Marxism And Nationalism The Theoretical Origins Of The Political Crisis:

Marxism and Nationalism Ephraim Nimni, 1991 Nimni has written an innovative and rigorous book important for his critique and his detailed exposition rich and perceptive Dr Fred Halliday Fortnight A fascinating discussion of nation state and language Nimni's book is as Ernesto Laclau says an excellent book which will become a necessary reference point for all those interested in the field Peter Beilharz in Thesis Eleven A necessary reference point for all those interested in its field Ernesto Laclau Nimni presents the reader with a lucidly argued and arranged history of the unhappy marriage between Western Marxists and the Nationalities question He effectively places these social and political theories in their historical context in the attempt to understand them on their own terms Perhaps more importantly Nimni points out the usefulness of Marxist theory or perhaps the fallibility of liberal theory for an understanding of the contemporary disintegration of nationalities in Eastern Europe He therefore poses an intelligent implicit criticism of Fukuyama's smug assertion of the triumph of liberalism in the last twentieth century Finally Nimni crucially addresses the epistemological and logical framework of Marxism and to his credit discusses the little explored area of the relationship between Marxist and liberal thought Australian journal of Politics History Vol 41 No 3 1995 This is a book that will be particularly useful to those interested in the contribution to the study of nationalism by the Australian socialist Otto Bauer this book is a welcome addition to the literature on socialism and nationalism and particularly for the chapters of Bauer Canadian Review of Studies in Nationalism XXII No 1 2

Nationalism and the International Labor Movement Michael Forman, 2010-11-01 Explores the idea of the nation among internationalist thinkers suggesting that major figures associated with international labor organizations never underestimated the attraction of nationalism Each chapter begins with a discussion of main issues that framed the international labor movement's concern with the nation in different periods then analyzes the ideas of major thinkers who stand for the main trends at each point Coverage includes the International Working Men's Association of the mid 19th century the apogee of the Second International between 1895 and the onset of WWI the Third International the Comintern 1919-43 and the influence of Stalin and Lenin Paper edition unseen 17 95 Annotation copyrighted by Book News Inc Portland OR

Nationalism from the Left Yannis Sygkelos, 2011-01-19 Nationalism from the Left analyses the case of the BCP as a Marxist institution which increasingly adopted and adapted nationalism it contributes to the examination of the relatively underresearched field of communist national propaganda as only in the last decade have researchers become interested in this topic It explains the reasons for this and provides evidence of the Party's nationalism across a number of spheres of political life domestic and foreign policy school text books historiography festivities and symbols Thus the Marxist nationalist discourse of the BCP was all

encompassing In contrast to many works on national communist parties Nationalism from the Left identifies many international parallels and presents an historical introduction to the reconciliation of Marxism and nationalism

The Political Thought of Joseph Stalin Erik van Ree, 2003-08-27 This book presents a comprehensive analysis of the political thought of Joseph Stalin Making full use of the documentation that has recently become available including Stalin's private library with his handwritten margin notes the book provides many insights on Stalin and also on western and Russian Marxist intellectual traditions Overall the book argues that Stalin's political thought is not primarily indebted to the Russian autocratic tradition but belongs to a tradition of revolutionary patriotism that stretches back through revolutionary Marxism to Jacobin thought in the French Revolution It makes interesting comparisons between Stalin Lenin Bukharin and Trotsky and explains a great deal about the mindset of those brought up in the Stalinist era and about the era's many key problems including the industrial revolution from above socialist cultural policy Soviet treatment of nationalities pre war and Cold War foreign policy and the purges

The Soviet Legacy in Central Asia J. Glenn, 1999-08-05 This book analyses the new pattern of security concerns of the Central Asian successor states This region is said to encompass Kazakhstan Uzbekistan Tadjikistan Kirghizstan and Turkmenistan The main contention of the book is that the security problems of these states are similar to those that faced other Third World countries after they attained independence That is due to the arbitrary creation of these states by external powers they lack a certain degree of societal cohesiveness arising from the fact that several ethnic communities reside within their borders It is this so called insecurity dilemma of each of the Central Asian states that is therefore examined

