulfillment and abundance a world where nature is mastered not by anarchic capitalism but by a planned socialist economy Understandably this perspective has come under sharp attack not only from mainstream environmentalists but also from ecosocialists many of whom reject Marx outright Kohei Saito s *Karl Marx s Ecosocialism* lays waste to accusations of Marx s ecological shortcomings Delving into Karl Marx s central works as well as his natural scientific notebooks published only recently and still being translated Saito also builds on the works of scholars such as John Bellamy Foster and Paul Burkett to argue that Karl Marx actually saw the environmental crisis embedded in capitalism It is not possible to comprehend the full scope of Marx s critique of political economy Saito writes if one ignores its ecological dimension Saito s book is crucial today as we face unprecedented ecological catastrophes crises that cannot be adequately addressed without a sound theoretical framework Karl Marx s *Ecosocialism* shows us that Marx has given us more than we once thought that we can now come closer to finishing Marx s critique and to building a sustainable ecosocialist world

Radicalism, Revolution, and Reform in Modern China Catherine Lynch,Robert B. Marks,Paul G. Pickowicz,2011-03-31 This volume illuminates the relationship of China s radical past to its reformist present as China makes a way forward through very differently conceived and contested visions of the future In the context of early twenty first century problems and the failures of global capitalism is China s history of revolutionary socialism an aberration that is soon to be forgotten or can it serve as a resource for creating a more

fully human and radically democratic China with implications for all of us Ranging from the early years of China's revolutionary twentieth century to the present the essays collected here look at the past and present of China with a view toward better understanding the ideas ideals and people who have dared to imagine radical transformation of their worlds and to assess the conceptual political and social limitations of these visions and their implementations The volume's chapters focus on these issues from a range of vantage points representing a spectrum of current scholarship The first half of the book brings new insights to understanding how early twentieth century intellectuals interpreted ideas that allowed them to break with China's past and to envision new paths to a modern future It treats of Chen Duxiu a founder of the Communist party Mao Zedong and Mao in relation to the non Communist Liang Shuming and with the Dalai Lama With continuing threads of nation and nationalities of peasants utopias and dystopias linking the chapters the book's second half looks broadly at the consequences of the implementations of radical ideas at the same time critiquing our accepted frameworks of analysis Moving up to the present the book investigates the effects of the reforms since the 1980s on long term environmental degradation and on the emergence of a capitalist rural economy It gives an unsparing view into contemporary rural China through independent films The book concludes with an analysis of the unshakable persistence of the shibboleth the rise of China in popul

The Robbery of Nature John Bellamy Foster, Brett Clark, 2020-02-24 Bridges the gap between social and environmental critiques of capitalism In the nineteenth century Karl Marx inspired by the German chemist Justus von Liebig argued that capitalism's relation to its natural environment was that of a robbery system leading to an irreparable rift in the metabolism between humanity and nature In the twenty first century these classical insights into capitalism's degradation of the earth have become the basis of extraordinary advances in critical theory and practice associated with contemporary ecosocialism In *The Robbery of Nature* John Bellamy Foster and Brett Clark working within this historical tradition examine capitalism's plundering of nature via commodity production and how it has led to the current anthropogenic rift in the Earth System Departing from much previous scholarship Foster and Clark adopt a materialist and dialectical approach bridging the gap between social and environmental critiques of capitalism The ecological crisis they explain extends beyond questions of traditional class struggle to a corporeal rift in the physical organization of living beings themselves raising critical issues of social reproduction racial capitalism alienated speciesism and ecological imperialism No one they conclude following Marx owns the earth Instead we must maintain it for future generations and the innumerable diverse inhabitants of the planet as part of a process of sustainable human development

China Robert B. Marks, 2011 This deeply informed and beautifully written book provides a comprehensive and comprehensible history of China from prehistory to the present Focusing on the interaction of humans and their environment Robert B Marks traces changes in the physical and cultural world that is home to a quarter of humankind Through both word and image this work illuminates the chaos and paradox inherent in China's environmental narrative demonstrating how historically sustainable practices can in fact be profoundly ecologically unsound The author also reevaluates China's traditional he

Capitalism in the Anthropocene John Bellamy Foster, 2022-08-23 Over the last 11 700 years during which human civilization developed the earth has existed within what geologists refer to as the Holocene Epoch Now science is telling us that the Holocene Epoch in the geological time scale ended replaced by the onset of a new more dangerous Anthropocene Epoch which began around 1950 The Anthropocene Epoch is characterized by an anthropogenic rift in the biological cycles of the Earth System marking a changed reality in which human activities are now the main geological force impacting the earth as a whole generating at the same time an existential crisis for the world's population What caused this massive shift in the history of the earth In this comprehensive study John Bellamy Foster tells us that a globalized system of capital accumulation has induced humanity to foul its own nest The result is a planetary emergency that threatens all present and future generations throwing into question the continuation of civilization and ultimately the very survival of humanity itself Only by addressing the social aspects of the current planetary emergency exploring the theoretical historical and practical dimensions of the capitalism's alteration of the planetary environment is it possible to develop the ecological and social resources for a new journey of hope

Marx's

Capital after 150 Years Marcello Musto, 2019-09-23 Faced with a new crisis of capitalism many scholars are now looking back to the author whose ideas were too hastily dismissed after the fall of the Berlin Wall During the last decade Marx's *Capital* has received renewed academic and popular attention It has been reprinted in new editions throughout the world and the contemporary relevance of its pages is being discussed again Today Marx's analyses are arguably resonating even more strongly than they did in his own time and *Capital* continues to provide an effective framework to understand the nature of capitalism and its transformations This volume includes the proceedings of the biggest international conference held in the world to celebrate the 150th anniversary of *Capital*'s publication The book is divided into three parts I Capitalism Past and Present II Extending the Critique of *Capital* III The Politics of *Capital* It contains the contributions of globally renowned scholars from 13 countries and multiple academic disciplines who offer diverse perspectives and critical insights into the principal contradictions of contemporary capitalism while pointing to alternative economic and social models Together they reconsider the most influential historical debates on *Capital* and provide new interpretations of Marx's magnum opus in light of themes rarely associated with *Capital* such as gender ecology and non European societies The book is an indispensable source for academic communities who are increasingly interested in rediscovering Marx beyond 20th century Marxism Moreover it will be of great appeal to students as well as established scholars interested in critique of capitalism and socialist theory

Marx and the Earth John Bellamy Foster, Paul Burkett, 2016-01-12 A decade and a half ago John Bellamy Foster and Paul Burkett introduced a new revolutionary understanding of the ecological foundations of Marx's thought demonstrating that Marx's concepts of the universal metabolism of nature social metabolism and metabolic rift prefigured much of modern systems ecology Ecological relations were shown to be central to Marx's critique of capitalism including his value analysis Now in *Marx and the Earth* Foster and Burkett expand on this analysis in the process of responding to recent ecosocialist criticisms of Marx The result is a full fledged anti critique pointing to the crucial roles that dialectics open system thermodynamics intrinsic value and aesthetic understandings played in the original Marxian critique holding out the possibility of a new red green synthesis
