

Marxist ethics (Karl Marx)

- Ethics is considered as class interest: if moral principles arise from the proletariat and promote communist goals, they are “good”.
- Change conditions and you will change the human person, they say.

Marx Ethics:

Marx and Ethics Philip J. Kain, 1988 This book traces the development of Marx's ethics as they underwent various shifts and changes during different periods of his thought. In his early writings, his ethics are based on a concept of essence much like Aristotle's, which Marx tries to link to a principle of universalization similar to Kant's categorical imperative. In the period 1845-6, Marx abandoned this view, holding morality to be incompatible with his historical materialism. In the later writings, Marx is less of a determinist and he no longer wants to reject morality. However, he does want to transcend a morality of burdensome obligation and constraint so as to realize a community built upon spontaneous bonds of solidarity.

Marx's Ethics of Freedom George G. Brenkert, 2013-10-17 This book reveals Marx's moral philosophy and analyzes its nature. The author shows that there is an underlying system of ethics which runs the length and breadth of Marx's thought. The book begins by discussing the methodological side of Marx's ethics, showing how Marx's criticism of conventional morality and his views on historical materialism, determinism, and ideology are compatible with having an ideological system of his own. In the light of contemporary social, moral, and political philosophy, the insights and defects of Marx's major ethical themes are discussed.

Marxism and Ethics Eugene Kamenka, 1969-06-18 Marxism and Morality Nicholas Churchich, 2022-01-01 Karl Marx promised in the preface to his *Economic and Philosophic Manuscripts of 1844* that he would write an independent pamphlet on ethics. Although he never did so, in his later writings he discussed morality extensively. Later commentators were more concerned with other aspects of Marx's thought and largely neglected this area. As a result, Nicholas Churchich's exposition of Marx's thoughts on morality has become the standard work on the subject. Thoroughly researched, well-reasoned, and balanced in its argument, *Marxism and Morality* presents a comprehensive and critical analysis of Marx's and Engel's ideas on morality and ethics, analysing both strengths and weaknesses. Churchich examines morality in its bourgeois and proletarian forms, the origin and development of moral ideas, moral values, and standards, egoism, and altruism. He explores the role of religion and science in communist ethics and discusses the ends and means in the struggle for a classless society. Praised by those on both sides of the political divide for his objectivity, Churchich's approach remains the definitive evaluation of the ethical arguments of Marxism.

Ethical Dimensions of Marxist Thought Cornel West, 1991-01-01 Esteemed American philosopher Cornel West tackles the ethics of the Marxism agenda. In this fresh original analysis of Marxist thought, Cornel West makes a significant contribution to today's debates about the relevance of Marxism by putting the issue of ethics squarely on the Marxist agenda. West, professor of religion and director of the Afro-American studies program at Princeton University, shows that not only was ethics an integral part of the development of Marx's own thinking throughout his career, but that this crucial concern has been obscured by such leading and influential interpreters as Engels, Kautsky, Lukács, and others who diverted Marx's theory into narrow forms of positivism, economism, and Hegelianism.

The Theology of the Cross and Marx's Anthropology Winston D. Persaud, 2005-09-13 This is a fascinating major articulation of a

contemporary theology of the cross in response to the soteriological challenge of Karl Marx's anthropological Weltanschauung. The author focuses primarily on the much neglected Early Writings 1844 Manuscripts in which Marx himself provides a necessary humanistic critique of official Marxism. The theology of the cross which the author articulates is centered in Luther's theologia crucis, Moltmann's crucified God, and Latin American liberation theology's divine identification and solidarity with the poor and oppressed. Specifically, the context of the work is the Caribbean and the Americas.

Constructing Marxist Ethics, 2015-02-04. Does Marxism possess an ethical impulse? Is there a moral foundation that underpins the Marxist critique of capitalism and the vision for social progress? The essays collected in *Constructing Marxist Ethics: Critique, Normativity, Praxis* argue that there is such an ethical grounding for Marxist theory. The essays, each from different vantage points, construct what a Marxian ethics should look like, what kind of values should be at the heart of the Marxian enterprise. Contributors are Dan Albanese, Paul Blackledge, Bob Cannon, Tony Burns, Ian Fraser, Ruth Groff, Wadood Hamad, Christoph Henning, Peter Hudis, Lauren Langman, George E. McCarthy, Sean Sayers, Michael J. Thompson, and Lawrence Wilde.

Marxist Ethics within Western Political Theory, N. Fischer, Asher Z. Milbauer, 2015-04-09. As widely applied as Marxist theory is today, there remain a host of key western thinkers whose texts are rarely scrutinized through a Marxist lens. In this philosophical analysis of Marx's never-before-translated German notes on Machiavelli, Montesquieu, Rousseau, and Lewis Henry Morgan, Norman Fischer points to a strain of Marxist ethics that may only be understood in the context of the great works of Western political theory and philosophy, particularly those that emphasize the republican value of public spiritedness, the communitarian value of solidarity, and the liberal values of liberty and equality.

Karl Marx's Social and Political Thought, Bob Jessop, Russell Wheatley, 1999.

Marx's Ethical Vision, Vanessa Christina Wills, 2024. A central debate among scholars of Marx concerns whether Marxism has a moral content or is totally amoral, perhaps either because it embraces a strict economic determinism or because it nihilistically sides with the proletariat without offering any objective justification for that stance. Philosopher Vanessa Christina Wills argues that Marx does articulate an ethical perspective that is present throughout his writings, both the more obviously humanistic and philosophical early writings and his later economic and more empirically grounded studies such as *Capital*. The purposiveness of labor gives rise to a normativity already inherent in the present state of things, one that can guide us in knowing what sort of world we should build and that further prepares us to build it.