The formation of Croatian national identity Alex

Bellamy,2013-07-19 This electronic version has been made available under a Creative Commons BY NC ND open access license This book assesses the formation of Croatian national identity in the 1990s It develops a novel framework calling into question both primordial and modernist approaches to nationalism and national identity before applying that framework to Croatia In doing so the book provides a new way of thinking about how national identity is formed and why it is so important An explanation is given of how Croatian national identity was formed in the abstract via a historical narrative that traces centuries of yearning for a national state The book shows how the government opposition parties dissident intellectuals and diaspora groups offered alternative accounts of this narrative in order to legitimise contemporary political programmes based on different versions of national identity It then looks at how these debates were manifested in social activities as diverse as football religion economics and language This book attempts to make an important contribution to both the way we study nationalism and national identity and our understanding of post Yugoslav politics and society Nationhood from

Below M. Beyen,2011-12-12 Nationalism was ubiquitous in nineteenth century Europe Yet we know little about what the nation meant to ordinary people In this book both renowned historians and younger scholars try to answer this question This book will appeal to specialists in the field but also offers helpful reading for any college and university course on nationalism

Radical Left Parties and National Identity in Spain, Italy and Portugal Jacopo Custodi,2024-01-19 This book

investigates how the radical left navigates the terrain of nationalism Traversing Spain Italy and Portugal this in depth study examines how radical left parties either embrace rebuff or reshape nationalistic sentiments From Spain s Podemos grappling with Franco s legacy Italy s radical left switching from anti fascist patriotism to cosmopolitanism to Portugal s revolutionary echoes in left leaning banal nationalism the book offers comprehensive insight into the often overlooked relationship between radical left politics and national identity Through discourse analysis interviews and participant observation it delves into the reasons behind certain political positions and how they manifest discursively A must read for those eager to decipher the crossroads of national identity and left wing politics in contemporary Europe Intercultural Explorations ,2021-11-01

Divided into four sections Asian Western Intersections Intercultural Memory Intercultural Perspectives on Women Genre Studies and The Intercultural Arts these essays from diverse hands and multiple perspectives illuminate the intersections the cross sections and the synergies that characterize significant literary texts and artistic productions Individually they exemplify the insights available in an intercultural perspective together they remind us that no culture even those that claim to be pure or those that might be regarded as isolated has escaped the influence of external influences As a result this volume is doubly synergistic one because it focuses on intercultural phenomena within a specific culture and two because they represent multiple perspectives on these phenomena **Jerusalem on the Amur** Henry Felix Srebrnik,2008-10-03 In

1928 the Soviet Union proposed the establishment of an autonomous socialist Jewish republic in the far eastern reaches of

Russian territory In Birobidzhan the eternal search for a Jewish homeland would be realized and Jews would possess their own institutions which would function in Yiddish A new Jew would be created emancipated and rejuvenated Although the project was eventually revealed to be a fraud thousands of left wing Jews in Canada and the United States passionately supported it and campaigned on its behalf some even emigrated to Birobidzhan **Women's International Thought:**

Towards a New Canon Patricia Owens, Katharina Rietzler, Kimberly Hutchings, Sarah C. Dunstan, 2022-05-05 All scholarship is a collective endeavour but this book and the context in which it was completed has taught us more about the necessities of collective intellectual work and its material and emotional conditions than we would have liked The COVID 19 pandemic and lockdown came to our cities just as we completed the first draft of the book but with a lot more work to do Even before the coronavirus we were conscious of the extent to which intellectual labour depends on other forms of labour often unacknowledged and provided by others **Understanding Ethnic Conflict** Raymond Taras, Rajat Ganguly, 2015-08-07

