Marx Engels And National Movements:

Marx, Engels and National Movements (RLE Marxism) Ian Cummins, 2023-05-31 While their attempts to understand the workings of capitalism led them to the conclusion that the advanced societies of Western Europe were those most likely to be the setting for a successful socialist revolution Marx and Engels by no means ignored developments outside this region. Indeed given the configurations of international politics in their time plus their conception of capitalism as a universalising system they believed that some of the forces working for change in less advanced regions could even affect the prospects of a proletarian revolution in Western Europe itself. This book first published in 1980 traces the development of Marx and Engels attitudes towards and relations with the principal national movements of their time. It deals with their responses to such movements in areas as diverse as Ireland and India Poland and China and Russia and the United States as well as in many other regions. Many of Marx and Engels most significant statements on the national question were made in their journalism occasional addresses and private correspondence sources not always readily accessible to or even known by some of their more immediate successors. Subsequent publication of this previously dispersed material has enabled a more coherent picture of their ideas on the subject to be drawn. Marx and Engels believed that national aspirations and the cause of socialism did not always go hand in hand and each national struggle had to be examined on its merits and judged according to whether its success would retard or enhance the prospects of a socialist revolution. Based on a wide range of sources this study examines an important yet neglected area of Marx and Engels ideas and activities and indicates the criteria by which they determined their attitudes at different times to a variety of national movements at work in four continents.

Nationalism and the International Labor Movement Michael Forman, 2010-11-01 Explores the idea of the nation among internationalist thinkers suggesting that major figures associated with international labor organizations never underestimated the attraction of nationalism. Each chapter begins with a discussion of main issues that framed the international labor movement's concern with the nation in different periods then analyzes the ideas of major thinkers who stand for the main trends at each point. Coverage includes the International Working Men's Association of the mid 19th century the apogee of the Second International between 1895 and the onset of WWI the Third International the Comintern 1919-43 and the influence of Stalin and Lenin. Marx, Engels, and the Polish National Movement H. Malcolm MacDonald, 1941 Marxism and National Identity Robert Stuart, 2006-06-01 Post Marxists argue that nationalism is the black hole into which Marxism has collapsed at today's end of history. Robert Stuart analyzes the origins of this implosion revealing a shattering collision between Marxist socialism and national identity in France at the close of the nineteenth century. During the time of the Boulanger crisis and the Dreyfus affair nationalist mobs roamed the streets chanting France for the French while socialist militants marshaled proletarians for world revolution. This is the first study to focus on those militants as they struggled to reconcile Marxism's two national

agendas the cosmopolitan conviction that workingmen have no country on the one hand and the patriotic assumption that the working class alone represents national authenticity on the other Anti-Semitism posed a particular problem for such socialists not least because so many workers had succumbed to racist temptation In analyzing the resultant encounter between France's anti-Semites and the Marxist Left Stuart addresses the vexed issue of Marxism's involvement with political anti-Semitism

Marxism and Nationalism Ephraim Nimni, 1991 Nimni has written an innovative and rigorous book important for his critique and his detailed exposition rich and perceptive Dr Fred Halliday Fortnight A fascinating discussion of nation state and language Nimni's book is as Ernesto Laclau says an excellent book which will become a necessary reference point for all those interested in the field Peter Beilharz in Thesis Eleven A necessary reference point for all those interested in its field Ernesto Laclau Nimni presents the reader with a lucidly argued and arranged history of the unhappy marriage between Western Marxists and the Nationalities question He effectively places these social and political theories in their historical context in the attempt to understand them on their own terms Perhaps more importantly Nimni points out the usefulness of Marxist theory or perhaps the fallibility of liberal theory for an understanding of the contemporary disintegration of nationalities in Eastern Europe He therefore poses an intelligent implicit criticism of Fukuyama's smug assertion of the triumph of liberalism in the last twentieth century Finally Nimni crucially addresses the epistemological and logical framework of Marxism and to his credit discusses the little explored area of the relationship between Marxist and liberal thought Australian Journal of Politics History Vol 41 No 3 1995 This is a book that will be particularly useful to those interested in the contribution to the study of nationalism by the Australian socialist Otto Bauer this book is a welcome addition to the literature on socialism and nationalism and particularly for the chapters of Bauer Canadian Review of Studies in Nationalism XXII No 1 2

Communism and Nationalism Roman Szporluk, 1991 This study examines the relationship between the two dominant ideologies which emerged in the 19th century Karl Marx's communism and Friedrich List's theory of nationalism List was the first economist to be studied seriously by Marx Three years before publication of the Communist Manifesto Karl Marx began work on a critique of a movement that was gaining popularity as a challenge to capitalism nationalism as put forth by the German economist Friedrich List Long regarded as a major cultural and political force in 19th century Europe nationalism was in fact to become directly involved in the conflict between capitalism and socialism offering an appealing alternative to capitalism's New World Order the doctrine of Free Trade and socialism's call for a worldwide unification of the workers against the bourgeoisie In this original new work Professor Szporluk offers a major reinterpretation of Marxism's historical development one that recognises nationalism as the third contender on the battlefield where Marxism met capitalism A bold new interpretation of Marx's intellectual biography showing how the history of Marx and Marxism is to a great extent the story of their confrontation with nationalism before 1848