None so Fit to Break the Chains: Marx's Ethics of Self-Emancipation, Dan Swain, 2019-09-02. In *None so Fit to Break the Chains*, Dan Swain offers an interpretation of Marx's ethics that foregrounds his commitment to working class self-emancipation and argues for the continued relevance of this principle for contemporary politics. Self-emancipation is frequently overlooked in discussions of Marx's ethics, but it deeply influenced his criticism of capitalism, his approach towards an alternative, and his conception of his own role as activist and theorist. Foregrounding self-emancipation offers new perspectives on existing debates in the interpretation of Marx, such as the

meanings of concepts like alienation exploitation and utopianism and can also offer broader insights into the relationship between critical theory and practice that have an enduring relevance today *Ethical Marxism and its Radical Critics*

Lawrence Wilde,2016-07-27 *Ethical Marxism and its Radical Critics* argues that Marx's conception of human essence is the foundation for an ethic of liberation which permeates his social theory It testifies to his significant debt to Greek philosophy and culture Wilde examines how his humanistic ethic was developed by Marcuse and Fromm and how it has been rejected by Habermas and Gorz He also explores reservations expressed from feminist and ecological standpoints The book has been revised in the light of these criticisms and offers insights into how progress may be made towards a socialist ethical community **Encounter Between Marxian Philosophy and Theology of Humanisation in India** Mervin Shinoj

Boas,2007 **Marx's Rebellion Against Lenin** Norman Levine,2015-10-29 Marx's Rebellion Against Lenin by negating the Leninist Stalinist theory of dialectical materialism and tracing Marx's political philosophy to the Classical Humanism of Aristotle overthrows the stultifying entrapment of Stalinist Bolshevism and contributes to the revitalization of Marx's method

Marx and Ethics Philip J. Kain,1988 This study traces the development of Karl Marx's ethics as they underwent shifts and changes during different periods of his life **The Ethical Foundations of Marxism** Eugene Kamenka,2015-04-17 The Ethical Foundations of Marxism first published in 1962 and corrected and revised for a 1972 edition examines carefully and critically the origin precise nature and subsequent role of Marx's ethical beliefs Drawing freely on Marx's still largely untranslated philosophical works and drafts the author elicits the ethical presuppositions with which Marx began He then examines the intellectual development that made Marx a Communist and seeks to clarify the place of Marx's ethic in his mature materialist work Professor Kamenka distinguishes sharply between the critical ethical views of Marx and the inept conventional applications of his doctrine by Engels He appraises the ethics of the Communist Party and traces the development of the moral and legal theory in the Soviet Union He concludes by subjecting Marxism as a whole to a radical ethical and philosophical criticism for which Marx himself laid some of the foundations **Historical Materialism and the Economics of Karl Marx** Benedetto Croce,1914 It is often said that it is the business of philosophy to examine and criticise the assumptions of the sciences and philosophy claims that in this work it is not an unnecessary meddler stepping in where it is not wanted For time and again for want of philosophical criticism the sciences have overstepped their bounds and produced confusion and contradiction **Morals and Politics** William Ash,2019-11-19 First published in 1977 Ethics is the most practical branch of philosophy its immediate concern is with people's actions Yet most philosophers do little to relate ethics intelligibly to the human situation In this inquiry into the nature of ethics William Ash draws on the relevant works of Marx Engels Lenin and Stalin to present the theory and practice of Marxist ethics He offers an explanation of the moral aspect of Marx's dictum The philosophers have only interpreted the world in various ways the point however is to change it The book includes perhaps for the first time in so considered a form an assessment of Mao Tsetung's contribution to Marxist

moral philosophy together with the ethical implications of such developments in social practice as the Proletarian Cultural Revolution The author deals with the question of value by analysing the concept of good with the question of claims on people and things by analysing the concept of right with the question of the limits and scope of freedom of choice and action by analysing the concept of ought Clearly written in order to de mystify the subject the book challenges readers to test the author s enlightened Marxist approach in terms of the ethical ordering of their own society **Marx and the Ancients**

George E. McCarthy,1990-08-30 Marx and the Ancients is the first book length treatment to detail the relationship between classical Greek philosophy and Karl Marx s critique of political economy From his dissertation on the physics and astronomy of Epicurus and Democritus to his later economic writings Marx s view of the classical polis left its mark George McCarthy argues that this forgotten element in Marx s thought helps clarify his positions on ethics and social justice *The Concept of Other in Latin American Liberation* Eugene Walker Gogol,2002-01-01 In this exciting new study Eugene Gogol interweaves three strands that form the intellectual bedrock for the concept of the Other in the Latin American context Hegel s dialectic of negativity Marx s humanism and autochthonal emancipatory thought From this foundation the book explores the relation of liberatory philosophic thought to today s social and class movements Gogol considers the logic of capitalism on Latin American soil the ecological crisis in Latin America and the concept and practice of self liberation Still one of the most contested terrains of Latin American thought the Other has been of central concern for many luminary thinkers including Leopoldo Zea Octavio Paz and JosZ Carlos MariOtegui While these writers may not garner much publicity in the world press the highly public and ongoing struggles of the Zapatistas and Brazil s Landless Workers Movement demonstrate the continuing need to theorize the volatile nature of Latin American social reality