Understanding Ethnic Conflict provides all the key concepts needed to understand conflict among ethnic groups Including approaches from both comparative politics and international relations this text offers a model of ethnic conflict s internationalization by showing how domestic and international actors influence a country s ethnic and sectarian divisions Illustrating this model in five original case studies the unique combination of theory and application in Understanding Ethnic Conflict facilitates more critical analysis of contemporary ethnic conflicts and the world s response to them Capitalism, Citizenship and the Arts of Thinking Kathryn Dean, 2014-03-26 Capitalism Citizenship and the Arts of Thinking proposes a historical materialist ethic of human flourishing understood in terms of the practice of citizenship It focuses on the ways in which capitalism s necessary mode of thinking analytical thinking impedes the nurturing of capabilities for citizenship as understood from a Marxian Aristotelian point of view It includes a systematic discussion of the Aristotelian resonances in Marx s critique of capitalism as well as an elaboration and critique of Alfred Sohn Rethel s account of the origins of analytical thinking in his book Intellectual and Manual Labor A Critique of Epistemology Dean s critique of this book draws on the language theories of Lev Vygotsky Alexander Luria Jack Goody Eric Havelock and Walter Ong so as to identify the origins of analytical thinking in literacy rather than in monetised exchange relations as claimed by Sohn Rethel Having traced the development of analytical thinking so as to bring out the ways in which this thinking was a condition of possibility for the division of head and hand in nineteenth century England Dean brings the analysis into the contemporary world by examining the changes effected by digitalised communication in terms citizenship capabilities now drawing on the work of Michael Hardt and Antonio Negri in order to do so The book s ground breaking content is in the fusion of Marxian Aristotelian and linguistic elements to develop a critique of capitalism s hegemonic mode of thinking analytical thinking as manifested in the modern sciences and to show how the draining of intelligibility from the everyday world permitted by this thinking becomes an obstacle to the practice of meaningful citizenship Its main appeal will be to Marxist thinkers whose main concern is with

the alienating as opposed to exploitative character of capitalist modes of life It is written to complement the work of such Marxists these being in the main writers such as Michael Hardt and Antonio Negri and is pitched at researchers in the field It could be used on post graduate courses in political theory as well as social and cultural theory A Vanished Ideology Matthew B. Hoffman, Henry F. Srebrnik, 2016-06-16 While a number of books and articles have been written about Jewish Communist organizations and their supporters in particular countries an academic treatment of the overall movement per se has yet to be published A Vanished Ideology examines the politics of the Jewish Communist movement in Australia Canada Great Britain South Africa and the United States Though officially part of the larger world Communist movement it developed its own specific ideology which was infused as much by Jewish sources as it was inspired by the Bolshevik revolution The Yiddish language groups especially were interconnected through international movements such as the World Jewish Cultural Union Jewish Communists were able to communicate disseminate information and debate issues such as Jewish nationality and statehood independently of other Communists and Jewish Communism remained a significant force in Jewish life until the mid 1950s *Nationalist Myths and Ethnic Identities* Natividad Gutierrez, 2015-11 This timely study examines the processes by which modern states are created within multiethnic societies How are national identities forged from countries made up of peoples with different and often conflicting cultures languages and histories How successful is this process What is lost and gained from the emergence of national identities Natividad Gutierrez examines the development of the modern Mexican state to address these difficult questions She describes how Mexican national identity has been and is being created and evaluates the effectiveness of that process of state building Her investigation is distinguished by a critical consideration of cross cultural theories of nationalism and the illuminating use of a broad range of data from Mexican culture and history including interviews with contemporary indigenous intellectuals and students an analysis of public school textbooks and information gathered from indigenous organizations Gutierrez argues that the modern Mexican state is buttressed by pervasive nationalist myths of foundation descent and heroism These myths expressed and reinforced through the manipulation of symbols public education and political discourse downplay separate ethnic identities and work together to articulate an overriding nationalist ideology The ideology girding the Mexican state has not been entirely successful however This study reveals that indigenous intellectuals and students are troubled by the relationship between their nationalist and ethnic identities and are increasingly questioning official policies of integration Russia and the Right to Self-determination in the Post-Soviet Space Johannes Socher, 2021 This book shows that Russia has a distinct approach to the right to self determination that sets it apart from Western States and from Soviet state practice Drawing on analysis of seven secessionist conflicts and a detailed study of Russian sources it traces how Russian engagement with self determination has changed over the past three decades
